

Nova Scotia Securities Commission

**Amendments to Rule 96-101 *Trade Repositories and Derivatives Data Reporting*
(the Rule Amendments)**

-and-

**Changes to Companion Policy 96-101 *Trade Repositories and Derivatives Data Reporting*
(the Policy Changes)**

WHEREAS:

1. Pursuant to section 150 of the *Securities Act*, R.S.N.S. 1989, chapter 418, as amended (the Act), the Nova Scotia Securities Commission (the Commission) has power to make rules subject to compliance with the requirements of the Act;
2. Pursuant to section 19 of the Act, the Commission has power to issue and publish policy statements; and
3. The Commission is of the opinion that the attainment of the purpose of the Act is advanced by this Instrument.

NOW THEREFORE the Commission hereby:

- (a) pursuant to the authority contained in section 150 of the Act and subject to compliance with the requirements of section 150A of the Act, approves the Rule Amendments as attached and makes the same a rule of the Commission;
- (b) pursuant to the authority contained in section 19 of the Act and subject to publication on the Commission's website, issues the Policy Changes as attached as a policy statement of the Commission; and
- (c) declares that the rule approved and made pursuant to clause (a) and the issuance of the policy statement pursuant to clause (b) shall both take effect on July 25, 2025 or on such other date as may be specified by the Minister, unless the Minister disapproves the rule or returns it to the Commission in accordance with subsection 150A(3) of the Act in which event the rule and the policy statement shall not be effective until the rule is approved by the Minister.

IN WITNESS WHEREOF this Instrument has been signed by the Chair of the Commission, being the member of the Commission prescribed by the Chair pursuant to subsection 15(3) of the Act to attend the hearing of this matter and the quorum with respect to this matter, on the 24th day of July, 2024.

**AMENDMENTS TO
RULE 96-101
TRADE REPOSITORIES AND DERIVATIVES DATA REPORTING**

1. ***Rule 96-101 Trade Repositories and Derivatives Data Reporting is amended by this Instrument.***
2. ***Except in British Columbia, the title is amended by replacing “Trade Repositories and Derivatives Data Reporting” with “Derivatives: Trade Reporting”.***
3. ***Subsection 1(1) is amended***

(a) by adding the following definitions:

“collateral and margin data” means data relating to collateral or margin posted or collected as of the date of reporting, in respect of the data elements listed in Appendix A under the headings “Data Elements Related to Collateral and Margin” and “Data Elements Related to Actions and Events”;

“commodity derivative” means a derivative for which the only underlying interest is a commodity other than currency;

“Derivatives Service Bureau” means the subsidiary of the Association of National Numbering Agencies incorporated as The Derivatives Service Bureau (DSB) Limited and designated by the Financial Stability Board as both the service provider for the unique product identifier system for derivatives and the operator of the unique product identifier reference data library, or any successor thereto;

“facility for trading derivatives” means any of the following:

- (a) a marketplace as defined in National Instrument 21-101 *Marketplace Operation*;
- (b) a swap execution facility as defined in the Commodity Exchange Act, 7 U.S.C. §1a(50) (United States of America), as amended from time to time;
- (c) a security-based swap execution facility as defined in the 1934 Act;
- (d) a multilateral trading facility as defined in Directive 2014/65/EU Article 4(1)(22) of the European Parliament, as amended from time to time;
- (e) an organized trading facility as defined in Directive 2014/65/EU Article 4(1)(23) of the European Parliament, as amended from time to time;
- (f) a person or company that performs a similar function to a person or company described in any of paragraphs (a) to (e), including, for greater

certainty, a person or company in a foreign jurisdiction;,

“notional amount threshold derivatives dealer” means a derivatives dealer to which subsection 44(1) or 44(2) of National Instrument 93-101 *Derivatives: Business Conduct* applies;,

“position level data” means the lifecycle event data, valuation data and collateral and margin data, each reported on an aggregated basis;,

“qualified reporting counterparty” means a reporting counterparty that is any of the following:

- (a) a derivatives dealer;
- (b) a reporting clearing agency;
- (c) an affiliated entity of a person or company referred to in paragraph (a) or (b);,

“UTI” means unique transaction identifier;,

“validation procedure” means a written rule, policy or procedure reasonably designed to ensure that the derivatives data reported under this Instrument satisfies the data elements listed in Appendix A;,

(b) *by replacing the definition of “creation data” with*

“creation data” means data in respect of the data elements listed in Appendix A, other than under the headings “Data Elements Related to Collateral and Margin” and “Data Elements Related to Valuation”;

(c) *by replacing the definition of “derivatives dealer” with*

“derivatives dealer” means either of the following:

- (a) a person or company engaging in or holding themselves out as engaging in the business of trading in derivatives as principal or agent;
- (b) any other person or company required to be registered as a derivatives dealer under securities legislation;,

(d) *in the definition of “interim period” by replacing “section 1.1” with “subsection 1.1(1)”*,

(e) *in the definition of “Global LEI System” by adding “System” after “Identifier”*,

(f) *except in British Columbia, in the definition of “lifecycle event” by removing the hyphen in “lifecycle”,*

(g) *by replacing the definition of “lifecycle event data” with*

“lifecycle event data” means changes to creation data resulting from a lifecycle event and data in respect of the data elements listed in Appendix A under the heading “Data Elements Related to Actions and Events”;

(h) *in the definition of “local counterparty” by replacing “the” before “transaction” with “a”, and in section (c) by adding a comma after “paragraph (a) applies”, and*

(i) *by replacing the definition of “valuation data” with*

“valuation data” means data in respect of the data elements listed in Appendix A under the headings “Data Elements Related to Valuation” and “Data Elements Related to Actions and Events”..

4. *Paragraph 1(5)(a) is amended by deleting “British Columbia”.*

5. *Section 1 is amended*

(a) *by repealing and replacing paragraphs (3)(c) and (3)(d) with the following:*

(c) all of the following apply:

- (i) the second party is a limited partnership;
- (ii) the first party is a general partner of the limited partnership referred to in subparagraph (i);
- (iii) the first party has the power to direct the management and policies of the second party by virtue of being a general partner of the second party;

(d) all of the following apply:

- (i) the second party is a trust;
- (ii) the first party is a trustee of the trust referred to in subparagraph (i);
- (iii) the first party has the power to direct the management and policies of the second party by virtue of being a trustee of the second party.,
and

(b) by adding the following subsections:

- (6)** Despite subsections (2) and (3), an investment fund is not an affiliated entity of another person or company for the purposes of this Instrument.
- (7)** For the purpose of subsection (6), “investment fund” has the meaning ascribed to it in National Instrument 81-106 *Investment Fund Continuous Disclosure*.

6. Subsection 3(3) is repealed and replaced with the following:

- (3)** For a change to a matter set out in Form 96-101F1 other than a change referred to in subsection (1) or (2), a recognized trade repository must file an amendment to the information provided in Form 96-101F1 at least annually..

7. Subsection 7(1) is amended

- (a) except in British Columbia, by deleting** “that are not contrary to the public interest” **after** “policies and procedures”,

(b) by repealing and replacing paragraph (b) with the following paragraph:

- (b)** its rules, policies, procedures and contracts are consistent with applicable laws, and that any material risk arising from a conflict between the laws of the local jurisdiction and the laws of another jurisdiction of Canada or a foreign jurisdiction that apply to a contract with its users is reasonably mitigated,,

- (c) except in British Columbia, in paragraph (c), by adding** “recognized” **before** “trade repository”, **and**

- (d) except in British Columbia, in paragraph (d), by replacing** “an” **before** “agreement that it enters into” **with** “any”, **by replacing** “who possesses” **before** “intellectual property” **with** “possession of” **and by adding a comma after** “intellectual property rights”.

8. Section 8 is amended by adding the following subsection:

- (0.1)** A recognized trade repository must establish

- (a)** an organizational structure identifying responsibilities and direct lines of accountability, including, for greater certainty, roles and responsibilities in relation to the identification, measurement, monitoring and management of material risks;

- (b) a risk management framework that includes the tolerance levels for the identified risks of the recognized trade repository;
- (c) a process for making decisions, including, for greater certainty, making decisions relating to crises and emergencies;
- (d) rules of accountability in respect of decisions relating to risk..

9. Subsection 8(1) is amended

- (a) *by deleting* “set out a clear organizational structure with direct lines of responsibility and” *before* “are reasonably designed”, *and*
- (b) *by adding paragraph (b.1)* “ensure that participants can efficiently access its derivatives data reporting services;”.

10. Section 9 is amended by adding the following subsection:

- (4) A recognized trade repository must establish, implement and maintain policies and procedures to review on a regular basis the overall performance of the board of directors and the performance of each board member..

11. Section 12 is repealed and replaced with the following:

12. A recognized trade repository

- (a) must not impose any fees or other material charges on its participants that are unfairly allocated among those participants,
- (b) must, at all times, disclose on its website fees and other material charges imposed by it on its participants for each service it offers with respect to the collection and maintenance of derivatives data, and
- (c) must review the fees and other material charges on a regular basis at least once every 2 calendar years..

12. Section 14 is replaced with the following:

Receiving derivatives data

- 14. A recognized trade repository must not refuse to receive derivatives data from a participant for all derivatives of an asset class set out in the recognition order for the trade repository and in respect of all data elements listed in Appendix A..

13. Except in British Columbia, section 15 is amended in the heading by deleting “policies,” after “communication”.

14. Section 18 is amended

- (a) *in subsection (1) by replacing “accurately, completely” with “without error or omission”, and*
- (b) *in subsection (2) by deleting “relating to a derivative required to be reported under this Instrument” after “derivatives data”.*

15. Section 21 is amended

- (a) *Except in British Columbia, in the heading, by replacing “risk requirements” with “risks”, and*
- (b) *in paragraph (3)(c), by adding “as soon as practicable” after “provide”, by adding “written” before “post-incident report”, and replacing “as soon as practicable” after “root-cause analysis” with “and any remedial action that the recognized trade repository has taken or intends to take”.*

16. The Instrument is amended by adding the following sections:

Transactions executed anonymously on a facility for trading derivatives

- 22.1.** A recognized trade repository must not disclose the identity or legal entity identifier of a counterparty to another counterparty in respect of a transaction involving a local counterparty that
- (a) is executed anonymously on a facility for trading derivatives, and
 - (b) results in a derivative that is cleared through a reporting clearing agency.

Validation of data

- 22.2. (1)** A recognized trade repository must establish, implement and maintain a validation procedure.
- (2) A recognized trade repository must, as soon as technologically practicable after receiving the derivatives data, notify a reporting counterparty, including, for greater certainty, an agent acting on its behalf, whether the derivatives data satisfies its validation procedure.
 - (3) A recognized trade repository must accept derivatives data that satisfies its validation procedure.
 - (4) A recognized trade repository must create and maintain records of all the derivatives data reported that fails to satisfy its validation procedure.

- (5) A recognized trade repository must, for all derivatives required to be reported under the Instrument, including, for greater certainty, derivatives that have expired or terminated, accept a correction from a participant to an error or omission in derivatives data that the participant reported if the corrected derivatives data satisfies the validation procedure..

17. The Instrument is amended by repealing and replacing section 23 with the following:

Verification of data

23. (1) For the purposes of this section

- (a) “verification participant” means a participant that is, or is acting on behalf of, a reporting counterparty to a derivative, and that is subject to verification requirements;
- (b) “verification requirements” means the requirements set out under paragraphs 26.1(b) or 26.1(c).

- (2) A recognized trade repository must establish, implement and maintain written rules, policies and procedures under which a verification participant is allowed and enabled to carry out its verification requirements..

18. Subsection 25(1) is amended in paragraph (c), by adding “before or” before “at the time of the transaction,”.

19. Section 26 is amended

- (a) *in subsection (1), by replacing “to” before “a derivative” with “in respect of”,*
- (b) *except in British Columbia, in paragraphs (3) (b) (i), (ii) and (iii), by replacing “Trade Repositories and Derivatives Data Reporting” with “Derivatives: Trade Reporting”,*
- (c) *by repealing subsections (5), (6) and (7),*
- (d) *by repealing and replacing subsection (8) with the following:*
- (8) If a local counterparty, other than a reporting clearing agency, to a derivative that is required to be reported under this Instrument, and that is cleared through a reporting clearing agency, has specified a recognized

trade repository to which derivatives data in relation to the derivative is to be reported, the reporting clearing agency

- (a) must report the derivatives data to the specified recognized trade repository, and
- (b) must not report derivatives data to another trade repository without the consent of the local counterparty., *and*

(e) by adding the following subsection:

- (9) A reporting counterparty must ensure that all reported derivatives data relating to a derivative satisfies the validation procedure of the recognized trade repository to which the derivative is reported..

20. *The Instrument is amended by adding the following sections:*

Verification of data

26.1. A reporting counterparty must

- (a) ensure that reported derivatives data does not contain an error or omission,
- (b) verify, in the case of a reporting counterparty that is a notional amount threshold derivatives dealer, that the reported derivatives data does not contain an error or omission, at least once every calendar quarter, provided that there are at least two calendar months between verifications, and
- (c) verify, in the case of a reporting counterparty that is a reporting clearing agency or a derivatives dealer that is not a notional amount threshold derivatives dealer, that the reported derivatives data does not contain an error or omission, at least every 30 days.

Derivatives reported in error

26.2. A reporting counterparty that reports a derivative in error must report the error to the recognized trade repository or, if the derivatives data was reported under subsection 26(2), to the regulator or securities regulatory authority, as soon as practicable after discovery of the error and, in any event, no later than the end of the business day following the day of discovery of the error.

Notification of errors and omissions with respect to derivatives data

26.3. (1) A local counterparty, other than the reporting counterparty, must notify the reporting counterparty of an error or omission with respect to derivatives data relating to a derivative to which it is a counterparty as soon as practicable after

discovery of the error or omission and, in any event, no later than the end of the business day following the day of discovery of the error or omission.

- (2) A reporting counterparty must notify the regulator or securities regulatory authority of a significant error or omission with respect to derivatives data as soon as practicable after discovery of the error or omission..

Transferring a derivative to a different recognized trade repository

26.4.(1) A reporting counterparty must not change the recognized trade repository to which derivatives data relating to a derivative is reported, unless the reporting counterparty complies with subsections (2) and (3).

- (2) At least 5 business days before a change referred to in subsection (1) is made by a reporting counterparty, the reporting counterparty must provide notice of the change to the following:
 - (a) the other counterparty to the derivative;
 - (b) the recognized trade repository to which the derivatives data is reported before the change;
 - (c) the recognized trade repository to which the derivatives data is reported after the change.
- (3) The reporting counterparty must include in the notice referred to in subsection (2) the UTI of the derivative and the date on which the reporting counterparty will begin reporting the derivatives data to the recognized trade repository referred to in paragraph (2)(c).
- (4) After providing the notice referred to in subsection (2), the reporting counterparty must report the change of recognized trade repository as if it were a lifecycle event under section 32, to the recognized trade repository referred to in paragraph (2)(b) and the recognized trade repository referred to in paragraph (2)(c) on the same day, and must use the same UTI to identify the derivative in the report to each recognized trade repository.
- (5) After changing the recognized trade repository, the reporting counterparty must report all derivatives data relating to the derivative to the trade repository referred to in paragraph (2)(c) unless the reporting counterparty subsequently changes the recognized trade repository under this section..

21. *Subsection 27(2) is amended by deleting the hyphen in “lifecycle” and replacing “unique transaction identifier” with “UTI”.*

22. *Section 28 is amended*

(a) by repealing and replacing subsection (1) with the following:

(1) In all recordkeeping and reporting that is required under this Instrument, a recognized trade repository and a reporting counterparty must identify each counterparty to a derivative by means of a single legal entity identifier that is a unique identification code assigned to the counterparty in accordance with the standards set by the Global LEI System.,

(b) in subsection (3), by replacing “If” with “Despite subsection (1), if”, adding “and the recognized trade repository” before “must identify” and adding “unique” after “single”, and

(c) by repealing subsection (4).

23. Section 29 is repealed and replaced with the following:

29. (1) In all recordkeeping and reporting that is required under this Instrument, a recognized trade repository and a reporting counterparty must identify each derivative, and each position under section 33.1, by means of a single UTI.

(2) For each derivative that is required to be reported under this Instrument, the following person or company must assign a single UTI to the derivative:

(a) if the derivative is also required to be reported under the securities legislation of a jurisdiction of Canada, other than the local jurisdiction, or under the laws of a foreign jurisdiction under which a derivative must be reported before being reported under this Instrument, the person or company required to assign the UTI under the securities legislation of that jurisdiction, or under the laws of that foreign jurisdiction;

(b) if paragraph (a) does not apply to the derivative and the derivative is cleared through a reporting clearing agency, the reporting clearing agency;

(c) if paragraphs (a) and (b) do not apply to the derivative and the transaction relating to the derivative is executed on a facility for trading derivatives that has assigned a UTI to the derivative, the facility for trading derivatives;

(d) if paragraphs (a) to (c) do not apply to the derivative, the reporting counterparty, or, if there are two reporting counterparties, the reporting counterparty with the first legal entity identifier determined by sorting the legal entity identifiers alphanumerically with the characters of the legal entity identifiers reversed.

(3) Despite paragraph (2)(d), if paragraphs (2)(a) to (c) do not apply to the derivative and the counterparties to the derivative have agreed in writing that one of them will

be the person or company responsible for assigning the UTI to the derivative, the counterparty that is responsible for the assignment under that agreement must assign the UTI.

- (4) Despite subsection (2), a person or company that is required to assign a UTI under subsection (2) may request that a recognized trade repository assign the UTI if the person or company is either of the following:

 - (a) a notional amount threshold derivatives dealer;
 - (b) not a reporting clearing agency, facility for trading derivatives, or derivatives dealer.
- (5) If a person or company makes a request under subsection (4), the recognized trade repository must assign a UTI as soon as technologically practicable following receipt of the request.
- (6) The person or company referred to in subsection (2) must assign a UTI as soon as practicable after execution of the transaction relating to the derivative, and in any event not later than the time that the derivative is required to be reported to a recognized trade repository under this Instrument.
- (7) If a facility for trading derivatives is required to assign a UTI under subsection (2), the facility for trading derivatives must provide the UTI as soon as technologically practicable to the following:

 - (a) each counterparty to the derivative;
 - (b) if the derivative is submitted for clearing, the reporting clearing agency to which the derivative is submitted for clearing.
- (8) Subject to subsection (4), if one of the counterparties to an uncleared derivative is required to assign a UTI under subsections (2) or (3), the counterparty must provide the UTI as soon as practicable to the following:

 - (a) the other counterparty to the derivative;
 - (b) if the derivative is submitted for clearing, the reporting clearing agency to which the derivative is submitted for clearing.
- (9) If a recognized trade repository assigns a UTI under subsection (4), it must provide the UTI as soon as technologically practicable to the following:

 - (a) each counterparty to the derivative;
 - (b) if the derivative is submitted for clearing, the reporting clearing agency to

which the derivative is submitted for clearing..

24. Section 30 is amended by

(a) repealing and replacing subsections (1) and (2) with the following:

30. (1) In this section, “unique product identifier” means a code that uniquely identifies a type of derivative and is assigned by the Derivatives Service Bureau.

(2) In all recordkeeping and reporting that is required under this Instrument, a recognized trade repository and a reporting counterparty must identify each type of derivative by means of a single unique product identifier., **and**

(b) repealing subsections (3) and (4).

25. Section 31 is amended

(a) in subsection (1), by adding “qualified” before “reporting counterparty”,

(b) in subsection (2), by adding “qualified” before “reporting counterparty”, and

(c) by adding the following subsection:

(3) A reporting counterparty that is not a qualified reporting counterparty in respect of a derivative must report creation data no later than the end of the second business day following the execution date of the transaction..

26. Section 32 is amended

(a) in the heading, by replacing “Life-cycle” with “Lifecycle”,

(b) in subsection (1), by replacing “life-cycle” with “lifecycle” wherever it occurs, and adding “qualified” before “reporting counterparty”,

(c) in subsection (2), by replacing “life-cycle” with “lifecycle” wherever it occurs, adding “qualified” before “reporting counterparty”, and adding “all” before “lifecycle data no later than”, and

(d) by adding the following subsections:

(3) A reporting counterparty that is not a qualified reporting counterparty in respect of a derivative must report all lifecycle event data no later than the end of the second business day following the day on which the lifecycle event occurs.

- (4) Despite subsections (1) to (3), the reporting clearing agency through which a derivative is cleared must report the termination of the original derivative to the recognized trade repository to which the derivatives data in respect of that original derivative was reported by the end of the business day following the day on which the original derivative is terminated..

27. *Section 33 is repealed and replaced with the following:*

Valuation data and collateral and margin data

- 33. (1)** With respect to a derivative that is required to be reported under this Instrument, a reporting counterparty that is a derivatives dealer or a reporting clearing agency must report to a recognized trade repository each business day
 - (a) valuation data, and
 - (b) collateral and margin data.
- (2)** If position level data in respect of derivatives has been reported under section 33.1, the reporting counterparty must calculate and report on the net amount of all purchases and sales reported as position level data for the derivatives..

28. *The Instrument is amended by adding the following section:*

Position level data

- 33.1.(1)** For the purpose of section 32, a reporting counterparty may report lifecycle event data as position level data if each derivative, for which the lifecycle event data is aggregated,
 - (a) is in a class of derivatives in which each derivative is fungible with all other derivatives in the class, and
 - (b) has no fixed expiration date or is a commodity derivative.
- (2)** For the purpose of subsection 33(1), a reporting counterparty that is a derivatives dealer or a reporting clearing agency may report valuation data and collateral and margin data as position level data if each derivative, for which the valuation data and collateral and margin data is aggregated,
 - (a) is in a class of derivatives in which each derivative is fungible with all other derivatives in the class, and
 - (b) has no fixed expiration date or is a commodity derivative..

29. *Section 35 is amended by replacing “34” with “33”.*

30. *The Instrument is amended by adding the following section:*

Facility for trading derivatives

36.1.(1) In this section, “anonymous derivative” means a derivative for which the transaction is executed anonymously on a facility for trading derivatives and that, at the time the transaction is executed, is intended to be cleared.

(2) Section 25 does not apply with respect to an anonymous derivative.

(3) Despite subsection (2), with respect to an anonymous derivative:

(a) a reference to “reporting counterparty” in the following provisions must be read as a reference to “facility for trading derivatives”: subsections 22.2(2), 26(1), 26(2), 26(4), 26(9), paragraph 26.1(a), section 26.2, subsections 26.3(1), 26.3(2) and 26.4(1), section 27, subsections 28(1), 28(3), 29(1), 30(2), and 31(1), sections 35 and 36, subsection 37(3), and sections 41 and 42;

(b) a reference to “qualified reporting counterparty” in section 31 must be read as a reference to “facility for trading derivatives”.

(4) Despite subsection (2), with respect to an anonymous derivative, a facility for trading derivatives

(a) may report the legal entity identifier of an agent of a counterparty in respect of Data Element Number 1 “Counterparty 1 (reporting counterparty)” and Data Element Number 2 “Counterparty 2” (non-reporting counterparty) identified in Appendix A if a transaction relating to the derivative is executed before the derivative is allocated among the counterparties on whose behalf the agent is acting;

(b) is not required to report the following data elements identified in Appendix A:

(i) Data Element Number 20 “Inter-affiliate indicator”;

(ii) Data Element Number 24 “Master agreement type”;

(iii) Data Element Number 25 “Master agreement version”;

(iv) Data Element Number 77 “Clearing exceptions and exemptions - Counterparty 1”;

- (v) Data Element Number 78 “Clearing exceptions and exemptions - Counterparty 2”;
 - (vi) Data Element Number 96 “Level”;
 - (vii) Data Element Number 121 “Crypto asset underlying indicator”.
- (5) Despite subsection (2), with respect to an anonymous derivative, if a facility for trading derivatives makes diligent efforts on a reasonably frequent basis to determine whether a participant of the facility, or its customer, is a local counterparty under paragraph (c) of the definition of “local counterparty” in any jurisdiction of Canada, but the facility has not yet made that determination, the participant, or its customer, is not a local counterparty under that paragraph for the purpose of reporting by the facility under this Instrument until the earlier of
- (a) the date the facility determines that the participant, or its customer, is a local counterparty under that paragraph, and
 - (b) July 31, 2029..

31. Section 38 is amended

- (a) *in the heading, by replacing “counterparties” with “participants”,*
- (b) *by repealing and replacing subsections (1) and (2) with the following:*
 - (1) Subject to section 22.1, a recognized trade repository must provide a participant that is, or is acting on behalf of, a counterparty to a derivative with timely access to all derivatives data relating to the derivative that is submitted to the recognized trade repository.
 - (2) A recognized trade repository must have appropriate authorization procedures in place to enable access under subsection (1) by a participant that is a non-reporting counterparty or acting on behalf of a non-reporting counterparty., *and*
- (c) *in subsection (3), by replacing “Each” with “Subject to section 22.1, each” before “counterparty to a derivative”.*

32. Section 39 is amended

- (a) *by repealing and replacing subsection (1) with the following:*
 - (1) A recognized trade repository must, on a reasonably frequent basis, create aggregate data on open positions, volume and number, relating to the derivatives reported to it under this Instrument.,

(b) *in subsection (2), by replacing “made available” with “referred to” after “The data”, deleting “geographic location of reference entity or asset” after “denomination”, and replacing “maturity” with “expiration” after “contract type,”,*

(c) *by repealing and replacing subsection (3) with the following:*

(3) For each derivative reported under this Instrument, a recognized trade repository must make transaction level reports available to the public in accordance with the requirements of Appendix C, for at least one year after each report is first made available., *and*

(d) *in subsection (5), by adding “and reports” after “data” and adding “and, in the case of the transaction level reports in subsection (3), for at least one year after each report is first made available” after “at no cost”.*

33. *Section 40 is repealed and replaced with the following:*

Commodity derivative

40. (1) Despite Part 3, and subject to subsection 25(4) and subsection (2) of this section, a local counterparty is not required to report derivatives data relating to a commodity derivative, if

(a) the local counterparty is not a qualified reporting counterparty, and

(b) the aggregate month-end gross notional amount under all outstanding commodity derivatives of the local counterparty and of each affiliated entity of the local counterparty that is a local counterparty in a jurisdiction of Canada, other than under paragraph (b) of the definition of “local counterparty”, excluding derivatives with an affiliated entity, did not, in any calendar month in the preceding 12 calendar months, exceed \$250 000 000.

(2) If a local counterparty ceases to satisfy a criterion under paragraph (1)(a) or (b), the local counterparty must, 180 days after the date that the criterion ceased to be satisfied, begin to report derivatives data unless, during that 180-day period, the local counterparty again satisfies the criterion..

34. *Section 41.1 is repealed and replaced with the following:*

Derivative between affiliated entities

41.1. Despite Part 3, a reporting counterparty is not required to report derivatives data relating to a derivative if, at the time the transaction is executed,

- (a) the counterparties to the derivative are affiliated entities, and
- (b) neither counterparty is a qualified reporting counterparty..

35. *Section 42 is amended by renumbering it as subsection 42(1) and adding the following subsection:*

- (2)** Subsection (1) does not apply if the derivative involves a counterparty that is an individual who is a resident of the local jurisdiction..

36. *Section 42.1 is repealed.*

37. *Section 45 is repealed.*

38. *Appendix A is replaced with the following:*

APPENDIX A
to
RULE 96-101
DERIVATIVES: TRADE REPORTING

Minimum Data Elements Required to be Reported to a Recognized Trade Repository

Under Part 3 of this Instrument, the reporting counterparty is required to provide a response for each data element unless the element is not applicable to the derivative.

Appendix A contains each data element, its description, and whether the element must be made available to the public under each of Part 4 and Appendix C of the Instrument.

For the purpose of this Appendix A, “trading facility” must be read as a reference to “facility for trading derivatives” and “derivatives data reporting rules of any jurisdiction of Canada” means Manitoba Securities Commission Rule 91-507 *Derivatives: Trade Reporting*, Ontario Securities Commission Rule 91-507 *Derivatives: Trade Reporting*, Regulation 91-507 *respecting Trade Repositories and Derivatives Data Reporting* (Québec) or Multilateral Instrument 96-101 *Derivatives: Trade Reporting*.

The CSA Derivatives Data Technical Manual, which is Appendix A of the Companion Policy, provides detailed technical specifications in connection with the data elements that are required to be reported under this Instrument. This text box does not form part of this Instrument and has no official status.

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
Data Elements Related to Counterparties			
1	Counterparty 1 (reporting counterparty)	Identifier of the reporting counterparty.	N
2	Counterparty 2 (non-reporting counterparty)	Identifier of the non-reporting counterparty.	N
3	Counterparty 2 identifier source	Type of Counterparty 2 identifier.	N
4	Buyer identifier	Identifier of the counterparty that is the buyer.	N
5	Seller identifier	Identifier of the counterparty that is the seller.	N

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
6	Payer identifier	Identifier of the counterparty of the payer leg.	N
7	Receiver identifier	Identifier of the counterparty of the receiver leg.	N
8	Broker identifier	Identifier of a broker that acts as an intermediary for Counterparty 1 without becoming a counterparty.	N
9	Country and Province or Territory of Individual (non-reporting counterparty)	If an individual is a non-reporting counterparty, the individual's country of residence and, if the individual's residence is in Canada, the province or territory.	N
10	Jurisdiction of Counterparty 1	<p>Each jurisdiction in which Counterparty 1 is:</p> <ul style="list-style-type: none"> • a local counterparty under paragraph (a) or (c) of the definition of local counterparty in the derivatives data reporting rules of any jurisdiction of Canada, • a local counterparty under paragraph (b) of the definition of local counterparty in the derivatives data reporting rules of any jurisdiction of Canada, if the non-reporting counterparty is an individual who is a resident of the jurisdiction, and/or • a local counterparty under paragraph (b) of the definition of local counterparty in Regulation 91-507 <i>respecting Trade Repositories and Derivatives Data Reporting</i> (Québec) and is a qualified person under section 82 of the <i>Derivatives Act</i> (Québec). 	N
11	Jurisdiction of Counterparty 2	<p>Each jurisdiction in which Counterparty 2 is:</p> <ul style="list-style-type: none"> • a local counterparty under paragraph (a) or (c) of the definition of local counterparty in the derivatives data reporting rules of any jurisdiction of Canada, and/or 	N

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
		<ul style="list-style-type: none"> a local counterparty under paragraph (b) of the definition of local counterparty in Regulation 91-507 <i>respecting Trade Repositories and Derivatives Data Reporting</i> (Québec) and is a qualified person under section 82 of the <i>Derivatives Act</i> (Québec). 	
Data Elements Related to Derivatives			
12	Effective date	Unadjusted date at which obligations under the derivative come into effect, as provided in the confirmation.	Y
13	Expiration date	Unadjusted date at which obligations under the derivative cease to be effective, as provided in the confirmation.	Y
14	Execution timestamp	Date and time of execution of a transaction.	Y
15	Reporting timestamp	Date and time of submission of the report to the trade repository.	N
16	Unique transaction identifier (UTI)	Unique identifier that identifies a derivative or position throughout its lifecycle.	N
17	Prior UTI (for one-to-one and one-to-many relations between transactions)	UTI assigned to a derivative before the occurrence of a lifecycle event that resulted in the current derivative.	N
18	Subsequent position UTI	UTI of the position in which a derivative is included.	N
19	Prior USI (for one-to-one and one-to-many relations between transactions)	Unique swap identifier (USI) assigned to a derivative before the occurrence of a lifecycle event that resulted in the current derivative.	N
20	Inter-affiliate indicator	Indicator of whether the derivative is between two affiliated entities.	N

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
21	Submitter identifier	Identifier of the entity submitting derivatives data to the trade repository.	N
22	Platform identifier	Identifier of the trading facility on which the transaction was executed.	Y
23	Platform anonymous execution indicator	Indicator of whether the transaction was executed anonymously on a trading facility.	N
24	Master agreement type	Type of master agreement.	N
25	Master agreement version	Year of the master agreement version.	N
Data Elements Related to Notional Amounts and Quantities			
26	Notional amount	<p>Notional amount for each leg of a derivative:</p> <ul style="list-style-type: none"> • if the derivative is negotiated in a monetary amount, the amount specified in the derivative. • if the derivative is negotiated in a non-monetary amount, convert to a monetary amount. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>See Appendix 3.1 of the CSA Derivatives Data Technical Manual for converting a notional amount negotiated in a non-monetary amount. This text box does not form part of this Instrument and has no official status.</p> </div>	Y
27	Notional currency	For each leg of a derivative, the currency of the notional amount.	Y
28	Call amount	Monetary amount that a person or company has the right to buy under an option.	N
29	Call currency	Currency of the call amount of an option.	N
30	Put amount	Monetary amount that a person or company has the right to sell under an option.	N

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
31	Put currency	Currency of the put amount of an option.	N
32	Notional quantity	For each leg of a derivative negotiated in a non-monetary amount, the fixed notional quantity for each schedule period.	N
33	Quantity frequency	Period for which the quantity is quoted.	N
34	Quantity frequency multiplier	Number of periods of the quantity frequency.	N
35	Quantity unit of measure	For each leg of a derivative, the unit of measure of the total notional quantity and notional quantity.	N
36	Total notional quantity	For each leg of a derivative, the aggregate notional quantity of the underlying interest for the term of the derivative.	N
37	Notional quantity schedule – Unadjusted date on which the associated notional quantity becomes effective	For each notional quantity set out in a schedule, the date (unadjusted for business day convention) on which the notional quantity becomes effective.	N
38	Notional quantity schedule – Unadjusted end date of the notional quantity	For each notional quantity set out in a schedule, the end date (unadjusted for business day convention) of the notional quantity.	N
39	Notional quantity schedule – notional quantity in effect on associated effective date	Each notional quantity, as set out in a schedule, in effect from the date referred to in Data Element Number 37 to the date referred to in Data Element Number 38.	N
40	Notional amount schedule – notional amount in effect on associated effective date	Each notional amount, as set out in a schedule, in effect from the date referred to in Data Element Number 41 to the date referred to in Data Element Number 42.	N
41	Notional amount schedule – unadjusted effective date of the	For each notional amount set out in a schedule, the date (unadjusted for business day convention) on which the notional amount becomes effective.	N

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
	notional amount		
42	Notional amount schedule - unadjusted end date of the notional amount	For each notional amount set out in a schedule, the end date (unadjusted for business day convention) of the notional amount.	N
Data Elements Related to Prices			
43	Exchange rate	Exchange rate between 2 different currencies specified in the derivative.	N
44	Exchange rate basis	Currency pair and order in which the exchange rate is denominated.	N
45	Fixed rate	For each leg of a derivative with periodic payments, the annual rate of the fixed leg.	Y
46	Price	Price specified in the derivative.	Y
47	Price currency	Currency in which the price is denominated.	Y
48	Price notation	Manner in which the price is expressed.	Y
49	Price unit of measure	Unit of measure in which the price is expressed.	N
50	Price schedule - unadjusted effective date of the price	For each price set out in a schedule, the date (unadjusted for business day convention) on which the price becomes effective.	N
51	Price schedule - unadjusted end date of the price	For each price set out in a schedule, the end date (unadjusted for business day convention) of the price.	N
52	Price schedule - price	Each price, as set out in a schedule, in effect from the date referred to in Data Element Number 50 to the date referred to in Data Element Number 51.	N
53	Spread	For each leg of a derivative, the specified spread on the reference price.	Y

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
54	Spread currency	For each leg of a derivative, the currency in which a spread is denominated.	Y
55	Spread notation	For each leg of a derivative, the manner in which a spread is expressed.	Y
56	Strike price	For a derivative that is an option, the price at which the owner of the option can buy or sell the underlying interest of the option.	Y
57	Strike price currency/currency pair	Currency, or the currency pair and order, in which the strike price is denominated.	N
58	Strike price notation	Manner in which the strike price is expressed.	Y
59	Unadjusted effective date of the price	Effective date (unadjusted for business day convention) of the price.	N
60	Unadjusted end date of the price	End date (unadjusted for business day convention) of the price.	N
61	Price in effect between the unadjusted effective and end dates	Price in effect from the date referred to in Data Element Number 59 to the date referred to in Data Element Number 60.	N
62	Effective date of the strike price	Effective date (unadjusted for business day convention) of the strike price.	N
63	End date of the strike price	End date (unadjusted for business day convention) of the strike price.	N
64	Strike price in effect on associated effective date	Strike price in effect from the date referred to in Data Element Number 62 to the date referred to in Data Element Number 63.	N
65	Strike price schedule – Unadjusted effective date of the strike price	For each strike price set out in a schedule, the date (unadjusted for business day convention) on which the strike price becomes effective.	N

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
66	Strike price schedule – Unadjusted end date of the strike price	For each strike price set out in a schedule, the end date (unadjusted for business day convention) of the strike price.	N
67	Strike price schedule - strike price	Each strike price, as set out in a schedule, in effect from the date referred to in Data Element Number 65 to the date referred to in Data Element Number 66.	N
68	Non-standardized term indicator	Indicator of whether a derivative has one or more additional provisions that materially affect the price of the derivative and that have not been disclosed to the public.	Y
69	Day count convention	For each leg of a derivative, the day count convention used to determine how interest payments are calculated.	Y
70	Floating rate reset frequency period	For each floating leg of a derivative, the period of the frequency of resets.	Y
71	Floating rate reset frequency period multiplier	For each floating leg of a derivative, the number by which the floating rate reset frequency period is multiplied to determine the frequency of periodic payment dates in respect of a reset.	Y
Data Elements Related to Clearing			
72	Cleared	Indicator of whether a derivative has been cleared, or is intended to be cleared, by a clearing agency.	Y
73	Central counterparty identifier	Identifier of the clearing agency that cleared the derivative.	N
74	Clearing account origin	Indicator of whether the clearing member acts as principal or agent.	N
75	Clearing member identifier	Identifier of the clearing member through which a derivative is cleared by a clearing agency.	N

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
76	Clearing receipt timestamp	Date and time, expressed using Coordinated Universal Time, that the original derivative was recorded as being received by the clearing agency for clearing.	N
77	Clearing exceptions and exemptions - Counterparty 1	Type of exemption from or exception to a mandatory clearing requirement applicable to Counterparty 1.	N
78	Clearing exceptions and exemptions – Counterparty 2	Type of exemption from or exception to a mandatory clearing requirement applicable to Counterparty 2.	N
Data Elements Related to Collateral and Margin			
79	Collateralisation category	Indicator of whether there is an agreement in respect of collateral between the counterparties and the nature of the collateralisation.	N
80	Portfolio containing non-reportable component indicator	If collateral is reported on a portfolio basis, indicator of whether the portfolio includes derivatives exempted or excepted from reporting.	N
81	Initial margin posted by the reporting counterparty (pre-haircut)	Monetary value of the initial margin posted by the reporting counterparty before a haircut is applied.	N
82	Initial margin posted by the reporting counterparty (post-haircut)	Monetary value of the initial margin posted by the reporting counterparty after a haircut is applied.	N
83	Currency of initial margin posted	Currency in which the initial margin posted is denominated.	N
84	Initial margin collected by the reporting counterparty (pre-haircut)	Monetary value of the initial margin collected by the reporting counterparty before a haircut is applied.	N
85	Initial margin collected by the reporting counterparty (post-haircut)	Monetary value of the initial margin collected by the reporting counterparty after a haircut is applied.	N

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
86	Currency of initial margin collected	Currency in which the initial margin collected is denominated.	N
87	Variation margin posted by the reporting counterparty (pre-haircut)	Monetary value of the variation margin posted by the reporting counterparty before a haircut is applied.	N
88	Variation margin posted by the reporting counterparty (post-haircut)	Monetary value of the variation margin posted by the reporting counterparty after a haircut is applied.	N
89	Currency of variation margin posted	Currency in which the variation margin posted is denominated.	N
90	Variation margin collected by the reporting counterparty (pre-haircut)	Monetary value of the variation margin collected by the reporting counterparty before a haircut is applied.	N
91	Variation margin collected by the reporting counterparty (post-haircut)	Monetary value of the variation margin collected by the reporting counterparty after a haircut is applied.	N
92	Currency of variation margin collected	Currency in which the variation margin collected is denominated.	N
93	Variation margin collateral portfolio code	If collateral is reported on a portfolio basis, a unique code assigned by the reporting counterparty that identifies the variation margin related to the open transactions that are included in the portfolio.	N
94	Initial margin collateral portfolio code	If collateral is reported on a portfolio basis, a unique code assigned by the reporting counterparty that identifies the initial margin related to the open transactions that are included in the portfolio.	N
Data Elements Related to Actions and Events			
95	Event timestamp	Date and time of occurrence of an event relating to a derivative.	Y

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
96	Level	Indicator of whether the report is in respect of a derivative or a position.	N
97	Event identifier	Unique identifier that links derivatives relating to an event.	N
98	Action type	Indicator of the type of action or reporting relating to the derivative or position.	Y
99	Event type	Indicator of the type of lifecycle event or reason for the action referred to in Data Element Number 98.	Y
100	Amendment indicator	Indicator of whether an amendment to the derivative relates to an event.	Y
Data Elements Related to Valuation			
101	Valuation amount	Value of the derivative.	N
102	Valuation currency	Currency in which the valuation amount is denominated.	N
103	Valuation method	Source and method used to value the derivative.	N
104	Valuation timestamp	Date and time that the value of the derivative referred to in Data Element Number 101 was determined.	N
105	Next floating reference reset date	Next date on which the floating reference will reset.	N
106	Last floating reference value	Value of the floating reference on the date referred to in Data Element Number 107.	N
107	Last floating reference reset date	Most recent date of the floating reference reset.	N
108	Delta	Ratio of the change in the price of the derivative to the change in the price of the underlying interest of the derivative.	N

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
Data Elements Related to Packages			
109	Package indicator	Indicator of whether the derivative is a component of a package if: (a) 2 or more derivatives that are reported separately by the reporting counterparty are entered into under a single agreement, or (b) 2 or more reports relate to the same derivative and the derivative cannot be reported using a single report as a result of the reporting requirements of one or more jurisdictions of Canada or one or more foreign jurisdictions.	Y
110	Package identifier	Identifier of the package referred to in Data Element Number 109.	N
111	Package transaction price	Price of the package referred to in Data Element Number 109.	N
112	Package transaction price currency	Currency in which the package transaction price is denominated.	N
113	Package transaction spread	Price of the package referred to in Data Element Number 109, expressed as a spread.	N
114	Package transaction spread currency	Currency in which the package transaction spread is denominated.	N
115	Package transaction spread notation	Manner in which the package transaction spread is expressed.	N
116	Package transaction price notation	Manner in which the package transaction price is expressed.	N
Data Elements Related to Product			
117	Unique product identifier	Identifier of a unique code assigned by the Derivatives Service Bureau for a type of derivative.	Y

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
118	CDS index attachment point	Point at which the level of losses in the underlying portfolio of a credit default swap reduces the notional of a tranche.	N
119	CDS index detachment point	Point beyond which losses in the underlying portfolio of a credit default swap no longer reduce the notional of a tranche.	N
120	Index factor	Factor of the index version, or the percentage, used to determine the notional amount of a credit default swap.	Y
121	Crypto asset underlying indicator	Indicator of whether the underlying interest of the derivative is a crypto asset.	N
122	Custom basket code	Unique identifier for a custom basket of reference assets.	N
123	Custom basket indicator	Indicator of whether the derivative has a custom basket as its underlying interest.	Y
124	Basket constituent identifier	Identifier of a reference asset in the custom basket.	N
125	Basket constituent identifier source	Source of the basket constituent identifier referred to in Data Element Number 124.	N
126	Basket constituent number of units	Number of units of each reference asset in the custom basket.	N
127	Basket constituent unit of measure	Unit of measure in which the number of units referred to in Data Element Number 126 is expressed.	N
128	Underlier ID (Other)	Identifier of each underlying interest of the derivative.	N
129	Underlier ID (Other) source	Source of the Underlier ID (Other) referred to in Data Element Number 128.	N

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
130	Underlying asset trading platform identifier	Identifier of the platform on which the underlying interest referred to in Data Element Number 128 is traded.	N
131	Underlying asset price source	Source of the price used to determine the value or level of the underlying interest referred to in Data Element Number 128.	N
132	Embedded option type	Type of optional provision in a derivative.	Y
Data Elements Related to Payments and Settlement			
133	Final contractual settlement date	Date in the agreement by which all obligations under the derivative are to be satisfied.	N
134	Settlement location	Place of settlement of the derivative.	N
135	Settlement currency	For each leg of the derivative, the currency in which the cash settlement is denominated.	Y
136	Other payment amount	Amount of each payment under the derivative except an option premium amount under Data Element Number 144.	Y
137	Other payment currency	Currency in which the other payment amount referred to in Data Element Number 136 is denominated.	Y
138	Other payment date	Date on which the other payment amount referred to in Data Element Number 136 is to be paid.	N
139	Other payment payer	Identifier of the payer of the other payment amount referred to in Data Element Number 136.	N
140	Other payment receiver	Identifier of the receiver of the other payment amount referred to in Data Element Number 136.	N
141	Other payment type	Reason for the payment referred to in Data Element Number 136.	Y

Data Element Number	Data Element Name	Data Element Description	Made Available to the Public
142	Payment frequency period	For each leg of a derivative, the unit of time of the frequency of payments.	Y
143	Payment frequency period multiplier	For each leg of a derivative, the number by which the payment frequency period is multiplied to determine the frequency of periodic payment dates.	Y
144	Option premium amount	Premium paid by a buyer of an option or swaption.	Y
145	Option premium currency	Currency in which the premium referred to in Data Element Number 144 is denominated.	Y
146	Option premium payment date	Date on which the premium referred to in Data Element Number 144 is paid.	N
147	First exercise date	First date on which an option can be exercised.	Y
148	Fixing date	For each leg of a derivative, the date on which the reference rate is determined.	N

39. *Appendix B is replaced with the following:*

APPENDIX B

to

RULE 96-101

DERIVATIVES: TRADE REPORTING

Equivalent Trade Reporting Laws of Foreign Jurisdictions Subject to Deemed Compliance Under Subparagraph 26(3)(b)(v) of the Instrument

The regulators and securities regulatory authorities have determined that the laws and regulations opposite the following jurisdictions are trade reporting laws for the purposes of subparagraph 26(3)(b)(v).

Jurisdiction	Law, Regulation and/or Instrument
European Union	<p>Regulation (EU) 648/2012 of the European Parliament and Council of 4 July 2012 on OTC derivatives, central counterparties and trade repositories</p> <p>Commission Delegated Regulation (EU) 2017/979 of 2 March 2017 amending Regulation (EU) No 648/2012 of the European Parliament and of the Council on OTC derivatives, central counterparties and trade repositories with regard to the list of exempted entities</p> <p>Commission Delegated Regulation (EU) 2019/460 of 30 January 2019 amending Regulation (EU) No 648/2012 of the European Parliament and of the Council with regard to the list of exempted entities</p> <p>Regulation (EU) 2019/834 of the European Parliament and of the Council of 20 May 2019 amending Regulation (EU) No 648/2012 as regards the clearing obligation, the suspension of the clearing obligation, the reporting requirements, the risk-mitigation techniques for OTC derivative contracts not cleared by a central counterparty, the registration and supervision of trade repositories and the requirements for trade repositories</p> <p>Commission Delegated Regulation (EU) No 148/2013 of 19 December 2012 supplementing Regulation (EU) No 648/2012 of the European Parliament and of the Council on OTC derivatives, central counterparties and trade repositories with regard to regulatory technical standards on the minimum details of the data to be reported to trade repositories</p> <p>Commission Delegated Regulation (EU) 2017/104 of 19 October 2016 amending Delegated Regulation (EU) No 148/2013 supplementing Regulation (EU) No 648/2012 of the European Parliament and of the Council on OTC derivatives, central counterparties and trade repositories with regard to regulatory technical standards on the minimum details of the data to be reported to trade repositories</p> <p>Commission Delegated Regulation (EU) No 151/2013 of 19 December 2012 supplementing Regulation (EU) No 648/2012 of the European Parliament and of the Council on OTC derivatives, central counterparties and trade repositories, with regard to regulatory technical standards specifying the data to be published and made available by trade repositories and</p>

Jurisdiction	Law, Regulation and/or Instrument
	<p>operational standards for aggregating, comparing and accessing the data</p> <p>Commission Delegated Regulation (EU) 2017/1800 of 29 June 2017 amending Delegated Regulation (EU) No 151/2013 supplementing Regulation (EU) No 648/2012 of the European Parliament and of the Council</p> <p>Commission Delegated Regulation (EU) 2019/361 of 13 December 2018 amending Delegated Regulation (EU) No 151/2013 with regard to access to the data held in trade repositories</p> <p>Commission Implementing Regulation (EU) No 1247/2012 of 19 December 2012 laying down implementing technical standards with regard to the format and frequency of trade reports to trade repositories according to Regulation (EU) No 648/2012 of the European Parliament and of the Council on OTC derivatives, central counterparties and trade repositories</p> <p>Commission Implementing Regulation (EU) 2017/105 of 19 October 2016 amending Implementing Regulation (EU) No 1247/2012 laying down implementing technical standards with regard to the format and frequency of trade reports to trade repositories according to Regulation (EU) No 648/2012 of the European Parliament and of the Council on OTC derivatives, central counterparties and trade repositories</p> <p>Commission Implementing Regulation (EU) 2019/363 of 13 December 2018 laying down implementing technical standards with regard to the format and frequency of reports on the details of securities financing transactions (SFTs) to trade repositories in accordance with Regulation (EU) 2015/2365 of the European Parliament and of the Council and amending Commission Implementing Regulation (EU) No 1247/2012 with regard to the use of reporting codes in the reporting of derivative contracts</p>
<p>United Kingdom of Great Britain and Northern Ireland</p>	<p>The Over the Counter Derivatives, Central Counterparties and Trade Repositories (Amendment, etc., and Transitional Provision) (EU Exit) Regulations 2019</p> <p>The Over the Counter Derivatives, Central Counterparties and Trade Repositories (Amendment, etc., and Transitional Provision) (EU Exit) (No. 2) Regulations 2019</p>

Jurisdiction	Law, Regulation and/or Instrument
	<p>The Over the Counter Derivatives, Central Counterparties and Trade Repositories (Amendment, etc., and Transitional Provision) (EU Exit) Regulations 2020</p> <p>The Trade Repositories (Amendment and Transitional Provision) (EU Exit) Regulations 2018</p> <p>The Technical Standards (European Market Infrastructure Regulation) (EU Exit) (No 1) Instrument 2019</p> <p>The Technical Standards (European Market Infrastructure Regulation) (EU Exit) (No 2) Instrument 2019</p> <p>The Technical Standards (European Market Infrastructure Regulation) (EU Exit) (No 3) Instrument 2019</p> <p>The Technical Standards (European Market Infrastructure Regulation) (EU Exit) (No 4) Instrument 2019</p> <p>The Technical Standards (Miscellaneous Amendments) (EU Exit) Instrument 2020</p>
United States of America	<p>CFTC Real-Time Public Reporting of Swap Transaction Data, 17 C.F.R. Part 43</p> <p>CFTC Swap Data Recordkeeping and Reporting Requirements, 17 C.F.R. Part 45</p> <p>CFTC Swap Data Recordkeeping and Reporting Requirements: Pre-Enactment and Transition Swaps, 17 C.F.R. Part 46</p>

40. Appendix C is amended

(a) in the title, by replacing “TRADE REPOSITORIES AND DERIVATIVES DATA REPORTING” with “DERIVATIVES:TRADE REPORTING”.

(b) by deleting “Instructions:”,

(c) by repealing and replacing section 1 with the following:

1. Subject to items 2 through 6, a recognized trade repository must make available to the public, at no cost, for each data element set out in Appendix A opposite a “Y” in the “Made Available to the Public” column of that appendix, the data elements contained in Table 1 for a derivative in any of the asset classes and underlying asset identifiers listed in Table 2 for all of the following:

- (a) each derivative reported to the recognized trade repository under this Instrument;
- (b) each lifecycle event that changes the pricing of an existing derivative reported to the recognized trade repository under this Instrument;
- (c) each cancellation of a reported transaction or a correction of data relating to a transaction that was previously made available to the public, in each case resulting in a derivative referred to in paragraph (a) or a lifecycle event referred to in paragraph (b),

(d) by repealing and replacing Table 1 with the following:

Table 1

#	Data Element Name	Data Element Description	Data Element Format	Data Element Allowable Values
D1	Dissemination identifier	Unique and random identifier assigned by a recognized trade repository for each data message made available to the public.	Varchar(52)	Up to 52 alphanumeric characters
D2	Original dissemination identifier	<p>For the following action types reported to the recognized trade repository under Data Element Number 98 of Appendix A, the Dissemination identifier assigned under Data Element Number D1:</p> <ul style="list-style-type: none"> (a) Correct; (b) Terminate; (c) Error; (d) Revive; (e) Modify, if the Amendment indicator in Data Element Number 100 of Appendix A is reported to the recognized trade repository as True. 	Varchar(52)	Up to 52 alphanumeric characters
D3	Dissemination timestamp	Date and time, to the nearest second, that a recognized trade repository makes data available to the public.	YYYY-MM-DDThh:mm:ssZ, based on Coordinated Universal Time	Any valid date/time based on ISO 8601 Date and time format.
D4	Unique product identifier short name	A humanly readable description made available by the Derivatives Service Bureau corresponding to the unique product identifier.	A list of allowable values and their format will be published by the Derivatives Service Bureau.	

- (e) *in section 4, by replacing “maturity date less execution time stamp date” with “expiration date less effective date”,*
- (f) *in section 6, by replacing “the” before “recognized trade repository” with “a”, and replacing “transaction” before the period with “derivative”,*
- (g) *in Table 4, by replacing the heading in column 2 “Maturity Date less Effective Date” with “Expiration Date less Effective Date”,*
- (h) *in section 7, by replacing “contained in Table 1” with “referred to in item 1”, and replacing “in the execution timestamp field” with “for Data Element Number 14 of Appendix A”, and*
- (i) *by adding the following section:*

8. If it is not technologically practicable to make the required information available to the public 48 hours after the time reported for Data Element Number 14 of Appendix A for the derivative due to periods of downtime required for operational maintenance, system upgrades, system repairs, disaster recovery exercises or any other exercises related to operating the recognized trade repository in accordance with this Instrument and its recognition order, the recognized trade repository must make the information available to the public as soon as technologically practicable following the conclusion of the period of downtime..

41. *Form 96-101F1 Application for Recognition – Trade Repository Information Statement is amended in Exhibit E – Operations of the Trade Repository, section (7), by replacing “accurately, completely” with “without error or omission”.*

42. *Form 96-101F2 Trade Repository Submission to Jurisdiction and Appointment of Agent for Service of Process is amended by replacing the signature lines for the Agent – Consent to Act as Agent for Service with the following:*

Signature of the Agent

Print name of person signing and, if Agent is not an individual, the title of the person.

43. This Instrument comes into force on July 25, 2025.

This Annex sets out a clean version of changes to Companion Policy 96-101 to Multilateral Instrument 96-101 *Trade Repositories and Derivatives Data Reporting*. Because of the extent of the changes, the entire Companion Policy has been replaced.

APPENDIX A to Companion Policy 96-101 <i>Derivatives: Trade Reporting</i> – CSA Derivatives Data Technical Manual	

GENERAL COMMENTS

Introduction

This companion policy (the “Policy”) provides guidance on how those members (“participating jurisdictions” or “we”) of the Canadian Securities Administrators participating in Multilateral Instrument 96-101 *Derivatives: Trade Reporting* (the “Instrument”) interpret various matters in the Instrument.

Except for Part 1, the numbering and headings of Parts, sections and subsections in this Policy correspond to the numbering and headings in the Instrument. Any general guidance for a Part or section appears immediately after the Part or section name. Any specific guidance on a section or subsection follows any general guidance. If there is no guidance for a Part or section, the numbering in this Policy will skip to the next provision that does have guidance.

Unless defined in the Instrument or this Policy, terms used in the Instrument and in this Policy have the meaning given to them in securities legislation, including in National Instrument 14-101 *Definitions*.

Definitions and interpretation of terms in this Policy

1. In this Policy

“cleared derivative” means a derivative that is created under the rules of a reporting clearing agency and to which the reporting clearing agency is a counterparty, including any derivative resulting from a novation of an original derivative upon acceptance of the original derivative for clearing;

“CPMI” means the Committee on Payments and Market Infrastructures;¹

“derivatives party”² means, in relation to a derivatives dealer, any of the following:

- (a) a person or company for which the derivatives dealer acts or proposes to act as an agent in relation to a transaction;
- (b) a person or company that is, or is proposed to be, a party to a derivative if the derivatives dealer is the counterparty;

“FMI” means a financial market infrastructure, as described in the PFMI Report;

“IOSCO” means the Technical Committee of the International Organization of Securities Commissions;

¹ Prior to September 1, 2014, CPMI was known as the Committee on Payment and Settlement Systems (CPSS).

² The term “derivatives party” is similar to the concept of a “client” in National Instrument 31-103 *Registration Requirements, Exemptions and Ongoing Registration Obligations (NI 31-103)*. We have used the term “derivatives party” instead of “client” to reflect the circumstance where a derivatives dealer may not regard its counterparty as its “client.”

“ISDA methodology” means the methodology described in the Canadian Transaction Reporting Party Requirements issued by the International Swaps and Derivatives Association, Inc. and dated April 4, 2014;

“LEI” means a legal entity identifier;

“PFMI Report” means the April 2012 final report entitled *Principles for financial market infrastructures* published by CPMI and IOSCO, as amended from time to time;³

“principle” means, unless the context otherwise indicates, a principle set out in the PFMI Report;

“ROC” means the Legal Entity Identifier System Regulatory Oversight Committee;

“uncleared derivative” means a derivative that is not a cleared derivative, and includes both (i) an original derivative, and (ii) a derivative that is not intended to be cleared (for example, under the terms of an ISDA Master Agreement);

“UPI” means a unique product identifier.

PART 1 DEFINITIONS AND INTERPRETATION

Interpretation of terms defined in the Instrument

1.(1) The definition of “asset class” in the Instrument is not exclusive. Some types of derivatives may fall into more than one asset class.

The definitions of “collateral and margin data”, “creation data” and “valuation data” refer to data elements listed in Appendix A to the Instrument. The CSA Derivatives Data Technical Manual, attached as Appendix A to this Policy, provides additional guidance relating to the data elements listed in Appendix A of the Instrument. This detailed guidance clarifies the technical aspects of data that should be included in “collateral and margin data”, “creation data” and “valuation data”.

A person or company that meets the definition of “derivatives dealer” in a local jurisdiction is subject to the obligations of a derivatives dealer under the Instrument, whether or not it is registered or exempted from the requirement to be registered in that jurisdiction.

A person or company will be subject to the obligations of a derivatives dealer under the Instrument if it is either of the following:

- in the business of trading derivatives;
- otherwise required to register as a derivatives dealer under securities legislation.

³ The PFMI Report is available on the Bank for International Settlements’ website (www.bis.org) and the IOSCO website (www.iosco.org).

Factors in determining a business purpose – derivatives dealer

In determining whether a person or company is in the business of trading derivatives, a number of factors should be considered. Several factors that we consider relevant are described below. This is not a complete list and other factors may also be considered.

- *Acting as a market maker* – Market making is generally understood as the practice of routinely standing ready to transact derivatives by
 - responding to requests for quotes on derivatives, or
 - making quotes available to other persons or companies that seek to transact derivatives, whether to hedge a risk or to speculate on changes in the market value of the derivative.

Market makers are typically compensated for providing liquidity through spreads, fees or other compensation, including fees or compensation paid by an exchange or a trading facility that do not relate to the change in the market value of the derivative transacted. A person or company that contacts another person or company about a transaction to accommodate its own risk management needs or to speculate on the market value of a derivative will not, typically, be considered to be acting as a market maker.

A person or company will be considered to be “routinely standing ready” to transact derivatives if it is responding to requests for quotes or it is making quotes available with some frequency, even if it is not on a continuous basis. Persons or companies that respond to requests or make quotes available occasionally are not “routinely standing ready”.

A person or company would also typically be considered to be a market maker when it holds itself out as undertaking the activities of a market maker.

Engaging in bilateral discussions relating to the terms of a transaction will not, on its own, constitute market making activity.

- *Directly or indirectly carrying on the activity with repetition, regularity or continuity* – Frequent or regular transactions are a common indicator that a person or company may be engaged in trading for a business purpose. The activity does not have to be its sole or even primary endeavour for it to be in the business. We consider regularly trading in any way that produces, or is intended to produce, profits to be for a business purpose.
- *Facilitating or intermediating transactions* – The person or company provides services relating to the facilitation of trading or intermediation of transactions between third-party counterparties to derivatives contracts.
- *Transacting with the intention of being compensated* – The person or company receives, or expects to receive, any form of compensation for carrying on transaction activity. This would include any compensation that is transaction or value-based including compensation from spreads or built-in fees. It does not matter if the person or company actually receives compensation or what form the compensation takes. However, a person or company would not be considered to be a derivatives dealer solely by reason that it realizes a profit from

changes in the market price for the derivative (or its underlying reference asset), regardless of whether the derivative is intended for the purpose of hedging or speculating.

- *Directly or indirectly soliciting in relation to transactions* – The person or company directly solicits transactions. Solicitation includes contacting someone by any means, including communication that offers (i) transactions, (ii) participation in transactions or (iii) services relating to transactions. This would include providing quotes to derivatives parties or potential derivatives parties that are not provided in response to a request. This also includes advertising on the internet with the intention of encouraging transacting in derivatives by local persons or companies. A person or company might not be considered to be soliciting solely because it contacts a potential counterparty, or a potential counterparty contacts them to inquire about a transaction, unless it is the person or company's intention or expectation to be compensated as a result of the contact. For example, a person or company that wishes to hedge a specific risk is not necessarily soliciting for the purpose of the Instrument if it contacts multiple potential counterparties to inquire about potential transactions to hedge the risk.
- *Engaging in activities similar to a derivatives dealer* – The person or company carries out any activities related to transactions involving derivatives that would reasonably appear, to a third party, to be similar to the activities discussed above. This would not include the operator of an exchange or a clearing agency.
- *Providing derivatives clearing services* – The person or company provides services to allow third parties, including counterparties to transactions involving the person or company, to clear derivatives through a clearing agency. These services are actions in furtherance of a trade conducted by a person or company that would typically play the role of an intermediary in the derivatives market.

In determining whether or not it is a derivatives dealer for purposes of the Instrument, a person or company should consider its activities holistically. Assessment of the factors discussed above may depend on a person or company's particular facts and circumstances. We do not consider that all of the factors discussed above necessarily carry the same weight or that any one factor will be determinative.

Factors in determining a business purpose – general

Generally, we would consider a person or company that engages in the activities discussed above in an organized and repetitive manner to be a derivatives dealer. Ad hoc or isolated instances of the activities discussed above may not necessarily result in a person or company being a derivatives dealer. Similarly, organized and repetitive proprietary trading, in and of itself, absent other factors described above, may not result in a person or company being considered to be a derivatives dealer for the purposes of the Instrument.

A person or company does not need to have a physical location, staff or other presence in the local jurisdiction to be a derivatives dealer in that jurisdiction. A derivatives dealer in a local jurisdiction is a person or company that conducts the described activities in that jurisdiction. For example, this

would include a person or company that is located in a local jurisdiction and that conducts dealing activities in that local jurisdiction or in a foreign jurisdiction. This would also include a person or company located in a foreign jurisdiction that conducts dealing activities with a derivatives party located in the local jurisdiction.

Where dealing activities are provided to derivatives parties in a local jurisdiction or where dealing activities are otherwise conducted within a local jurisdiction, regardless of the location of the derivatives party, we would generally consider a person or company to be a derivatives dealer.

A “lifecycle event” is defined in the Instrument as an event that results in a change to derivatives data previously reported to a recognized trade repository. Examples of a lifecycle event include:

- a change to the termination date for the derivative;
- a change in the cash flows, payment frequency, currency, numbering convention, spread, benchmark, reference entity or rates originally reported;
- the availability of a LEI for a counterparty previously identified by some other identifier;
- a corporate action affecting a security or securities on which the derivative is based (e.g., a merger, dividend, stock split, or bankruptcy);
- a change to the notional amount of a derivative, including contractually agreed-upon changes (e.g., amortization schedule);
- the exercise of a right or option that is an element of the derivative;
- the satisfaction of a level, event, barrier or other condition contained in the derivative.

When reporting a lifecycle event under section 32 of the Instrument, there is no obligation to re-report derivatives data that has not changed; only new data and changes to previously reported data need to be reported.

The definition of “local counterparty” includes a number of factors that are different from the addresses under a counterparty’s LEI. As a result, using the address information in a counterparty’s LEI is not an acceptable substitute for determining whether the counterparty is a local counterparty in a jurisdiction.

For purposes of the requirements under the Instrument applicable to a local counterparty, paragraph (a) of the definition of “local counterparty” does not include an individual resident in the local jurisdiction. However, reporting counterparties are required to report derivatives involving such an individual and to identify the country and province or territory of an individual in Data Element Number 9 specified in Appendix A to the Instrument, whether or not such individual has an LEI.

We use the term “transaction” in the Instrument instead of the statutorily defined term “trade”. The term “transaction” reflects that certain types of activities or events relating to a derivative, whether or not they constitute a “trade”, must be reported as a unique derivative. The primary differences between the two definitions are that (i) the term “trade” as defined in securities legislation includes material amendments and terminations, whereas “transaction” as defined in the Instrument does not, and (ii) the term “transaction” as defined in the Instrument includes a novation to a clearing agency, whereas “trade” as defined in securities legislation does not.

A material amendment to a derivative is not a “transaction” and is required to be reported as a lifecycle event in connection with an existing derivative under section 32. Similarly, a termination is not a “transaction”, as the expiry or termination of a derivative is required to be reported as a lifecycle event under section 32.

In addition, the definition of “transaction” in the Instrument includes a novation to a clearing agency. Each derivative resulting from the novation of a bilateral derivative to a clearing agency is required to be reported as a distinct derivative with reporting links to the original derivative.

PART 2 TRADE REPOSITORY RECOGNITION AND ONGOING REQUIREMENTS

Part 2 sets out rules relating to the recognition of a trade repository by the local securities regulatory authority and establishes ongoing requirements for a recognized trade repository. To obtain and maintain recognition as a trade repository, a person or company must comply with these requirements and the terms and conditions in the recognition order made by the securities regulatory authority.

In order to comply with the reporting obligations contained in Part 3, a reporting counterparty to a derivative involving a local counterparty must report the derivative to a recognized trade repository. In some jurisdictions, securities legislation prohibits a person or company from carrying on business as a trade repository in the jurisdiction unless recognized as a trade repository by the securities regulatory authority.

The legal entity that applies to be a recognized trade repository will typically be the entity that operates the repository and collects and maintains records of derivatives data reported to the trade repository by other persons or companies. In some cases, the applicant may operate more than one trade repository. In such cases, the applicant may file separate forms in respect of each trade repository, or it may choose to file one form to cover all of its different trade repositories. If the latter alternative is chosen, the applicant must clearly identify the repository to which the information or any changes submitted under this Part 2 apply.

Filing of initial information on application for recognition as a trade repository

2. In determining whether to recognize an applicant as a trade repository under securities legislation, we will consider a number of factors, including the following:

- whether it is in the public interest to recognize the trade repository;
- the manner in which the trade repository proposes to comply with the Instrument;
- whether the trade repository has meaningful representation, as described in subsection 9(2), on its board of directors;
- whether the trade repository has sufficient financial and operational resources for the proper performance of its functions;
- whether the rules and procedures of the trade repository are reasonably designed to ensure that its business is conducted in an orderly manner that fosters fair, efficient and competitive capital markets, and improves transparency in the derivatives market;
- whether the trade repository has policies and procedures to effectively identify and manage conflicts of interest arising from its operation or the services it provides;
- whether the requirements of the trade repository relating to access to its services are fair and reasonable;
- whether the trade repository's process for setting fees is fair, transparent and appropriate;
- whether the trade repository's fees are inequitably allocated among the participants, have the effect of creating barriers to access, or place an undue burden on any participant or class of participants;
- the manner and process for the securities regulatory authority and other applicable regulatory agencies to receive or access derivatives data, including the timing, type of reports, and any confidentiality restrictions;
- whether the trade repository has robust and comprehensive policies, procedures, processes and systems reasonably designed to ensure the security and confidentiality of derivatives data;
- with respect to a trade repository that is not resident in the local jurisdiction, whether the securities regulatory authority in the local jurisdiction has entered into a memorandum of understanding with the relevant regulatory authority in the trade repository's jurisdiction;
- whether the trade repository has been, or will be, in compliance with securities legislation, including compliance with the Instrument and any terms and conditions attached to the recognition order in respect of the trade repository.

A trade repository that is applying for recognition must demonstrate that it has established, implemented, maintained and enforced appropriate written rules, policies and procedures that are in accordance with standards applicable to trade repositories. In assessing these rules, policies and procedures, we will consider, among other things, the principles, key considerations and

explanatory notes applicable to trade repositories in the PFMI Report. The applicable principles, which have been incorporated into the Instrument and the interpretation of which should be consistent with the PFMI Report, are set out in the following chart, along with the corresponding sections of the Instrument.

Principle in the PFMI Report applicable to a trade repository	Relevant section(s) of the Instrument
Principle 1: Legal basis	Section 7 – Legal framework Section 17 – Rules, policies, and procedures (in part)
Principle 2: Governance	Section 8 – Governance Section 9 – Board of directors Section 10 – Management
Principle 3: Framework for the comprehensive management of risks	Section 19 – Comprehensive risk-management framework Section 20 – General business risk (in part)
Principle 15: General business risk	Section 20 – General business risk
Principle 17: Operational risk	Section 21 – System and other operational risks requirements Section 22 – Data security and confidentiality Section 24 – Outsourcing
Principle 18: Access and participation requirements	Section 13 – Access to recognized trade repository services Section 16 – Due process (in part) Section 17 – Rules, policies and procedures (in part)
Principle 19: Tiered participation arrangements	Section 7 – Legal framework Section 19 – Comprehensive risk management framework Section 21 – System and other operational risks
Principle 20: FMI links	Section 7 – Legal framework Section 19 – Comprehensive risk management framework Section 21 – System and other operational risks Section 24 - Outsourcing
Principle 21: Efficiency and effectiveness	Section 7 – Legal framework Section 8 – Governance Section 11 – Chief compliance officer Section 12 – Fees Section 21 – System and other operational risks

Principle 22: Communication procedures and standards	Section 15 – Communication policies, procedures and standards
Principle 23: Disclosure of rules, key procedures, and market data	Section 17 – Rules, policies and procedures (in part)
Principle 24: Disclosure of market data by trade repositories	Sections in Part 4 – Data Dissemination and Access to Data

The regulator in each local jurisdiction will apply the principles in conducting its oversight activities of a recognized trade repository. Therefore, we expect that a recognized trade repository will observe the principles in complying with the Instrument.

Information included in the forms filed by an applicant or recognized trade repository under the Instrument will be kept confidential in accordance with the provisions of the securities legislation of the local jurisdiction, to the extent this content contains proprietary financial, commercial and/or technical information. We are of the view that the cost and potential risks to the filers of disclosure of such information may outweigh the benefit of the principle requiring that forms be made available for public inspection. However, we would expect a recognized trade repository to publicly disclose its responses to the CPMI-IOSCO consultative report entitled *Disclosure framework for financial market infrastructures*,⁴ which is a supplement to the PFMI Report. Other information included in the filed forms will be required to be made publicly available by a recognized trade repository in accordance with the Instrument or the terms and conditions of the recognition order imposed by a securities regulatory authority.

Although we will generally keep confidential the information contained in a filed Form 96-101F1 *Application for Recognition – Trade Repository Information Statement* and any amendments to such information, if a regulator or securities regulatory authority considers that it is in the public interest to do so, it may require the applicant or recognized trade repository to publicly disclose a summary of the information contained in the form or in any amendments thereto.

Notwithstanding the confidential nature of the forms, each application (excluding forms) will be published for comment for a minimum period of 30 days.

(2) A person or company applying for recognition as a trade repository whose head office or principal place of business is located in a foreign jurisdiction will typically be required to provide additional information to allow us to evaluate its application, including

- an undertaking to provide the regulator or securities regulatory authority with access to its books and records and to submit to onsite inspection and examination by the regulator or securities regulatory authority, and
- an opinion of legal counsel addressed to the regulator or securities regulatory authority that the person or company has the power and authority to provide the regulator or securities regulatory authority with access to the person or company's books and records, and to

⁴ Publication available on the BIS website (www.bis.org) and the IOSCO website (www.iosco.org).

submit to onsite inspection and examination by the regulator or securities regulatory authority.

Change in information by a recognized trade repository

3. A participating jurisdiction with which an amendment to the information provided in Form 96-101F1 *Application for Recognition – Trade Repository Information Statement* is filed will endeavour to review such amendment in accordance with subsections 3(1) and 3(2) before the proposed implementation date for the change. However, where the changes are complex, raise regulatory concerns, or when additional information is required, this review may exceed these timeframes.

Significant changes

(1) We would consider a change to be significant when it could significantly impact a recognized trade repository, its systems, its users, participants, market participants, or the capital markets (including derivatives markets and the markets for assets underlying a derivative). A change may significantly impact a recognized trade repository if it is likely to give rise to potential conflicts of interest, to limit access to its services, to make changes to its structure with direct impact to users, to affect regulators' access to data, or to result in additional costs.

We would generally consider a significant change to include, but not be limited to, the following:

- a change in the structure of the recognized trade repository, including procedures governing how derivatives data is collected and maintained (including in any back-up sites), that has or may have a direct and significant impact on users in a local jurisdiction;
- a change to the services provided by the recognized trade repository, or a change that affects the services provided, including the hours of operation, that has or may have a direct and significant impact on users in a local jurisdiction;
- a change to means of access to the recognized trade repository's facility and its services, including changes to data formats or protocols, that has or may have a direct and significant impact on users in a local jurisdiction;
- a change to the types of derivative asset classes or categories of derivatives that may be reported to the recognized trade repository;
- a change to the systems and technology used by the recognized trade repository that collect, maintain and disseminate derivatives data, including matters affecting capacity;
- a change to the governance of the recognized trade repository that involves a significant change to the structure of its board of directors or board committees and/or their related mandates;
- a change in control of the recognized trade repository;

- a change in entities that provide key services or systems to, or on behalf of, the recognized trade repository, where such change may have a significant impact on the functioning of the recognized trade repository;
- a change to outsourcing arrangements for key services or systems of the recognized trade repository, where such change may have a significant impact on the functioning of the recognized trade repository;
- a change to fees or the fee structure of the recognized trade repository;
- a change in the recognized trade repository's policies and procedures relating to risk-management, including relating to business continuity and data security, that has or may have a direct and significant impact on the recognized trade repository's provision of services to its participants;
- the commencement of a new type of business activity, either directly or indirectly through an affiliated entity;
- a change in the location of the recognized trade repository's head office or primary place of business, or a change in the location where the main data servers or contingency sites are housed, where such change in location is in a different province, territory or country than the current location.

(2) We generally consider a change in a recognized trade repository's fees or fee structure to be a significant change. However, we understand that recognized trade repositories may frequently change their fees or fee structure and may need to implement fee changes within timeframes that are shorter than the 45-day notice period contemplated in subsection 3(1). To facilitate this process, subsection 3(2) provides that a recognized trade repository may provide information that describes the change to fees or fee structure in a shorter timeframe (at least 15 days before the implementation date of the change to fees or fee structure) than is provided for another type of significant change. See section 12 of this Policy for guidance with respect to fee requirements applicable to recognized trade repositories.

Changes that are not significant

(3) Subsection 3(3) sets out the filing requirements for changes to information provided in a filed Form 96-101F1 *Application for Recognition – Trade Repository Information Statement* other than those described in subsections 3(1) or (2). Such changes to information are not considered significant and include the following:

- changes that would not have a direct and significant impact on the recognized trade repository's structure or participants, or more broadly on market participants, or the capital markets;
- changes in the routine processes, policies, practices, or administration of the recognized trade repository that would not impact participants;

- changes due to standardization of terminology;
- changes to the types of participants of a recognized trade repository that are in a local jurisdiction;
- necessary changes to conform to applicable regulatory or other legal requirements of a jurisdiction of Canada;
- minor system or technology changes that would not significantly impact the system or its capacity.

The participating jurisdictions may review filings under subsection 3(3) to ascertain whether the changes have been categorized appropriately. If the securities regulatory authority disagrees with the categorization, the recognized trade repository will be notified in writing. Where the securities regulatory authority determines that changes reported under subsection 3(3) are in fact significant changes, the recognized trade repository will be required to file an amendment to Form 96-101F1 that will be subject to review by the securities regulatory authority.

Ceasing to carry on business

6. (1) In addition to filing a completed Form 96-101F3 *Cessation of Operations Report for Recognized Trade Repository*, a recognized trade repository that intends to cease carrying on business in the local jurisdiction as a recognized trade repository must make an application to voluntarily surrender its recognition to the securities regulatory authority pursuant to securities legislation. The securities regulatory authority may accept the voluntary surrender subject to terms and conditions.⁵

Legal framework

7. (1) We generally expect a recognized trade repository to have rules, policies, and procedures in place that provide a legal basis for their activities in all relevant jurisdictions where they have activities, whether within Canada or any foreign jurisdiction.

(2) A reference to “contracts” in paragraph 7(2)(a) includes contracts with link arrangements, as such term is referred to in the PFMI Report. A recognized trade repository’s rules, policies and procedures may address risks arising from a conflict of law in various ways, including by providing that they are managed contractually.

We expect the recognized trade repository to take steps to ensure compliance with all rules, policies and procedures.

⁵ This will apply in those jurisdictions where securities legislation provides the securities regulatory authority with the power to impose terms and conditions on an application for voluntary surrender. The transfer of derivatives data/information can be addressed through the terms and conditions imposed by the securities regulatory authority on such application.

Governance

8. (1) The board of directors of a recognized trade repository must establish well-defined, clear and transparent governance arrangements, which should ensure that the risk management and internal control functions have sufficient authority, independence, resources and access to the board. We expect all internal controls to be effective in carrying out their purpose.

(3) We expect that interested parties will be able to locate the governance information required by subsections 8(1) and 8(2) through a web search or through clearly identified links on the recognized trade repository's website. Despite paragraph 8(3)(a), we do not expect a recognized trade repository to publicly disclose governance arrangements where it reasonably determines that such disclosure would be prejudicial to the interests of the trade repository or could compromise the security of the trade repository, its staff or derivatives data.

Board of directors

9. The board of directors of a recognized trade repository is subject to various requirements, such as requirements pertaining to board composition and conflicts of interest. To the extent that a recognized trade repository is not organized as a corporation, the requirements relating to the board of directors may be fulfilled by a body that performs functions that are equivalent to the functions of a board of directors.

(2) Paragraph 9(2)(a) requires individuals who comprise the board of directors of a recognized trade repository to have an appropriate level of skill and experience to effectively oversee the management of its operations. This would include individuals with experience and skills in areas such as business recovery, contingency planning, financial market systems and data management.

Under paragraph 9(2)(b), the board of directors of a recognized trade repository must include individuals who are independent of the recognized trade repository. We generally consider individuals who have no direct or indirect material relationship with the recognized trade repository as independent. We expect that independent directors of a recognized trade repository would represent the public interest by ensuring that regulatory and public transparency objectives are fulfilled, and that the interests of participants who are not derivatives dealers are considered.

(3) and (4) It is expected that the recognized trade repository will clarify in its governance arrangements the roles and responsibilities of its board of directors, including procedures for its functioning. We expect such procedures to, among other things, identify, address and manage board member conflicts of interest. The board should also review its overall performance and the performance of individual board members regularly.

Chief compliance officer

11. (1) Subsection 11(1) is not intended to prevent management from hiring the chief compliance officer, but instead requires the board to approve the appointment.

(3) References to harm to the capital markets in this subsection may be in relation to domestic or international capital markets.

Fees

12. A recognized trade repository is responsible for ensuring that the fees it sets are in compliance with section 12. The relevant securities regulatory authority will consider fees when assessing an application for recognition by a trade repository and may review changes in fees proposed by recognized trade repositories. In assessing whether fees and material charges are fairly allocated among participants as required under paragraph 12(a), we will consider a number of factors, including the following:

- the number and complexity of the derivatives being reported;
- the amount of the fee or charge imposed relative to the cost of providing the services;
- the amount of fees or charges imposed by other comparable trade repositories, where relevant, to report similar derivatives in the market;
- with respect to market data fees and charges, the amount of market data fees charged relative to the market share of the recognized trade repository;
- whether the fees or charges represent a barrier to accessing the services of the recognized trade repository for any category of participant.

A recognized trade repository should provide clear descriptions of priced services for comparability purposes. Other than fees for individual services, a recognized trade repository should also disclose charges for connecting to or accessing the trade repository. For example, a recognized trade repository should disclose information on the system design, as well as technology and communication procedures, that influence the charges for using the recognized trade repository. A recognized trade repository is also expected to provide timely notice to participants and the public of any changes to services and fees.

A recognized trade repository should regularly review, at least once every 2 calendar years, the structure of its fees and other charges to customers, including any indirect charges, to ensure fair allocation and efficiency and effectiveness of service.

Access to recognized trade repository services

13. (1) The criteria for participation established by a recognized trade repository should not limit access to its services, except in limited circumstances where the recognized trade repository has a reasonable belief that such access would result in risks to the trade repository, its technology systems or the accuracy or integrity of the data it provides to the securities regulators or to the public. In addition, such criteria could restrict access to a person that has failed to pay the recognized trade repository's fees, in whole or in part, that have been set in accordance with section 12 of the Instrument.

(3) A recognized trade repository is prohibited from unreasonably preventing, conditioning or limiting access to its services, unreasonably discriminating between its participants, imposing unreasonable barriers to competition or requiring the use or purchase of another service in order for a person or company to utilize its trade reporting service. A recognized trade repository should not engage in anti-competitive practices such as setting overly restrictive terms of use or engaging in anti-competitive price discrimination. A recognized trade repository should not develop closed, proprietary interfaces that result in vendor lock-in or barriers to entry with respect to competing service providers that rely on the data maintained by the recognized trade repository. As an example, a recognized trade repository that is affiliated with a clearing agency must not impose barriers that would make it difficult for a competing clearing agency to report derivatives data to the recognized trade repository.

Receiving derivatives data

14. A recognized trade repository must not refuse to receive derivatives data for all derivatives of the asset class or classes set out in its recognition order. For example, if the recognition order of a recognized trade repository includes interest rate derivatives, the recognized trade repository is required to accept derivatives data for all types of interest rate derivatives that are entered into by a local counterparty. It is possible that a recognized trade repository may accept derivatives data for only a subset of a class of derivatives if this is indicated in its recognition order. For example, there may be recognized trade repositories that accept derivatives data for only certain types of commodity derivatives, such as energy derivatives.

Section 14 also requires that a recognized trade repository receive derivatives data in respect of all data elements listed in Appendix A. For example, a recognized trade repository is not permitted to choose to receive derivatives data in respect of only certain data elements.

Derivatives data received by a recognized trade repository is subject to its validation procedure under section 22.2.

Communication procedures and standards

15. Section 15 sets out the communication standards required to be used by a recognized trade repository in communications with other specified entities. The reference in paragraph 15(d) to “service providers” may include persons or companies who offer technological or transaction processing or post-transaction services.

Due process

16. Section 16 imposes a requirement that a recognized trade repository provide participants or applicants with an opportunity to be heard before making a decision that directly and adversely affects the participant or applicant. We generally expect that a recognized trade repository would meet this requirement by allowing the participant or applicant to make representations in any form.

Rules, policies and procedures

17. The rules, policies and procedures of a recognized trade repository should be clear and comprehensive, and include explanatory material written in plain language so that participants can fully understand the system's design and operations, their rights and obligations, and the risks of participating in the system. Moreover, a recognized trade repository should disclose, to its participants and to the public, basic operational information and responses to the *FMI disclosure template* in Annex A of the CPMI-IOSCO consultative report *Principles for financial market infrastructures: Disclosure framework and assessment methodology*, published December 2012.

We anticipate that participating jurisdictions may develop and implement a protocol with the recognized trade repository that will set out the procedures to be followed with respect to the review and approval of rules, policies and procedures and any amendments thereto. Such a protocol may be appended to and form part of the recognition order. Depending on the nature of the changes to the recognized trade repository's rules, policies and procedures, such changes may also impact the information contained in Form 96-101F1 *Application for Recognition – Trade Repository Information Statement*. In such cases, the recognized trade repository will be required to file an amendment to Form 96-101F1 with the securities regulatory authority. See section 3 of this Policy for a discussion of filing requirements. We anticipate that requirements relating to the review and approval of rules, policies, and procedures and any amendments thereto will be described in the order of the securities regulatory authority recognizing the trade repository.

(3) Subsection 17(3) requires that a recognized trade repository monitor compliance with its rules, policies and procedures. The methodology of monitoring such compliance should be fully documented.

(4) The implementation by a recognized trade repository of processes for dealing with a participant's non-compliance with its rules, policies and procedures, as required by this subsection, does not preclude enforcement action by any other person or company, including a securities regulatory authority or other regulatory body.

Records of data reported

18. We interpret the term "error or omission" when used throughout the Instrument to mean, in relation to derivatives data, that the derivatives data is not accurate or complete. A recognized trade repository may be subject to record-keeping requirements under securities legislation that are in addition to those under section 18 of the Instrument.

(2) The requirement to maintain records for 7 years after the expiration or termination of a derivative, rather than from the date the derivative was entered into, reflects the fact that derivatives create ongoing obligations and that information is subject to change throughout the life of a derivative. For example, under subsection 22.2(5), there is an ongoing obligation for a recognized trade repository to accept a correction to data relating to a derivative for 7 years after expiration or termination of the derivative.

As part of the record-keeping requirements under section 18, we expect a recognized trade repository to maintain records relating to:

- errors or omissions in derivatives data, including corrections to derivatives data that has previously been disseminated under Part 4;
- derivatives data that does not satisfy the validation procedure of the recognized trade repository, including, but not limited to, validation errors, messages and timestamps.

A correction to derivatives data, whether before or after expiration or termination of the derivative, does not extend or reduce the maintenance period under subsection 18(2), unless the correction relates to the date of expiration or termination of the derivative. For example, if a derivative expired on December 31, 2020 and the notional amount of the derivative was subsequently corrected on December 31, 2021, the correction would not impact the record maintenance period. However, if the correction was to the expiration date, such that the derivative actually expired on December 31, 2019, then the record maintenance period should reflect the corrected expiration date.

Comprehensive risk-management framework

19. Section 19 requires that a recognized trade repository have a comprehensive risk-management framework. Set out below are some of our expectations for a recognized trade repository to be able to demonstrate that it meets that requirement.

Features of the framework

A recognized trade repository should have a written risk-management framework (including policies, procedures and systems) that enables it to identify, measure, monitor, and manage effectively the range of risks that arise in, or are borne by, the recognized trade repository. A recognized trade repository's framework should include the identification and management of risks that could materially affect its ability to perform or to provide services as expected, such as interdependencies.

Establishing a framework

A recognized trade repository should have comprehensive internal processes to help its board of directors and senior management monitor and assess the adequacy and effectiveness of its risk-management policies, procedures, systems and controls. These processes should be fully documented and readily available to the recognized trade repository's personnel who are responsible for implementing them.

Maintaining a framework

A recognized trade repository should regularly review the material risks it bears from, and poses to, other entities (such as other FMIs, settlement banks, liquidity providers or service providers) as a result of interdependencies, if applicable, and develop appropriate risk-management tools to address these risks. These tools should include business continuity arrangements that allow for rapid recovery and resumption of critical operations and services in the event of operational disruptions and recovery or orderly wind-down plans should the trade repository become non-

viable.

Tiered Participation Arrangements and Links

A recognized trade repository should identify, monitor, manage and regularly review:

- any material risks to the recognized trade repository arising in connection with tiered participation arrangements (as such term is referred to in the PFMI Report), if applicable;
- any risks to the recognized trade repository arising in connection with links, if applicable.

General business risk

20. (1) We consider general business risk to include any potential impairment of the recognized trade repository's financial position (as a business concern) as a consequence of a decline in its revenues or an increase in its expenses, such that expenses exceed revenues and result in a loss that must be charged against capital or an inadequacy of resources necessary to carry on business as a recognized trade repository.

(2) For the purpose of subsection 20(2), the amount of liquid net assets funded by equity that a recognized trade repository should hold is to be determined by its general business risk profile and the length of time required to achieve a recovery or orderly wind-down, as appropriate, of its critical operations and services, if such action is taken.

(3) We expect a recognized trade repository or its board of directors to address any need for additional equity in the event its equity falls close to or below the amount required under subsection 20(3).

(4) The scenarios identified under subsection 20(4) should take into account the various independent and related risks to which the recognized trade repository is exposed.

(5) Plans for the recovery or orderly wind-down of a recognized trade repository should contain, among other elements, a substantive summary of the key recovery or orderly wind-down strategies, the identification of the recognized trade repository's critical operations and services, and a description of the measures needed to implement the key strategies. The recognized trade repository should maintain the plan on an ongoing basis, to achieve recovery and orderly wind-down, and should hold sufficient liquid net assets funded by equity to implement this plan. A recognized trade repository should also take into consideration the operational, technological and legal requirements for participants to establish and move to an alternative arrangement in the event of an orderly wind-down.

System and other operational risks

21. (1) In interpreting the general principle concerning the management of operational risk set out in subsection 21(1), a recognized trade repository should:

- establish a robust operational risk-management framework with appropriate systems, policies, procedures, and controls to identify, monitor and manage operational risks;
- review, audit and test systems, operational policies, procedures and controls, periodically and after any significant changes;
- have clearly defined operational-reliability objectives and policies in place that are designed to achieve those objectives.

(2) The board of directors of a recognized trade repository should approve the trade repository's operational risk-management framework, which should include clear identification of the roles and responsibilities for addressing operational risks.

(3) An adequate system of internal control over systems as well as adequate general information technology controls are to be implemented to support information technology planning, acquisition, development and maintenance, computer operations, information systems support and security. There are Canadian frameworks that may provide guidance as to what constitutes adequate information technology controls, such as *COBIT* from ISACA. A recognized trade repository should ensure that its information technology controls address the integrity of the data that it maintains, by protecting all reported derivatives data from corruption, loss, improper disclosure, unauthorized access and other processing risks.

Paragraph 21(3)(b) requires a recognized trade repository to thoroughly assess future needs and at least once a year make systems capacity and performance estimates in a method consistent with prudent business practice. This paragraph also imposes an annual requirement for recognized trade repositories to conduct periodic capacity stress tests. Ongoing changes in technology, risk management requirements and competitive pressures may require these activities or tests to be carried out more frequently.

Paragraph 21(3)(c) requires a recognized trade repository to notify the securities regulatory authority of any material systems failure. A failure, malfunction, delay or other disruptive incident would be considered "material" if the recognized trade repository would in the normal course of its operations escalate the incident to, or inform, its senior management that is responsible for technology, or if the incident would have an impact on participants. We also expect that, as part of this notification, the recognized trade repository will provide updates on the status of the failure, the resumption of service, and the results of its internal review of the failure.

Further, the recognized trade repository should have comprehensive and well-documented procedures in place to record, analyze and resolve all systems failures, malfunctions, delays and security incidents. In this regard, the recognized trade repository should undertake a *post mortem* review to identify the causes and any required improvement to normal operations and/or business continuity arrangements. Such reviews should, where relevant, include an analysis of the effects on the trade repository's participants. The results of such internal reviews must be communicated to the regulator or securities regulatory authority as soon as practicable.

(4) We are generally of the view that disaster recovery plans should allow the recognized trade repository to provide continuous and undisrupted service, as back-up systems ideally should commence processing immediately. Where a disruption is unavoidable, a recognized trade repository is expected to provide prompt recovery of operations, meaning that it resumes operations within 2 hours following the disruptive event. Under paragraph 21(4)(c), an emergency event could include any external sources of operational risk, such as the failure of critical service providers or utilities or events affecting a wide metropolitan area, such as natural disasters, terrorism, and pandemics. Business continuity planning should encompass all policies and procedures to ensure uninterrupted provision of key services regardless of the cause of potential disruption.

(5) We expect that a recognized trade repository will engage relevant industry participants, as necessary, in tests of its business continuity plans, including testing of back-up facilities for both the recognized trade repository and its participants.

(6) For the purpose of subsection 21(6), a qualified party is a person or company or a group of persons or companies with relevant experience in both information technology and in the evaluation of related internal controls in a complex information technology environment, such as external auditors or third party information system consultants. We would generally consider that this obligation could be satisfied by an independent assessment by an internal audit department that is compliant with the *International Standards for the Professional Practice of Internal Auditing* published by The Institute of Internal Auditors. Before engaging a qualified party, the recognized trade repository should notify each relevant securities regulatory authority.

(8) In determining what a reasonable period is to allow participants to make system modifications and test their modified systems, a recognized trade repository should consult with its participants and allow all participants a reasonable opportunity to develop, implement and test systems changes. The needs of all types of participants should be considered, including those of smaller and less sophisticated participants.

(9) In determining what a reasonable period is to allow participants to test their modified systems and interfaces with the recognized trade repository, a recognized trade repository should consult with its participants. We consider a reasonable period to be a period that would provide all participants a reasonable opportunity to develop, implement and test systems changes. The needs of all types of participants should be considered, including those of smaller and less sophisticated participants.

Data security and confidentiality

22. (1) Rules, policies and procedures to ensure the safety, privacy and confidentiality of derivatives data must include limitations on access to confidential data held by the trade repository, including derivatives data, and safeguards to protect against entities affiliated with the recognized trade repository from using trade repository data for their personal benefit or the benefit of others.

(2) The purpose of subsection 22(2) is to ensure that users of a recognized trade repository have some measure of control over their derivatives data.

Transactions executed anonymously on a facility for trading derivatives

22.1. The purpose of section 22.1 is to ensure that the identities of counterparties to an original derivative are not disclosed post-execution to users of the recognized trade repository where the transaction is executed anonymously on a facility for trading derivatives and results in a cleared derivative. This only applies to a derivative in respect of which a counterparty does not know the identity of its counterparty prior to or at the time of execution of the transaction. Section 22.1 does not limit or apply to data provided or made available to the securities regulatory authority under this Instrument or under a recognized trade repository's recognition order.

Validation of data

22.2. (1) In accordance with subsection 22.2(1) and any other validation conditions set out in its recognition order, a recognized trade repository must validate that the derivatives data that it receives from a reporting counterparty satisfies the derivatives data elements listed in Appendix A to the Instrument. In addition, we expect a recognized trade repository to validate that the derivatives data it receives satisfies the technical specifications set out in the CSA Derivatives Data Technical Manual, which is included as Appendix A to this Policy.

(2) In evaluating what will be considered to be “technologically practicable” for purposes of subsection 22.2(2), we will take into account the prevalence, implementation and use of technology by comparable trade repositories. We may also conduct independent reviews to determine the state of technology.

(3) Only derivatives data that conforms to the derivatives data elements in Appendix A of the Instrument and the technical specifications set out in the CSA Derivatives Data Technical Manual must be accepted by a recognized trade repository.

(4) The requirement in subsection 22.2(4) to create and maintain records of derivatives data that failed to satisfy the validation procedure applies both before and after the expiration or termination of a derivative, subject to the record retention period under section 18.

(5) A recognized trade repository must accept corrections to errors or omissions in derivatives data if the corrected derivatives data satisfies its validation procedure. This requirement applies both before and after the expiration or termination of the derivative, subject to the record retention period under section 18. We view the term “participant” under subsection 22.2(5) to be limited to a counterparty to the derivative and their agent or service provider.

Verification of data

23. Under paragraph 26.1(b), reporting counterparties that are notional amount threshold derivatives dealers must verify that the derivatives data that they are reporting does not contain an error or omission at least once every calendar quarter, with at least two calendar months between verifications. Under paragraph 26.1(c), reporting counterparties that are reporting clearing

agencies or derivatives dealers that are not notional amount threshold derivatives dealers must verify that the derivatives data that they are reporting does not contain an error or omission at least every 30 days. Subsection 23(2) requires a recognized trade repository to maintain and adhere to written policies and procedures that are designed to enable such reporting counterparties to meet their obligations under paragraph 26.1(b) or (c).

A recognized trade repository may satisfy its obligation under section 23 by providing the reporting counterparty, or its third-party representative where applicable, a means of accessing derivatives data for open derivatives involving the reporting counterparty that is maintained by the recognized trade repository as of the time of the reporting counterparty's access to the derivatives data. Any access provided to a third-party representative is in addition to, not instead of, access provided to a relevant counterparty.

Outsourcing

24. Section 24 sets out requirements applicable to a recognized trade repository that outsources any of its material services or systems to a service provider. Generally, a recognized trade repository must establish policies and procedures to evaluate and approve these outsourcing arrangements, including assessing the suitability of potential service providers and the ability of the recognized trade repository to continue to comply with securities legislation in the event of bankruptcy, insolvency or the termination of business of the service provider. A recognized trade repository is also required to monitor the ongoing performance of a service provider to which it outsources a key service, system or facility. The requirements under section 24 apply regardless of whether an outsourcing arrangement is with a third-party service provider or an affiliated entity of the recognized trade repository. A recognized trade repository that outsources any of its material services or systems remains responsible for those services or systems and for compliance with securities legislation.

PART 3 DATA REPORTING

Part 3 addresses the reporting obligations for a derivative that involves a local counterparty, including: the determination of which counterparty to the derivative is required to report derivatives data; when derivatives data is required to be reported; the types of derivatives data that are required to be reported; and requirements regarding verification of data accuracy and reporting of errors and omissions.

Reporting counterparty

25. Section 25 sets out a process for determining which counterparty to a derivative is the reporting counterparty and is therefore required to fulfil the reporting obligations under the Instrument.

(1) The hierarchy outlined in subsection 25(1) for determining which counterparty to a derivative is required to report derivatives data is intended to reflect the counterparty to the derivative that is best suited to fulfill the reporting obligation.

Under the definition of “transaction” in the Instrument, each act of entering into, assigning, selling, or otherwise acquiring or disposing of a derivative, or the novation of a derivative is a separate reportable transaction. Market participants should apply the hierarchy under subsection 25(1) separately for each derivative resulting from a transaction.

The hierarchy does not apply to an original derivative where the transaction is executed anonymously on a facility for trading derivatives and the derivative is intended to be submitted for clearing contemporaneously with execution. In these circumstances, as provided under section 36.1, the facility for trading derivatives has the reporting requirement instead of the reporting counterparty determined under subsection 25(1). However, the hierarchy will apply to all other derivatives involving a local counterparty whether or not executed on a facility for trading derivatives.

The definition of “derivatives dealer” in the Instrument does not require that a person or company be registered with the local securities regulatory authority in order to meet the definition. Accordingly, where the reporting counterparty to a derivative is a derivatives dealer, as defined in the Instrument, the reporting obligations with respect to the derivative apply irrespective of whether the derivatives dealer is a registrant in the local jurisdiction. See the guidance in section 1(2) of this Policy with respect to the factors to be considered to determine whether a person or company is a derivatives dealer for the purpose of the Instrument. A person or company that meets the definition of “derivatives dealer” in the local jurisdiction would be a derivatives dealer for the purpose of the Instrument, even if it is exempted or excluded from the requirement to register.

Cleared derivative

Under paragraph 25(1)(a), derivatives data relating to a cleared derivative is required to be reported by the reporting clearing agency. The reporting agency is required to report each cleared derivative resulting from a novation of the original derivative to the clearing agency as a separate, new derivative with reporting links to the original derivative, and is also required to report the termination of the original derivative under subsection 32(4). For clarity, the reporting clearing agency is not the reporting counterparty for the original derivative.

The following chart summarizes the reporting responsibilities in respect of derivatives that are cleared:

Derivative	Reporting counterparty
Original derivative between Party A and Party B (sometimes referred to as the <i>alpha</i> transaction)	If the transaction is executed anonymously on a facility for trading derivatives, the facility for trading derivatives (s. 36.1). If the transaction is not executed anonymously on a facility for trading derivatives, the reporting counterparty as determined under section 25. For example, if Party A is a derivatives dealer and Party B is not, Party A would be the reporting counterparty.
Cleared derivative between Party A and the clearing agency (sometimes referred to as the <i>beta</i> transaction)	Clearing agency
Cleared derivative between Party B and the clearing agency (sometimes referred to as the <i>gamma</i> transaction)	Clearing agency
Termination of the original derivative between Party A and Party B	Clearing agency

Agreement between the counterparties

For a derivative that is not cleared between two derivatives dealers or two end-users (in other words, a derivative to which paragraphs 25(1)(a) and (b) do not apply), paragraph 25(1)(c) allows the counterparties to agree, in writing, at or before the time the transaction occurs, which counterparty will act as the reporting counterparty for the derivative. The intention of paragraph 25(1)(c) is to facilitate single counterparty reporting while requiring both counterparties to have procedures or contractual arrangements in place to ensure that reporting occurs.

One example of a type of agreement the counterparties may use to determine the reporting counterparty to a derivative is the ISDA methodology, publicly available at www.isda.org, developed for derivatives in Canada in order to facilitate one-sided derivative reporting and to provide a consistent method for determining the party required to act as reporting counterparty.

There is no requirement for counterparties to a derivative to use the ISDA methodology. However, in order for the counterparties to rely on paragraph 25(1)(c), the agreement must meet the conditions in paragraph 25(1)(c). Namely, the agreement must be in written form, have been entered into at or before the time of the derivative, and identify the reporting counterparty with respect to the derivative. The format of the written agreement is flexible. For example, an email between the counterparties is sufficient.

In the event that the counterparties are not able to agree, paragraph 25(1)(d) requires both counterparties to report the derivative to a recognized trade repository, in order to ensure timely reporting of derivatives data.

(2) and (3) Each local counterparty that relies on paragraph 25(1)(c) must fulfil the record-keeping obligations set out in subsections 25(2) and (3).

(4) Subsection (4) provides that a local counterparty that agrees to be the reporting counterparty for a derivative under paragraph 25(1)(c) must fulfil all reporting obligations as the reporting counterparty in relation to that derivative even if that local counterparty would otherwise be excluded from the trade reporting obligation under section 40.

Duty to report

26. Section 26 outlines the duty to report derivatives data. The requirements to report derivatives data do not apply to excluded contracts or instruments under Multilateral Instrument 91-101 *Derivatives: Product Determination*.

A reporting counterparty may delegate its reporting obligations to a third party, including a third-party service provider. This includes reporting of creation data, lifecycle event data, valuation data, collateral and margin data, and position level data. Where reporting obligations are delegated to a third party, the reporting counterparty remains liable for any failure to comply with applicable requirements under the Instrument.

(2) We would generally expect that reports for derivatives that are not accepted for reporting by any recognized trade repository would be electronically submitted to the local securities regulatory authority, and market participants should contact the local securities regulatory authority in advance to make these reporting arrangements.

(3) Subsection 26(3) provides for limited substituted compliance in two circumstances.

The first circumstance is where a counterparty to a derivative is organized under the laws of the local jurisdiction but does not conduct business in the jurisdiction other than activities incidental to being organized in the jurisdiction.

We are of the view that factors that would indicate that a person or company is conducting business in the jurisdiction would include the following:

- having a physical location in a jurisdiction;
- having employees or agents that reside in the jurisdiction;
- generating revenue in the jurisdiction;
- having customers or clients in the jurisdiction.

We are also of the view that activities that are incidental to being organized under the law of a jurisdiction would include instructing legal counsel to file materials with the government agency responsible for registering corporations and maintaining a local agent for service of legal documents.

The second circumstance is where the derivative involves a local counterparty that is a local counterparty solely on the basis that it is an affiliated entity of a person or company, other than an individual, that is organized in the local jurisdiction or has its head office and principal place of business in the local jurisdiction, and that person or company is liable for all or substantially all of the liabilities of the affiliated entity.

In each of these two circumstances and provided that the additional conditions set out in paragraphs 26(3)(c) are satisfied, the counterparties can benefit from substituted compliance where the derivatives data has been reported to a recognized trade repository pursuant to the laws of a province or territory of Canada other than the local jurisdiction or of a foreign jurisdiction listed in Appendix B to the Instrument. The data relating to the derivative that is reported to a recognized trade repository under paragraph 26(3)(b) may be provided to the securities regulatory authority under paragraph (c) in the same form as required to be reported under the applicable derivatives reporting requirements listed in paragraph (b).

(4) Subsection 26(4) requires that all derivatives data reported for a given derivative be reported to the same recognized trade repository to which the initial report is submitted or, with respect to derivatives data reported under subsection 26(2), to the local securities regulatory authority.

The purpose of this requirement is to ensure the securities regulatory authority has access to all reported derivatives data for a particular derivative (from the initial report to the recognized trade repository through all lifecycle event reports until termination or expiration) from a single recognized trade repository. It is not intended to restrict counterparties' ability to report different derivatives to different trade repositories nor to begin reporting derivatives data relating to a particular derivative to a different recognized trade repository (see below under section 26.4).

Where the entity to which the derivative was originally reported is no longer a recognized trade repository, all derivatives data relevant to that derivative should be reported to another recognized trade repository as required by the Instrument.

(8) We expect a reporting clearing agency to report all derivatives data in respect of a cleared derivative to the recognized trade repository to which derivatives data was reported in respect of the original derivative, unless the clearing agency obtains the consent of the local counterparties to the original derivative, or unless a local counterparty to the cleared derivative has specified a different recognized trade repository under subsection 26(9).

(9) The reporting counterparty to a derivative has not fulfilled its reporting obligations under Part 3 unless and until all relevant derivatives data satisfies the validation procedures of the recognized trade repository, which may include timing, methods of reporting, data standards in respect of the elements listed in Appendix A to the Instrument, and the technical specifications set out in the CSA Derivatives Data Technical Manual (which is included as Appendix A to this Policy). The

trade repository is required to notify a reporting counterparty or its agent pursuant to subsection 22.2(2) whether or not the reported derivatives data satisfies its validation procedure and will reject derivatives data that does not satisfy its validation procedure.

Verification of data

26.1. The reporting counterparty in respect of a derivative is responsible for ensuring that reported derivatives data does not contain an error or omission. To facilitate this, subsection 38(1) requires recognized trade repositories to provide counterparties with timely access to data. Paragraph 26.1(a) applies to both open derivatives and derivatives that have expired or terminated (unless the record-keeping requirements under section 36 have expired as of the time that the error or omission is discovered).

A reporting counterparty that is a derivative dealer or a reporting clearing agency has the additional requirement under paragraph 26.1(c) to verify at least every 30 days that the reported derivatives data does not contain an error or omission. In the case of a notional amount threshold derivatives dealer, verification must occur under paragraph 26.1(b) at least every calendar quarter, but there must be at least two calendar months between verifications. To verify data, a reporting counterparty must follow the rules, policies and procedures of the recognized trade repository (which have been established under section 23) to compare all derivatives data for each derivative for which it is the reporting counterparty with all derivatives data contained in its internal books and records (which may include its source systems) to verify that there are no errors or omissions. Paragraphs 26.1(b) and (c) do not apply to derivatives that have expired or terminated. Reporting counterparties should implement verification in a manner that is reasonably designed to provide an effective verification that the data does not contain an error or omission, for example, by comparing data in the recognized trade repository against data in the reporting counterparty's source systems.

Please see above under section 18 for our views on the term “error or omission”.

Derivatives reported in error

26.2. Section 26.2 addresses situations where a reporting counterparty erroneously reports a derivative, for example, where the transaction in respect of a derivative never occurred, or where the report was a duplicate. In these situations, the reporting counterparty must report the error to the recognized trade repository as soon as practicable after discovery of the error and in any case no later than the end of the business day following the day on which the error is discovered. This requirement is satisfied by reporting an “error” action type. Section 26.2 does not address other errors or omissions, such as errors in particular data elements. This requirement applies to both open and expired or terminated derivatives, unless the record-keeping requirements under section 36 have expired as of the time that the error is discovered.

Notification of errors and omissions with respect to derivatives data

26.3. Introduction

For purposes of this section, we consider an error or omission to be any error or omission including, for example, derivatives that were not reported, reports relating to transactions that never occurred, derivatives for which there are duplicate reports, and derivatives that were reported with missing or erroneous data.

Reporting of errors and omissions by the non-reporting counterparty

(1) Where a local counterparty that is not a reporting counterparty discovers an error or omission in respect of derivatives data that is reported to a recognized trade repository, such local counterparty has an obligation to report the error or omission to the reporting counterparty as soon as practicable after discovery of the error or omission and in any case no later than the end of the business day following the day on which the error or omission is discovered.

Notifying the securities regulatory authority of significant errors and omissions

(2) We consider a significant error or omission to be an error or omission that, due to its scope, type, or duration, or due to other circumstances, may impair the ability of the securities regulatory authorities to fulfill any of their respective mandates. These main factors operate independently of each other, and the presence of any one factor may impact the ability for such mandate(s) to be fulfilled.

- **Scope** – This factor refers to the number of derivatives in respect of which an error or omission has occurred. We generally consider the scope to be significant if it affects, at any time while the error or omission persists, more than 10% of the reporting counterparty’s derivatives, for which it is the reporting counterparty, and that are required to be reported under the Instrument. This factor applies to errors in reported derivatives data and unreported derivatives.

Exception for this factor:

- If the error relates to non-reporting, we only consider this factor significant if reporting is delayed beyond 24 hours after the reporting deadline, provided none of the other factors are present.
- **Type** – This factor refers to the nature of the error or omission. We generally consider the type to be significant if it is related to any of the following and persists for longer than 7 business days:
 - Counterparty 1 (Data Element Number 1)
 - Counterparty 2 (Data Element Number 2)
 - Jurisdiction of Counterparty 1 (Data Element Number 10)
 - Jurisdiction of Counterparty 2 (Data Element Number 11)
 - Notional amount (Data Element Number 26)
 - Notional currency (Data Element Number 27)

- Notional quantity (Data Element Number 32)
 - Price (Data Element Number 46)
 - Valuation amount (Data Element Number 101)
 - Valuation currency (Data Element Number 102)
 - Data Elements Related to Collateral and Margin (Data Element Numbers 79 - 94)
 - Unique Product Identifier (Data Element Number 117)
- **Duration** – This factor refers to the length of time an error or omission has persisted. We would generally consider the duration to be significant if it is longer than 3 months. This time period refers to the total period during which the error or omission is outstanding, regardless of when it was discovered.
 - **Other Circumstances** – This factor refers to an error or omission in respect of a derivative that involves:
 - a counterparty that was, at the time of the error or omission, in default under the terms of the derivative, or
 - a counterparty or underlying asset that was, at the time of the error or omission, determined to be in a credit event under the terms of the derivative.

Exception for this factor:

- If the error or omission occurred more than three years before it is discovered, we do not consider it significant, provided none of the other factors are present.

The requirement under subsection 26.3(2) applies to both open and expired or terminated derivatives, unless the record-keeping requirements under section 36 have expired as of the time that the error or omission is discovered. It also applies even if the reporting counterparty has already corrected the error or omission before the securities regulatory authority has been notified.

If errors or omissions are reasonably related and were discovered at approximately the same time, the reporting counterparty may provide a single notification with respect to all such errors or omissions.

The reporting counterparty should describe in its notification to the securities regulatory authority the general nature of the error or omission, the reason the error or omission is significant, the number of derivatives impacted, the date and duration of the error, the steps taken to remedy the error or omission, and any planned remediation steps, including dates the remediation will occur. For errors that involve derivatives that were required to be reported under the rules of two or more jurisdictions, a reporting counterparty is expected to notify each relevant regulatory authority, or may request that a regulatory authority provide relevant details and the reporting counterparty's contact information to the other relevant securities regulatory authorities.

The timeframe under subsection 26.3(2) refers to “as soon as practicable upon discovery”. With respect to this timeframe:

- We recognize that, at the time an error or omission is discovered, the reporting counterparty may not be in a position to determine whether it is significant. In this situation, we expect

the reporting counterparty to diligently and expeditiously determine whether the error or omission meets any of the above factors and notify us as soon as practicable upon discovery of the error or omission meeting any of the above factors.

- We recognize that a reporting counterparty may have determined that an error or omission is significant, but may not yet have a complete understanding of the error or omission. For example, it may have determined that an error is significant because it impacts the notional data element for certain derivatives, but it may still be in the process of researching the precise list of impacted derivatives. In this situation, we would expect the reporting counterparty to advise the applicable regulator with the information available as soon as practicable upon discovery of the significant error or omission and to update information as the reporting counterparty diligently assesses the full scope of the breach and develops a remediation plan.

Under the Instrument, a reporting counterparty is required to report data that does not contain an error or omission. We expect reporting counterparties to correct all errors and omissions relating to derivatives data that they reported, or failed to report, and thereby comply with the reporting requirements, as soon as possible. This applies both to open and expired or terminated derivatives, unless the record-keeping requirements under section 36 have expired as of the time that the error or omission is discovered.

Transferring a derivative to a different recognized trade repository

26.4. Should a reporting counterparty wish to report derivatives data relating to a derivative to a different recognized trade repository, it must follow the process set out in this section.

Legal entity identifiers

28. The Global LEI System is a G20 endorsed initiative⁶ for uniquely identifying parties to financial transactions, designed and implemented under the direction of the ROC, a governance body endorsed by the G20. The Global LEI System serves as a public-good utility responsible for overseeing the issuance of LEIs globally to counterparties who enter into derivatives or that are involved in a derivatives transaction. LEIs can only be obtained from a Local Operating Unit (LOU) endorsed by the ROC. The list of ROC-endorsed LOUs and their contact information is available at <https://www.gleif.org/en/> or <https://www.leiroc.org>.

(1) This subsection is intended to ensure that a recognized trade repository, a reporting counterparty, and a facility for trading derivatives (that has the reporting requirement under section 36.1) identify all counterparties to a derivative by a LEI under the Global LEI System.

(2) Paragraphs 28(2)(a) and (b) require each local counterparty (including both the reporting and non-reporting counterparty) to a derivative, other than an individual, to obtain, maintain and renew an LEI. In other words, these requirements apply regardless of whether the local counterparty is

⁶ For more information, see *FSB Report A Global Legal Entity Identifier for Financial Markets*, June 8, 2012, online:Financial Stability Board <<http://www.financialstabilityboard.org/publications/>>, and <https://www.fsb.org/2020/09/lei-roc-to-become-governance-body-for-otc-derivatives-identifiers/>.

the reporting counterparty. For greater certainty, this obligation applies to a derivatives dealer under paragraph (b) of the definition of “local counterparty”, and the exclusion under section 42 is not available in respect of this requirement.

Maintenance of an LEI for purposes of paragraph 28(2)(b) includes ensuring that the reference data associated with the LEI assigned to the counterparty is updated in a timely manner with all relevant and accurate information. Renewal of an LEI includes providing the relevant LOU with acknowledgement that the reference data associated with the LEI assigned to the counterparty is accurate.

The requirement in paragraph 28(2)(b) applies for such time as the counterparty has open derivatives. When all of the counterparty’s derivatives that are required to be reported under the Instrument have expired or terminated, the counterparty is no longer required to maintain or renew its LEI until such time as it may enter into a new derivative. The Instrument does not require a reporting counterparty to verify that its counterparties to each derivative that it reports have maintained and renewed their LEIs, although the reporting counterparty must maintain and renew its own LEI.

(3) If the counterparty to a derivative is an individual or is otherwise ineligible to receive an LEI, an alternate identifier must be used to identify such counterparty. The alternate identifier must be unique for each such counterparty, and the same alternate identifier must be used in respect of all derivatives involving that counterparty.

Unique transaction identifiers

29. (1) Section 29 is intended to ensure that a recognized trade repository, a reporting counterparty, and a facility for trading derivatives (that has the reporting requirement under section 36.1), identify each derivative, and each position under section 33.1, by means of a single UTI, the form of which is set out in the CSA Derivatives Data Technical Manual (Data Element Number 16).

(2) Subsection 29(2) outlines the hierarchy for determining which person or company has the obligation to assign a UTI for a derivative that is required to be reported. In accordance with the February 2017 publication of *Guidance on the Harmonisation of the Unique Transaction Identifier* by CPMI-IOSCO, section 29 of this Instrument intends to achieve a globally harmonized outcome for the generation of UTI.

Please see Part 1 above for guidance regarding the definition of “derivatives dealer” and the factors in determining a business purpose.

Allocated derivative

Where an agent facilitates and executes a transaction on behalf of several principals, and subsequently allocates a portion of the derivative among these principals, each derivative between a principal and its counterparty is a separate derivative and therefore requires a separate UTI. For example, if a fund manager, acting as agent, executes a transaction with a counterparty on behalf

of several of the funds that it manages, each allocated derivative between a fund and its counterparty requires a separate UTI.

Earlier UTI generator

This requirement in the hierarchy reflects the intention that a derivative should be assigned the same UTI for the purposes of all global trade reporting requirements.

Cleared derivative

Under paragraph 29(2)(b), where a derivative is cleared through a reporting clearing agency, the clearing agency must assign the UTI. For clarity, the clearing agency does not assign the UTI in respect of an original derivative that is intended to be cleared, to which it is not a counterparty.

Transaction executed on a facility for trading derivatives

A counterparty must not assign another UTI to a derivative, in respect of a transaction that is executed on a facility for trading derivatives, where that facility (whether or not it has the reporting requirement under section 36.1) has already assigned a UTI to the derivative. This is intended to ensure that a derivative is identified by means of only one UTI. Please see above under section 22.1 for guidance regarding a “facility for trading derivatives”.

Last resort determination

Paragraph 29(2)(d) provides that if none of the other fallbacks apply, the reporting counterparty must assign the UTI. This paragraph includes a “last resort” determination in the event that there are two reporting counterparties and none of the other paragraphs under the hierarchy apply. In this event, the counterparty that assigns the UTI is determined by a reverse LEI sorting of the LEIs of the counterparties. Therefore, the counterparty whose LEI with the characters reversed would appear first if the reversed LEIs of the counterparties were sorted in alphanumeric (ASCII) order, where digits are sorted before letters, and the number “0” is sorted before the number “1”, as in the following examples:

	Example 1	Example 2
LEI of Counterparty 1	1111ABCDEABCDEABC123	ABCDEABCDEABCDE12345
LEI of Counterparty 2	1111AAAAABBBBBCCC23	ABCDEABCDEAAAAA12344
Characters reversed for the LEI of Counterparty 1	321CBAEDCBAEDCBA1111	54321EDCBAEDCBAEDCBA
Characters reversed for the LEI of Counterparty 2	32CCCB BBBBAAAAA1111	44321AAAAAEDCBAEDCBA
First appearing after sorting on a character by character basis in ASCII order	321CBAEDCBAEDCBA1111	44321AAAAAEDCBAEDCBA because “4” comes before “5”
Entity that assigns the UTI under paragraph 29(2)(d)	Counterparty 1	Counterparty 2

Agreement

(3) If the counterparties to the derivative have agreed in writing that one of them will be the person or company responsible for generating the UTI for the derivative, the counterparty that is responsible under the terms of that agreement must assign the UTI instead of the reporting

counterparty. This does not apply if paragraphs 29(2)(a), (b) or (c) apply.

UTI generation by a recognized trade repository

(4) Subsection 29(4) applies to either (i) a notional amount threshold derivatives dealer, or (ii) a person or company that is not a reporting clearing agency, facility for trading derivatives or derivatives dealer, that is required to assign the UTI under subsection (2). Such an entity may, at its option, instead request that a recognized trade repository assign the UTI. In this situation, we expect that the recognized trade repository may need the person or company making this request to specify whether the derivative is intended to be cleared and, if so, the name of the reporting clearing agency. This is because this information must be provided by the recognized trade repository to the clearing agency under paragraph 29(9)(b). We expect the person or company to provide this information if required, and that the recognized trade repository will establish a process for these participants to provide this request.

Timing

(5), (7), (9) In evaluating what will be considered to be “technologically practicable” for purposes of a trade repository assigning and providing the UTI to others under subsections 29(5) and (9) or a facility for trading derivatives under subsection 29(7), we will take into account the prevalence, implementation and use of technology by comparable persons or companies located in Canada and in comparable foreign jurisdictions. We may also conduct independent reviews to determine the state of technology. In particular, we note that the timing for reporting obligations is predicated on UTIs being assigned and provided to others in an expedient manner.

Provision of UTI to others

(7), (8), (9) These subsections address requirements to provide the UTI to others that may be required to report it. If the person or company responsible for assigning the UTI is the reporting counterparty, it must also report the UTI to the recognized trade repository as part of the derivatives data that it is required to report under the Instrument (Data Element Number 16 in Appendix A to the Instrument).

Delegation

Similar to the reporting obligations in section 26, the requirements to assign and provide a UTI under section 29 can be delegated to a third party, but the person or company responsible for assigning and providing the UTI remains ultimately responsible for ensuring compliance with section 29.

Unique product identifiers

30. Section 30 is intended to ensure that a recognized trade repository, a reporting counterparty, and a facility for trading derivatives (that has the reporting requirement under section 36.1) identify each type of derivative by means of a single UPI. The UPI must be obtained from The Derivatives Service Bureau Ltd. (DSB).

Creation data

31. (1) and (2) A qualified reporting counterparty must report creation data immediately after the execution of a transaction. If it is not practicable to immediately report the creation data, it must

be reported as soon as practicable after the execution of a transaction. In all cases, the outside limit for reporting by qualified reporting counterparties is the end of the business day following execution of the transaction.

We are of the view that it is not practicable for a reporting counterparty to report creation data in respect of a derivative entered into by an agent of a counterparty, if the transaction is executed before the derivative is allocated among the counterparties on whose behalf the agent is acting, until the reporting counterparty receives and, as soon as practicable, processes this allocation from the agent. We expect that an agent will inform the reporting counterparty of the identities of the reporting counterparty's counterparties resulting from the allocation as soon as practicable after execution. For example, if a fund manager executes a derivative on behalf of several of the funds that it manages, but has not allocated the derivative among these funds, it would not be practicable for the reporting counterparty to report each derivative between itself and each allocated fund until it receives and, as soon as practicable, processes the allocation.

(3) Non-qualified reporting counterparties must report creation data no later than the end of the second business day following execution of the transaction.

Lifecycle event data

32. (1) For qualified reporting counterparties, lifecycle event data is not required to be reported immediately, but rather at the end of the business day on which the lifecycle event occurs. The end of business day report may include multiple lifecycle events that occurred on that day.

(2) If it is not practicable to report lifecycle event data by the end of the business day on which the lifecycle event occurs, the data must be reported by the end of the business day following the day on which the lifecycle event occurs.

(3) A non-qualified reporting counterparty must report lifecycle event data no later than the end of the second business day on which the lifecycle event occurs. This report may include multiple lifecycle events that occurred on that day.

(4) A reporting clearing agency is required to report the termination of the original derivative in respect of a cleared derivative under subsection 32(4). The termination report must be made to the same recognized trade repository to which the original derivative was reported by the end of the business day following the day on which the original derivative is terminated. We stress that the reporting counterparty of the original derivative is required to report that derivative accurately and must correct any errors or omissions in respect of that original derivative. A reporting counterparty of the original derivative and the reporting clearing agency should ensure accurate data reporting so that the original derivative that has been cleared can be reported as terminated.

We note that all reported derivatives data relating to a particular derivative must be reported to the same recognized trade repository, in accordance with subsection 26(4), or to the securities regulatory authority for a derivative for which derivatives data was reported to the securities regulatory authority, in accordance with subsection 26(2).

Valuation data and collateral and margin data

33. (1) The valuation data and collateral and margin data with respect to a derivative must be reported by a reporting counterparty that is a derivatives dealer or a reporting clearing agency each business day until the derivative is terminated or expires. All reported derivatives data relating to a particular derivative must be reported to the same recognized trade repository according to subsection 26(4).

Position level data

33.1. As an alternative to reporting lifecycle event data in respect of each derivative, a reporting counterparty may, at its option, report aggregated position level data. Similarly, as an alternative to reporting valuation data, and collateral and margin data, in respect of each derivative, a reporting counterparty that is a derivatives dealer or a reporting clearing agency may, at its option, report aggregated position level data. These options are only available in respect of derivatives that meet the criteria under section 33.1.

Section 33.1 allows for position level reporting in two cases:

- derivatives that are commonly referred to as “contracts for difference”, where each derivative included in the reported position is fungible with all other derivatives in the reported position and has no fixed expiration date;
- derivatives for which the only underlying interest is a commodity other than currency, where each derivative included in the reported position is fungible with all other derivatives in the reported position.

The Instrument does not apply to a commodity derivative that is excluded under paragraph 2(1)(d) of Multilateral Instrument 91-101 *Derivatives: Product Determination*. An example of a commodity derivative to which section 33.1 could apply is a fungible derivative in relation to a physical commodity that allows for cash settlement in place of delivery.

We take the position that commodities include goods such as agricultural products, forest products, products of the sea, minerals, metals, hydrocarbon fuel, precious stones or other gems, electricity, oil and natural gas (and by-products, and associated refined products, thereof), and water. We also consider certain intangible commodities, such as carbon credits and emission allowances, to be commodities. In contrast, this provision will not apply to financial commodities, such as currencies, interest rates, securities and indexes, as well as crypto assets that would be considered to be financial commodities.

We view the term “fungible” in this section to refer to derivatives that have certain contract specifications that are identical and replaceable with one another or can be bought or sold to offset a prior derivative having these identical contract specifications. The contract specifications that we expect to be identical are the identity of the counterparties, the maturity date, the underlying asset, and the delivery location. However, we do not expect other contract specifications to be

identical, including the execution date, notional amount, price or notional quantity. Derivatives within each reported position must be fungible with all other derivatives in the same reported position.

If a person or company is the reporting counterparty in respect of some derivatives that meet this criteria and others that do not, it may only report position level data in respect of the derivatives that meet this criteria, and must report lifecycle events under section 32 and, if applicable, valuation data and collateral and margin data under section 33, in respect of derivatives that do not. Contracts for difference and commodity derivatives may not be reported in the same position. If a reporting counterparty chooses **not** to report position level data, it must instead report lifecycle events under section 32 and, if applicable, valuation data and collateral and margin data under subsection 33(1) in relation to each derivative.

A reporting counterparty that is not a derivatives dealer or reporting clearing agency that opts to report position level data is only required to report lifecycle event data as position level data, and is not required to report valuation data, collateral and margin data.

Creation data cannot be reported as an aggregated position under section 33.1. Reporting counterparties must report creation data separately for each derivative. The CSA Derivatives Data Technical Manual provides technical specifications for reporting position level data.

Records of data reported

36. A reporting counterparty is a market participant under securities legislation and, therefore, subject to the record-keeping requirements under securities legislation, in addition to the requirements in section 36 of the Instrument. The requirement to maintain records for 7 years after the expiration or termination of a derivative, rather than from the date the derivative was entered into, reflects the fact that derivatives create ongoing obligations, and information is subject to change throughout the life of a derivative.

As part of the record-keeping requirements under section 36, we expect a reporting counterparty will maintain records of each verification it performs to confirm the accuracy of reported derivatives data, as well as records relating to any errors or omissions discovered in reported derivatives data, or any corrections to such data.

A correction to derivatives data, whether before or after expiration or termination of the derivative, does not extend or reduce the maintenance period under section 36 unless the correction relates to the date of expiration or termination of the derivative. For example, if a derivative expired on December 31, 2020 and the notional amount of the derivative was subsequently corrected on December 31, 2021, the correction would not impact the record maintenance period. However, if the correction was to the expiration date, such that the derivative actually expired on December 31, 2019, then the record maintenance period should reflect the corrected expiration date.

Facility for trading derivatives

36.1. The term “facility for trading derivatives” is defined in the Instrument.

(1) This section is intended to apply only to original derivatives (sometimes referred to as “alpha” derivatives) and to exclude derivatives that have cleared, and for which the reporting clearing agency is the reporting counterparty. The chart provided in this Policy under section 25 illustrates the distinction between original derivatives and cleared derivatives.

(2) Subsection 36.1(2) only applies where it is not possible for a counterparty to establish the identity of the other counterparty prior to execution of a transaction.

(3) Under subsection 36.1(2), where a transaction is executed anonymously on a facility for trading derivatives, and, at the time of execution, is intended to be cleared, the reporting hierarchy under section 25 does not apply with respect to the derivative. Instead, under subsection 36.1(3), certain provisions in the Instrument that refer to “reporting counterparty” and “qualified reporting counterparty” must be read as referring to “facility for trading derivatives”.

The provisions affected by subsection 36.1(3) are summarized in the following table for ease of reference (note that all references to “facility” in the table mean a “facility for trading derivatives”):

Provision	Summary
<i>Requirements that apply to a facility for trading derivatives (below referred to as “facility”) with respect to an anonymous derivative</i>	
22.2(2)	A recognized trade repository must, as soon as technologically practicable after receiving the derivatives data, notify a facility (including, for greater certainty, an agent acting on its behalf) whether or not the derivatives data received by the recognized trade repository from the facility satisfies the validation procedure of the recognized trade repository.
26(1)	A facility must report, or cause to be reported, the data required to be reported under Part 3 to a recognized trade repository; however, this only applies to creation data.
26(2)	A facility must electronically report the data required to be reported by Part 3 to the securities regulatory authority if no recognized trade repository accepts the data required to be reported by Part 3.
26(4)	A facility must ensure that all reported derivatives data relating to a derivative is reported to the same recognized trade repository.
26(9)	A facility must ensure that all reported derivatives data relating to a derivative satisfies the validation procedure of the recognized trade repository to which the derivative is reported.
26.1(a)	A facility must ensure that all reported derivatives data does not contain an error or omission.

26.2	If a facility reports a derivative in error, it must report the error to the recognized trade repository or, if the derivatives data was reported to the securities regulatory authority under subsection 26(2), to the securities regulatory authority, as soon as practicable upon discovery of the error, and in no event later than the end of the business day following the day of discovery of the error.
26.3(1)	Where a facility has the reporting requirement, a local counterparty must notify the facility of an error or omission with respect to derivatives data relating to a derivative to which it is a counterparty as soon as practicable upon discovery of the error or omission, and in no event later than the end of the business day following the day of discovery of the error or omission.
26.3(2)	A facility must notify the securities regulatory authority of a significant error or omission as soon as practicable upon discovery of the error or omission.
26.4(1)	A facility may change the recognized trade repository to which derivatives data relating to a derivative is reported by following the procedures set out in this section (although in practice we do not expect that a facility would use these procedures, given that the facility is only required to report creation data for original derivatives that should be terminated once they are cleared).
27	A facility must include the following in every report required by Part 3: (a) the LEI of each counterparty to the derivative as set out in section 28, (b) the UTI for the derivative as set out in section 29, and (c) the UPI for the type of derivative as set out in section 30.
28(1)	In all recordkeeping and reporting that is required under the Instrument, a facility must identify each counterparty to a derivative by means of a single LEI.
28(3)	If a counterparty to a derivative is an individual or is not eligible to receive a LEI as determined by the Global LEI System, a facility must identify such a counterparty with a single unique alternate identifier.
29(1)	In all recordkeeping and reporting that is required under the Instrument, a facility must identify each derivative by means of a single UTI.
29(7)	A facility is required to provide the UTI that it has assigned, as set out in this subsection.
30(2)	In all recordkeeping and reporting that is required under the Instrument, a facility must identify each type of derivative by means of a single UPI.

31(1) 31(2)	Immediately following the execution of a derivative that is required to be reported under this Instrument, a facility must report the creation data relating to that derivative to a recognized trade repository. If it is not practicable to immediately report creation data, the facility must report creation data as soon as practicable and in no event later than the end of the business day following the day on which the data would otherwise be required to be reported.
35	Where a recognized trade repository ceases operations or stops accepting derivatives data for a certain asset class of derivatives, the facility may fulfill its reporting obligations under the Instrument by reporting the derivatives data to another recognized trade repository, or to the securities regulatory authority if there is not an available recognized trade repository, within a reasonable period of time.
36	A facility must keep records relating to a derivative for which it has the reporting requirement, including transaction records, for a 7 years after the date on which the derivative expires or terminates. It must keep these records in a safe location and in a durable form.
37(3)	A facility must use its best efforts to provide the securities regulatory authority with access to all derivatives data that it is required to report pursuant to the Instrument, including instructing a trade repository to provide the securities regulatory authority with access to such data.
41	A facility is not required to report derivatives data relating to a derivative if it is entered into between the government of a local jurisdiction, and a crown corporation or crown agency that forms part of a consolidated entity with the local government for accounting purposes.
42	A facility is not required to report derivatives data relating to a derivative if the derivative is required to be reported solely because one or both counterparties is a local counterparty under paragraph (b) of the definition of “local counterparty”. This exclusion is not available in respect of derivatives data relating to a derivative involving an individual who is a resident of a local jurisdiction.

(4) Subsection 36.1(4) provides for certain exceptions where an anonymous derivative is intended to be cleared. We expect that paragraph 36.1(4)(a) would apply to, for example, a fund manager that is allocating a derivative among funds that it manages.

(5) Subsection 36.1(5) provides for a grace period to enable a facility for trading derivatives to determine whether a participant, and a customer of a participant, is a local counterparty under paragraph (c) of the definition of “local counterparty” under Canadian trade reporting rules. The grace period only applies if the facility makes diligent efforts on a reasonably frequent basis to determine this.

PART 4 DATA DISSEMINATION AND ACCESS TO DATA

Introduction

Part 4 includes obligations on recognized trade repositories to make data available to the regulators, counterparties and the public.

Data available to regulators

37. This section covers derivatives data that may impact capital markets in Canada or is otherwise necessary to carry out the securities regulatory authority's mandate.

Derivatives that reference an underlying asset or class of assets with a nexus to a jurisdiction in Canada can impact capital markets in that jurisdiction, even if the counterparties to the derivative are not local counterparties. Therefore, the participating jurisdictions have a regulatory interest in derivatives involving such underlying interests even if such data is not submitted pursuant to the reporting obligations in the Instrument, but is held by a recognized trade repository.

(1) For the purpose of paragraph 37(1)(a), electronic access includes the ability of the securities regulatory authority to access, download, or receive a direct real-time feed of derivatives data maintained by the recognized trade repository.

When a participant corrects an error or omission in derivatives data, we do not expect a recognized trade repository to re-issue any static reports that were previously provided to us to reflect the correction. However, any new static reports provided to us, as soon as technologically practicable after recording the correction, should reflect the correction, if applicable. Similarly, we expect the data that we access through our electronic access to be updated to reflect any corrections as soon as technologically practicable after the recognized trade repository recorded the correction.

For the purpose of paragraph 37(1)(d), in evaluating what will be considered to be "technologically practicable", we will take into account the prevalence, implementation and use of technology by comparable trade repositories. We may also conduct independent reviews to determine the state of technology.

(2) It is expected that all recognized trade repositories will comply with the internationally accepted regulatory access standards and recommendations developed by CPMI and IOSCO and contained in the CPMI-IOSCO final report entitled *Authorities' access to trade repository data*.⁷

(3) We interpret the requirement for a reporting counterparty to use best efforts to provide the securities regulatory authority with access to derivatives data to mean, at a minimum, instructing the recognized trade repository to release derivatives data to the securities regulatory authority.

Data available to counterparties

⁷ See report entitled *Authorities' access to trade repository data* available at <http://www.bis.org/publ/cpss110.htm>.

38. Section 38 is intended to ensure that each counterparty, and any person or company acting on behalf of a counterparty, has access to all derivatives data relating to its derivative(s) in a timely manner and that recognized trade repositories have appropriate authorization procedures in place to enable such access. The participating jurisdictions expect that where a counterparty has provided consent to a recognized trade repository to grant access to data to a delegate, including a third-party service provider, the recognized trade repository should grant such access on the terms consented to.

We note that reporting counterparties require access to derivatives data relating to their derivatives in order to fulfill their obligations under paragraph 26(1)(a) to ensure the accuracy of reported data.

We expect that data made available by a recognized trade repository to counterparties, and any person or company acting on their behalf, will not include the identity or LEI of the other counterparty in respect of transactions executed anonymously on a facility for trading derivatives, as required under section 22.1.

Data available to public

39. In evaluating what will be considered to be “technologically practicable” for purposes of paragraphs 39(1)(b) and 39(3)(b), we will take into account the prevalence, implementation and use of technology by comparable trade repositories. We may also conduct independent reviews to determine the state of technology.

(1) Subsection 39(1) requires a recognized trade repository to make available to the public at no cost certain aggregate data for all derivatives reported to it under the Instrument, including open positions (which refers to derivatives that have not expired or terminated), volume and number of derivatives.

It is expected that a recognized trade repository will provide aggregate data by notional amounts outstanding and level of activity. Such aggregate data is expected to be available at no cost on the recognized trade repository’s website. When a participant corrects an error or omission in derivatives data, we do not expect a recognized trade repository to re-publish aggregate data that was previously published before the correction was recorded. However, any new publication of aggregate data, as soon as technologically practicable after recording the correction, should reflect the correction, if applicable.

(2) Subsection 39(2) requires that the aggregate data that is disclosed under subsection 39(1) be broken down into various categories of information. The following are examples of the categorized aggregate data required under subsection 39(2):

- currency of denomination (the currency in which the derivative is denominated);
- asset class of the underlier (e.g., fixed income, credit or equity);
- product type (e.g., options, forwards or swaps);

- cleared or uncleared;
- expiration (broken down into expiration ranges, such as less than one year, 1-2 years, 2-3 years).

(3) Subsection 39(3) requires a recognized trade repository to make available to the public at no cost transaction level reports that meet the requirements under Appendix C to the Instrument. These transaction level reports are expected to be available on the recognized trade repository's website for at least one year after the initial public dissemination. We expect recognized trade repositories, as soon as technologically practicable after recording a correction to derivatives data by a participant, to publicly disseminate the correction as required under paragraph 1(c) of Appendix C to the Instrument. While the correction is required to be publicly disseminated, the recognized trade repository is not required to edit previously published transaction level reports to reflect the corrected data.

(4) Published data must be anonymized and the names or LEIs of counterparties must not be published. This provision is not intended to create a requirement for a recognized trade repository to determine whether anonymized published data could reveal the identity of a counterparty based on the terms of the derivative.

PART 5 EXCLUSIONS

Introduction

Part 5 provides for various exclusions from the reporting requirements under the Instrument.

Commodity derivative

40. Section 40 provides an exclusion for a derivative for which the only underlying interest is a commodity other than a currency. The Instrument does not apply to a commodity derivative that is excluded under paragraph 2(1)(d) of Multilateral Instrument 91-101 *Derivatives: Product Determination*. An example of a commodity derivative to which section 40 could apply (subject to the other terms set out in that section) is a derivative in relation to a physical commodity that allows for cash settlement in place of delivery.

We take the position that commodities include goods such as agricultural products, forest products, products of the sea, minerals, metals, hydrocarbon fuel, precious stones or other gems, electricity, oil and natural gas (and by-products, and associated refined products, thereof), and water. We also consider certain intangible commodities, such as carbon credits and emission allowances, to be commodities. In contrast, this exclusion will not apply to financial commodities, such as currencies, interest rates, securities, indexes, as well as crypto assets that would be considered to be financial commodities.

This exclusion does not apply to a local counterparty that is a qualified reporting counterparty.

A local counterparty that qualifies for this exclusion is required to report a derivative involving an asset class other than a commodity (or involving currency), if it is the reporting counterparty for the derivative under subsection 25(1).

For a derivative involving a local counterparty to which the exclusion under section 40 applies, the other counterparty will be the reporting counterparty for the derivative unless either

- the exclusion under section 40 also applies to that counterparty, or
- the local counterparty to which the exclusion under section 40 applies agrees under paragraph 25(1)(c) to be the reporting counterparty for the derivative, as provided for under subsection 25(4).

In calculating the month-end notional outstanding for any month, the notional amount of all outstanding derivatives required to be reported under the Instrument and relating to a commodity other than cash or currency, with all counterparties other than affiliated entities, whether domestic or foreign, should be included. Contracts or instruments that are excluded from the definition of “specified derivative” in Multilateral Instrument 91-101 *Derivatives: Product Determination* are not required to be included in the calculation of month-end notional outstanding.

A notional amount that is not denominated as a monetary amount should be converted to a monetary amount using the methodology set out in Appendix 3.1 of the CSA Derivatives Data Technical Manual.

This exclusion is not relevant to an original derivative, where the transaction is executed anonymously on a facility for trading derivatives. In this situation, even if both local counterparties to the derivative would otherwise qualify for this exclusion, the facility for trading derivatives must report the original derivative under section 36.1.

In a derivative between two local counterparties, where the reporting counterparty is determined under paragraph 25(1)(d), and where section 36.1 does not apply, each local counterparty should determine whether it qualifies for this exclusion. If only one local counterparty to the derivative qualifies for the exclusion, the other local counterparty must still report the derivative. If each local counterparty qualifies for the exclusion, the derivative is not required to be reported under the Instrument.

In a derivative between a local counterparty that qualifies for this exclusion and a non-local counterparty, where the reporting counterparty is determined under paragraph 25(1)(d) and where section 36.1 does not apply, the derivative is not required to be reported under the Instrument.

Derivative between affiliated entities

41.1. Section 41.1 provides an exclusion from the reporting requirement for derivatives between two affiliated entities. The exclusion is not available to a person or company that is a derivatives dealer or a clearing agency, or is an affiliated entity of a derivatives dealer or a clearing agency. For example, if an affiliated entity of a derivatives dealer enters into a derivative with its affiliated

derivatives dealer, or with another affiliated entity of the derivatives dealer, this exclusion does not apply. Also, the exclusion does not apply to a facility for trading derivatives with respect to derivatives data for a derivative that is executed anonymously on such facility and intended to be cleared.

Derivative between a non-resident derivatives dealer and a non-local counterparty

42. Section 42 provides an exclusion from the reporting requirement in respect of derivatives that are only required to be reported because one or both counterparties is a local counterparty under paragraph (b) of the definition of “local counterparty”. This exclusion applies to a foreign derivatives dealer that is a local counterparty under paragraph (b) of that definition, in respect of derivatives with another foreign dealer or a foreign non-dealer.

However, this exclusion is not available where a derivative involves an individual who is a resident of a local jurisdiction. A derivatives dealer is required to report derivatives with such an individual, even though the individual is not a “local counterparty”.

The following chart includes examples to illustrate whether this exclusion applies:

Counterparty A	Counterparty A “local counterparty” status	Counterparty B	Counterparty B “local counterparty” status	Result
European bank that is a derivatives dealer in local jurisdiction	“local counterparty” only under para. (b) of that definition	European bank	Either a non-local counterparty or a “local counterparty” only under para. (b) of that definition	Exclusion applies
U.S. bank that is a derivatives dealer in local jurisdiction	“local counterparty” only under para. (b) of that definition	U.S. based counterparty (not guaranteed by a local counterparty)	Non-local counterparty	Exclusion applies
Japanese bank that is a derivatives dealer in local jurisdiction	“local counterparty” only under para. (b) of that definition	Pension fund	Local counterparty under para. (a) of that definition	Exclusion does not apply – derivative is reportable
U.K. bank that is a derivatives dealer in local jurisdiction	“local counterparty” only under para. (b) of that definition	Individual resident in local jurisdiction	Non-local counterparty	Exclusion does not apply – derivative is reportable
Canadian bank that is a	“local counterparty”	Not relevant	Not relevant	Exclusion does not apply –

derivatives dealer in local jurisdiction	under paras. (a) and (b) of that definition			derivative is reportable
--	---	--	--	-----------------------------

APPENDICES
TO
Multilateral Instrument 96-101 *Derivatives: Trade Reporting*

APPENDIX A

Appendix A to the Instrument should be read in conjunction with the CSA Derivatives Data Technical Manual, Appendix A to this Policy, which provides the formats and allowable values for the derivatives data specifications required to be reported by a reporting counterparty under Part 3 of the Instrument.

APPENDIX C

Item 1

1. Item 1 of Appendix C to the Instrument describes the types of derivatives for which a recognized trade repository must make the data in the fields described in Table 1 available to the public.

Data Element Number D2 in Table 1 relates to action types in respect of a derivative, other than “new”, which includes lifecycle events, cancellations and corrections.

A recognized trade repository is not required to make available to the public data that relates to a lifecycle event that does not contain new price information compared to the derivatives data initially reported for the derivative.

Table 2

The identifiers listed in the column in Table 2 entitled *Underlying Asset Identifier* refer to the following:

“CAD-BA-CDOR” means all tenors of the Canadian Dollar Offered Rate (CDOR). CDOR is a financial benchmark for bankers’ acceptances with a term to maturity of one year or less calculated and administered by Refinitiv.

“USD-LIBOR-BBA” means all tenors of the U.S. Dollar ICE LIBOR. ICE LIBOR is a benchmark administered by ICE Benchmark Administration and provides an indication of the average rate at which a contributor bank can obtain unsecured funding in the London interbank market for a given period, in a given currency.

“EUR-EURIBOR-Reuters” means all tenors of the Euro Interbank Offered Rate (Euribor). Euribor is a reference rate published by the European Banking Authority based on the average interest rates at which selected European prime banks borrow funds from one another.

“GBP-LIBOR-BBA” means all tenors of the GBP Pound Sterling ICE LIBOR. ICE LIBOR is a benchmark administered by ICE Benchmark Administration providing an indication of the average

rate at which a contributor bank can obtain unsecured funding in the London interbank market for a given period, in a given currency.

“All Indexes” means any statistical measure of a group of assets that is administered by an organization that is not affiliated with the counterparties and whose value and calculation methodologies are publicly available.

Exclusions

2. Item 2 of Appendix C specifies certain types of derivatives that are excluded from the requirement under subsection 39(3) of the Instrument that transaction-level data be made available to the public. An example of a derivative excluded under item 2(a) is a cross-currency swap. The types of derivatives excluded under item 2(b) result from portfolio compression activity which occurs whenever a derivative is amended or entered into in order to reduce the gross notional amount of an outstanding derivative or group of derivatives without impacting the net exposure. Item 2(c) excludes a derivative resulting from a novation on the part of a clearing agency when facilitating the clearing of a bilateral derivative. As a result of item 2(c), with respect to derivatives involving a reporting clearing agency, the timing under item 7 for making transaction-level data available to the public applies only to derivatives entered into by a clearing agency on its own behalf.

Rounding of notional amount

3. The rounding thresholds in Table 3 are to be applied to the notional amount of a derivative in the currency of the derivative. For example, the notional amount of a derivative denominated in United States dollars (USD) would be rounded and made available to the public in USD and not in the Canadian dollar (CAD) equivalent.

Capping of notional amount

4. Item 4 of Appendix C requires a recognized trade repository to compare the rounded notional amount of a derivative denominated in a non-CAD currency to the capped rounded notional amount in CAD that corresponds to the asset class and tenor of that derivative, each as set out in Table 4. Therefore, the recognized trade repository must convert the rounded notional amount in the non-CAD currency into CAD in order to determine whether it would exceed the capping threshold. The recognized trade repository must use a consistent and transparent methodology for converting to and from CAD for the purposes of comparing and publishing the capped notional amount.

For example, in order to compare the rounded notional amount of a derivative denominated in UK Pounds (GBP) to the thresholds in Table 4, the recognized trade repository must convert this amount to a CAD-equivalent amount. If the CAD-equivalent notional amount of the GBP denominated derivative exceeds the capping threshold, the recognized trade repository must make available to the public the capped rounded notional amount converted back into the currency of the derivative using a consistent and transparent methodology.

6. Item 6 of Appendix C requires a recognized trade repository to adjust the data in the option premium field in a consistent and proportionate manner if the rounded notional amount of a

derivative is greater than the applicable capped rounded notional amount, as set out in Table 4. The option premium field adjustment should be proportionate to the size of the capped rounded notional amount compared to the rounded notional amount.

Timing

7. Item 7 of Appendix C sets out when a recognized trade repository must make the required information from Table 1 available to the public. The purpose of the public reporting delays is to ensure that counterparties have adequate time to enter into any offsetting derivative that may be necessary to hedge their positions. The time delay applies to all derivatives, regardless of size, that are subject to the requirement under subsection 39(3) of the Instrument that transaction-level data be made available to the public in accordance with Appendix C.

8. Item 8 of Appendix C allows for certain periods of downtime for a recognized trade repository to perform testing, maintenance and upgrades. The recognized trade repository must publicly disseminate the required information from Table 1 as soon as technologically practicable following the conclusion of the period of downtime. In evaluating what will be considered to be “technologically practicable”, we will take into account the prevalence, implementation and use of technology by comparable trade repositories. We may also conduct independent reviews to determine the state of technology.

We expect periods of downtime will be scheduled during times when the recognized trade repository receives the least amount of derivatives data. A recognized trade repository should provide prior notice to its participants and to the public of such downtime on its website, where possible. Only maintenance and upgrades that cannot otherwise be performed during routine downtime should be performed on an *ad hoc* basis. In such cases, the downtime should be during a time that would be least disruptive to the trade repository’s obligations under this Instrument.

1 Introduction

1.1 Background

The technical specifications in this CSA Derivatives Data Technical Manual (the **Technical Manual**) specify the definition, format, and allowable values for each data element that is required to be reported under Manitoba Securities Commission Rule 91-507 *Derivatives: Trade Reporting*, Ontario Securities Commission Rule 91-507 *Derivatives: Trade Reporting*, Regulation 91-507 *respecting Trade Repositories and Derivatives Data Reporting* (Quebec) and, in the remaining provinces and territories, Multilateral Instrument 96-101 *Derivatives: Trade Reporting* (collectively, the **TR Rules**) and are sourced primarily from the *Revised CDE Technical Guidance - version 3: Harmonisation of critical OTC derivatives data elements (other than UTI and UPI)*⁸ (the **CDE Technical Guidance**).

The Technical Manual is intended to assist market participants in reporting under amendments to the TR Rules that are expected to become effective on July 25, 2025.

All terms in the Technical Manual that are defined in a TR Rule have the same meaning as in the applicable TR Rule, unless otherwise provided in the Technical Manual or unless the context otherwise requires.

Where data elements align with the data elements prescribed by the Commodity Futures Trading Commission (the **CFTC**), the Technical Manual has generally adopted the name, definition, format, and allowable values as set out by the CFTC.

It is expected that the Technical Manual will be updated on a periodic basis to reflect updates from the Canadian Securities Administrators (**CSA**) and international updates.

1.1.1. Format of technical specifications

- (1) **#:** all data elements are assigned a number for ease of reference. The data element number is referenced throughout the Technical Manual and in Appendix A to each of the TR Rules.
- (2) **Source:** this column contains "CDE", "CSA", "CFTC" or "ESMA". "CDE" refers to a data element in the CDE Technical Guidance. "CFTC" refers to a data element sourced from the Commodities Futures Trading Commission. "ESMA" refers to a data element sourced from the European Securities and Markets Authority.
- (3) **Category:** data elements are grouped by topic or category.
- (4) **Data Element Description:** a concise description of the data element that is set out in Appendix A to each of the TR Rules and reproduced in the Technical Manual for convenience. These descriptions are intended to comply with CSA rule drafting standards while substantively aligning with the corresponding detailed explanation.

⁸ See Revised CDE Technical Guidance – version 3 - Harmonisation of critical OTC derivative data elements (other than UTI and UPI), September 2023, https://www.leiroc.org/publications/gls/roc_20230929.pdf

- (5) **Detailed Explanation of Data Element:** for CDE data elements, the explanation is sourced from the CDE Technical Guidance, with footnotes added to provide clarity based on the CFTC’s regulations. For CFTC data elements, the explanation is sourced from the CFTC Technical Specification, with footnotes added to provide clarity. For ESMA data elements, the explanation is sourced from EMIR REFIT validation rules. Data elements sourced from the CFTC and ESMA apply regardless of reporting requirements in the U.S. or Europe. For example, data elements sourced from the CFTC apply to all derivatives that are required to be reported under the TR Rules, as applicable, and not only to swaps under CFTC rules. Further, they apply under the TR Rules regardless of whether the derivative is otherwise required to be reported under CFTC rules.
- (6) **Format:** see Table below that illustrates the meaning of formats used throughout the document.

Format	Content in brief	Additional Explanation	Example(s)
YYYY-MM-DD	Date	YYYY = four-digit year MM = two-digit month DD = two-digit day	2015-07-06 (corresponds to 6 July 2015)
YYYY-MM-DDThh:mm:ssZ	Date and time	YYYY, MM, DD as above hh = two-digit hour (00 through 23) (am/pm NOT allowed) mm = two-digit minute (00 through 59) ss = two-digit second (00 through 59) T is fixed and indicates the beginning of the time element. Z is fixed and indicates that times are expressed in UTC (Coordinated Universal Time) and not in local time.	2014-11-05T13:15:30Z (corresponds to 5 November 2014, 1:15:30 pm, Coordinated Universal time, or 5 November 2014, 8:15:30 am US Eastern Standard Time)
Num(25,5)	Up to 25 numerical characters including up to five decimal places	The length is not fixed but limited to 25 numerical characters including up to five numerical characters after the decimal point. Should the value have more than five digits after the decimal, reporting counterparties should round half-up.	1352.67 12345678901234567890.12345 1234567890123456789012345 0 – 20000.25 – 0.257
Num(5) ⁹	Up to five numerical characters, no decimals are allowed	The length is not fixed but limited to five numerical characters	12345 123 20
Char(3)	Three alphanumeric characters	The length is fixed at three alphanumeric characters.	USD X1X 999
Varchar(25)	Up to 25 alphanumeric characters	The length is not fixed but limited at up to 25 alphanumeric characters. No special characters are permitted. If permitted, it would be explicitly stated in the format of the data element.	asgaGEH3268EFdsagtTRCF543 aaaaaaaaa x
Boolean	Boolean characters	Either “True” or “False” or	True / true

⁹ Num(5) format is equivalent to Num(5,0) used in this Technical Manual and does not allow decimals.

"true" or "false" ¹⁰	False / false
---------------------------------	---------------

Table 1 – Explanation of formats used in the Technical Specification

1.2 Explanation of Certain Data Elements or Categories

1.2.1 Direction of the transaction

The Technical Manual requires the reporting of Buyer/Seller or Payer/Receiver for this data element. This is a slightly different approach from that taken in the CDE Technical Guidance, which provides two options for reporting Direction. The reporting counterparty should not report both Buyer/Seller and Payer/Receiver for a given transaction, but instead use the reporting method appropriate for the type of instrument reported.

1.2.2 Repeating data elements or leg-based products

Depending on the product being reported and the related market convention, a multi-leg or multi-stream product could be reported using a particular data element more than once. Unless the data element is listed as "leg", it cannot be reported more than once. For products where the multi-leg or multi-stream concept is not applicable, report values in the designated data element for the first leg (Leg 1) for all fields that are specified as leg-based data elements. For products having two legs where one leg references a fixed value and the other leg references a floating value, Leg 1 elements should refer to the leg that references a fixed value and Leg 2 elements should refer to the leg that references a floating value. For products having two legs where each leg references a floating value respectively, the legs should be ordered based on the alphabetical ordering of the names of the respective underliers. In cases where the names of the respective underliers are the same, but they are differentiated by a tenor, Leg 1 elements should refer to the leg referencing the underlier with the shorter tenor.

1.2.3 Schedules

Derivatives involving schedules which specify the details known at the time of execution of the transaction are required to be reported as part of creation data. Fields that require reporting of multiple values in a single field can be reported using a delimiter between the reported values. The choice of delimiter is left to the discretion of the trade repository but the delimiter usage must be the same in all files. Fields that allow multiple values for submission have a standard variable length of 500 characters as the data type regardless of how each trade repository is collecting from their participants. Public dissemination is required for the first 10 values in schedule fields.

1.2.4 Actions and Events

Appendix 3.5 illustrates how different events should be reported in transaction reporting, position reporting and end-of-day (valuation and collateral) reporting.

At a minimum, any data elements that are impacted as part of actions and events should be reported. It is at the trade repository's discretion whether other elements should be included for event message types.

¹⁰ Both upper case and lower case are allowed until the ISO 20022 message standard is adopted by CSA.

Corrections of valuation and collateral are allowed and should be reported using "VALU" and "MARU" action types.

1.2.5 Validations

Validations are generally intended to be the same as the CFTC's as specified in its Part 45 swap data reporting requirements when the Technical Manual data element is also required by the CFTC. A trade repository may limit the number of data elements required to be submitted for Action Type TERM, PRTO, and EROR.

Reporting Types:

Transaction = Creation data and Lifecycle Event data: Transaction means entering into, assigning, selling or otherwise acquiring or disposing of a derivative or the novation of a derivative. Each transaction must be reported as a unique derivative under the TR Rules.

Valuation= Valuation Data: Valuation data means data that reflects the current value of the derivative and includes the data in the elements listed in Appendix A under the heading "Data Elements Related to Valuation".

Collateral = Margin Data: Collateral and margin data means data that reflects the current amount of collateral and margin posted or collected as described in the elements listed in Appendix A under the heading "Data Elements Related to Collateral and Margin".

Values:

M=Mandatory (The data element is mandatory and any additional validation rules, if specified, must also be followed)

C= Conditional (The data element is required if the conditions set out in the validation rules are fulfilled. Additional validation rules, if specified, must also be followed)

NR= Not Required (The data element is not required to be included in the report)

O= Optional (The data element should be included in the transaction if applicable. Additional validation rules, if specified, may be applied when populated)

Leg-based data elements:

Validations in the Technical Manual included for leg-based data elements are meant to apply to the first leg (Leg 1). However, it should not be presumed that the validations apply similarly to the second leg (Leg 2). This is largely due to the conditionality between leg fields, and the fact that trade repository specific data elements can alter the application of published validations in ways not contemplated in the Technical Manual. Given this, trade repositories may incorporate other validations for leg-level data elements, should they deem it necessary.

A value may be provided where there is an else {blank}. It may be interpreted as "else optional".

1.2.6 Unique Product Identifier

Data elements related to underlying asset:

This set of data elements captures information related to underliers when the information cannot be derived from the UPI. These data elements apply to all asset classes and should support any underliers.

- Data element numbers 128 and 129 should be used when the UPI Service Provider does not receive the identifier and its source for a particular underlier. In these cases, values for both 'Underlier ID' and 'Underlier ID source' are submitted as 'OTHER' to the UPI service provider.
- Data element numbers 130 and 131 are necessary to determine the price of an underlier asset or index that cannot be derived from the given UPI.
- Data element number 121 is necessary to easily identify the derivative transactions based on crypto assets that cannot be identified from the given UPI.

1.2.7 Other payment fields

The set of data elements related to other payments can be reported multiple times in the case of multiple payments.

1.2.8 Packages

Package identifier should be used by reporting counterparties or entities responsible for reporting as a unique link between reports belonging to the same derivative contract, where the table of fields does not enable submitting the details in only one report and where the package transaction is composed of a combination of derivative contracts that are negotiated together as the product of a single economic agreement.

If a derivative contract ceases to exist, but gives rise to another derivative, those two contracts should be considered individually and not be reported as a package transaction, thus no package identifier should be used to link those reports in such circumstance, while at the same time the field 'Prior UTI' should be reported.

The reporting field 'Package transaction price' and 'Package transaction price currency' should be populated with the relevant price and currency for the entire package transaction rather than the price and currency of the individual components. If the individual components have individual prices and currencies those should be populated in the relevant report in field 'Price' and 'Price currency' in addition to the population of the field 'Package transaction price'.

1.2.9 Position reporting

Position reporting is an optional method of reporting for derivatives that meet the requirements under section 33.1 of the TR Rules. The "Position Reporting guidelines" in section 2.1 sets out how to report lifecycle events in relation to certain data elements. Lifecycle events may be reported at the position level in respect of all relevant data elements where derivatives meet these conditions. Refer to example 4.5 to review how positions are to be reported.

Positions may not be reported without previously reporting the derivatives separately at transaction level. Derivatives at transaction level should be updated to have an appropriate status, so that it is clear that they are no longer open and to avoid double-counting of the derivatives that were included in positions. The reporting counterparty should report the terminations of all the derivatives at transaction level that enter into the position. For new derivatives that are included in the position on the same day, action type "POSC" with no event type should be used. For derivatives that are included in the position on all other days, action type "TERM" and event type "INCP" should be used.

Where a position valuation becomes zero, there are only two possible ways to proceed:

- Termination of the position and reporting of a new one using a different UTI at a later stage. No valuations are reported between the termination of the first position and the creation of the latter.
- Maintaining the position open and reporting a zero contract value on a daily basis.

1.2.10 Prior UTI

Prior UTI should be assigned to the predecessor derivative that has given rise to the reported derivative due to a lifecycle event, in a one-to-one relation between derivatives. This data element is not applicable when reporting many-to-one and many-to-many relations between derivatives (e.g., in the case of a compression). In particular, the prior UTI will be applicable in the following events:

- a. Full or partial novation (reported with Action Type: NEWT and Event Type: NOVA and includes Prior UTI);
- b. Clearing;
- c. Exercise (in the case of swaptions),
- d. Allocation (reported with Action Type: NEWT and Event Type: ALOC and includes Prior UTI),
- e. Corporate event (in the case of a split).

1.3 Historical Derivatives

Counterparties should not create a new UTI for outstanding derivatives, even if the original UTI is not fully compliant with e.g., new format requirements under the Technical Manual. For existing derivatives that utilize a USI (Unique Swap Identifier), the trade repository can allow for these to be submitted in a separate data element.

All existing derivatives should eventually be updated with the new data requirements and reported using the action field Modify (MODI) and event type Upgrade (UPDT).

2 Technical Specifications

Data Elements Related to Counterparties

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
1	CDE	Counterparty 1 (reporting counterparty)	Identifier of the reporting counterparty.	<p>Identifier of the counterparty to an OTC derivative transaction¹¹ who is fulfilling its reporting obligation via the report in question.</p> <p>In jurisdictions where both parties must report the transaction, the identifier of Counterparty 1 always identifies the reporting counterparty.</p> <p>In the case of an allocated derivative transaction executed by a fund manager on behalf of a fund, the fund and not the fund manager is reported as the counterparty. However, if the allocation of the block trade to specific funds does not take place prior to the reporting deadline, then the fund manager executing the transaction on behalf of the fund can be reported as the counterparty.</p> <p>If a trading facility is fulfilling the reporting obligation, the identifier of Counterparty 1 identifies one of the counterparties to the transaction.</p>	Char(20) for an LEI code	<ul style="list-style-type: none"> • ISO 17442 LEI code that is included in the LEI data as published by the Global LEI Foundation (GLEIF, www.gleif.org). Data Elements Related to Derivatives

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
12	CDE	Effective date ¹⁷	Unadjusted date at which obligations under the derivative come into effect, as provided in the confirmation.	Unadjusted date at which obligations under the OTC derivative transaction come into effect, as included in the confirmation.	YYYY-MM-DD, based on UTC.	Any valid date based on ISO 8601 Date and time format.	Y	Transaction- M Collateral- NR Valuation- NR
13	CDE	Expiration date ¹⁸	Unadjusted date at which obligations under the derivative cease to be effective, as provided in the confirmation.	Unadjusted date at which obligations under the OTC derivative transaction stop being effective, as included in the confirmation. Early termination does not affect this data element.	YYYY-MM-DD, based on UTC.	Any valid date based on ISO 8601 Date and time format.	Y	Transaction- C if UPI.[ReturnorPayoutTrigger] is not 'Contract for Difference (CFD)' else {blank}. When populated, the value shall be equal to or later than the value in [Effective date] Collateral- NR Valuation- NR
14	CDE	Execution timestamp	Date and time of execution of a transaction.	Date and time a transaction was originally executed, resulting in the generation of a new UTI. This data element remains unchanged throughout the life of the UTI. ¹⁹	YYYY-MM-DDThh:mm:ssZ, based on UTC. ²⁰ If the time element is not required in a particular jurisdiction, time may be dropped given that – in the case of representations with reduced accuracy – ISO 8601 allows the complete representation to be omitted, the omission starting from the extreme right-hand side (in the order from the least to the most significant).	Any valid date/time.	Y	Transaction- M Collateral- NR Valuation- NR

¹⁷ For commodities swaps, report the pricing start date.

¹⁸ For commodities swaps, report the pricing end date.

¹⁹ For cleared derivatives, the execution timestamp is the date and time when the clearing agency accepts the original derivative for clearing.

²⁰ Both the date and time portion are required to be reported.

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
15	CDE	Reporting timestamp ²¹	Date and time of submission of the report to the trade repository.	Date and time of the submission of the report as reported to the trade repository.	YYYY-MM-DDThh:mm:ssZ, based on UTC.	Any valid date/time.	N	Transaction- M, the value shall be equal to or later than the value in [Execution timestamp] Collateral- M Valuation- M
16	CDE	Unique transaction identifier (UTI)	Unique identifier that identifies a derivative or position throughout its lifecycle.	A unique identifier assigned at the transaction or position level which identifies them uniquely throughout their lifecycle and used for all recordkeeping and reporting.	Varchar(52)	ISO 23897 Unique transaction identifier, up to 52 alphanumeric characters. New UTIs should be constructed solely from the upper-case alphabetic characters A-Z or the digits 0-9, inclusive in both cases. UTI is comprised of the LEI of the generating entity and a unique alphanumeric code.	N	Transaction- M Collateral- C if [Initial margin collateral portfolio code] = 'TRANSACTION-LEVEL', else {blank} Valuation- M
17	CDE	Prior UTI (for one-to-one and one-to-many relations between transactions)	UTI assigned to a derivative before the occurrence of a lifecycle event that resulted in the current derivative.	UTI assigned to the predecessor transaction that has given rise to the reported transaction due to a lifecycle event, in a one-to-one relation between transactions (e.g., in the case of a novation, when a transaction is terminated, and a new transaction is generated) or in a one-to-many relation between transactions (e.g., in clearing or if a transaction is split into several different transactions). This data element is not applicable when reporting many-to-one and many-to-many relations between transactions (e.g., in the case of a compression).	Varchar(52)	ISO 23897 Unique transaction identifier, up to 52 alphanumeric characters. New UTIs should be constructed solely from the upper-case alphabetic characters A-Z or the digits 0-9, inclusive in both cases.	N	Transaction- C if [Action type] = 'NEWT' and ([Event type] = 'NOVAT' or 'CLRG' or 'EXER' or 'ALOC' or 'CLAL') and [Prior USI (for one-to-one and one-to-many relations between transactions)] is not populated, else {blank} Collateral- NR Valuation- NR
18	ESMA	Subsequent position UTI	UTI of the position in which a derivative is included.	The UTI of the position in which a derivative is included. This field is applicable only for the reports related to the termination of a derivative due to its inclusion in a position.	Up to 52 alphanumeric characters, only the upper-case alphabetic characters A-Z and the digits 0-9 are allowed	Upper-case alphabetic characters A-Z and digits 0-9 allowed	N	Transaction - C if ([Action type] = 'POSC') or ([Action type] = 'TERM' and [Event type] = 'INCP'), else {blank} Collateral - NR Valuation - NR

²¹ Reporting timestamp (#15) is recorded and reported by the submitter.

71	CFTC	Floating rate reset frequency period multiplier [Floating rate reset frequency period multiplier-leg 1] [Floating rate reset frequency period multiplier-leg 2]	For each floating leg of a derivative, the number by which the floating rate reset frequency period is multiplied to determine the frequency of periodic payment dates in respect of a reset.	For each floating leg of the swap transaction, where applicable, number of time units (as expressed by the Floating rate reset frequency period) that determines the frequency at which periodic payment dates for reset occur. For example, a transaction with reset payments occurring every two months is represented with a Floating rate reset frequency period of "MNTH" (monthly) and a Floating rate reset frequency period multiplier of 2. This data element is not applicable if the Floating rate reset frequency period is "ADHO". If Floating rate reset frequency period is "EXPI", then the Floating rate reset frequency period multiplier is 1. If the reset frequency period is intraday, then the Floating rate reset frequency period is "DAIL" and the Floating rate reset frequency period multiplier is 0.	Num(3,0)	Any value greater than or equal to zero.	Y	Transaction C if [Floating rate reset frequency period] ≠ 'ADHO', else {blank} Collateral - NR Valuation - NR

Data Elements Related to Clearing

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
72	CDE	Cleared	Indicator of whether a derivative has been cleared, or is intended to be cleared, by a clearing agency.	Indicator of whether the transaction has been cleared, or is intended to be cleared, by a central counterparty. ³⁷	Char(1)	<ul style="list-style-type: none"> • Y = Yes, centrally cleared, for beta and gamma transactions. • N = No, not centrally cleared. • I = Intent to clear, for alpha transactions that are planned to be submitted to clearing. 	Y	Transaction- M Collateral - NR Valuation - NR
73	CDE	Central counterparty identifier	Identifier of the clearing agency that cleared the derivative.	Identifier of the central counterparty (CCP) that cleared the transaction. This data element is not applicable if the value of the data element "Cleared" is "N" ("No, not centrally cleared") or "I" ("Intent to clear").	Char(20)	ISO 17442 LEI code that is included in the LEI data as published by the Global LEI Foundation (GLEIF, www.gleif.org/).	N	Transaction - C if [Cleared] = 'Y', When populated, the value shall match the value in [Counterparty 1 (reporting counterparty)];

³⁷ References to "central counterparty" in CDE data element explanations should be read to mean clearing agency or, in Quebec, clearing house.

⁵⁶ The identifier which relates to the same event should be unique per event.

⁵⁷ Only one Action type value is allowed per submission. Multiple Action type values should not be submitted in one transaction report. For example, if a data element needs to be corrected on a previously submitted transaction that is getting terminated, the Correct (CORR) value should be submitted as a separate submission prior to the submission of the Terminate (TERM) transaction.

Data Elements Related to Valuation

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
101	CDE	Valuation amount ⁵⁸	Value of the derivative.	Current value of the outstanding contract without applying any valuation adjustments (some examples include XVA adjustment such as CVA, DVA, etc). Valuation amount is expressed as the exit cost of the contract or components of the contract, i.e., the price that would be received to sell the contract (in the market in an orderly transaction at the valuation date).	Num(25,5)	Any numerical value.	N	Transaction - NR Collateral - NR Valuation - M
102	CDE	Valuation currency	Currency in which the valuation amount is denominated.	Currency in which the valuation amount is denominated.	Char(3)	Currencies included in ISO 4217.	N	Transaction - NR Collateral - NR Valuation - M
103	CDE	Valuation method	Source and method used to value the derivative.	Source and method used for the valuation of the transaction by the reporting counterparty. If at least one valuation input is used that is classified as mark-to-model in Appendix 3.3, then the whole valuation is classified as mark-to-model. If only inputs are used that are classified as mark-to-market in Appendix 3.3, then the whole valuation is classified as mark-to-market.	Char(1)	<ul style="list-style-type: none"> • MTMA = Mark-to-market • MTMO = Mark-to-model • CCPV = Clearing agency's valuation (Classification of valuation inputs are provided in Appendix 3.3)	N	Transaction - NR Collateral - NR Valuation - M, when populated with 'CCPV', [Cleared] must be 'Y'
104	CDE	Valuation timestamp	Date and time that the value of the derivative referred to in Data Element Number 101 was determined.	Date and time of the last valuation marked to market, provided by the central counterparty (CCP) ⁵⁹ or calculated using the current or last available market price of the inputs. If for example a currency exchange rate is the basis for a transaction's valuation, then the valuation timestamp reflects the moment in time that exchange rate was current.	YYYY-MM-DDThh:mm:ssZ, based on UTC ⁶⁰ . If the time element is not required in a particular jurisdiction, time may be dropped given that – in the case of representations with reduced accuracy – ISO 8601 allows the complete representation to be omitted, the omission starting from the extreme right-hand side (in the order from the least to the most significant).	Any valid date/time based on ISO 8601 Date and time format.	N	Transaction - NR Collateral - NR Valuation - M

⁵⁸ Valuation amount must be reported daily regardless of whether there is a change in the value since the last reporting.

⁵⁹ Reported by the clearing agency for cleared derivatives and by the derivatives dealer for uncleared derivatives.

⁶⁰ The timestamp portion is not required to be represented for Valuation timestamp. The format must be reported as YYYY-MM-DD.

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
105	CFTC	Next floating reference reset date [Next floating reference reset date – Leg 1] [Next floating reference reset date – Leg 2]	Next date on which the floating reference will reset.	The nearest date in the future that the floating reference resets on.	YYYY-MM-DD	Any valid date based on ISO 8601 Date and time format.	N	Transaction - NR Collateral - NR Valuation - O
106	CFTC	Last floating reference value [Last floating reference value-Leg 1] [Last floating reference value-Leg 2]	Value of the floating reference on the date referred to in Data Element Number 107.	The most recent sampling of the value of the floating reference for the purposes of determining cash flow. Ties to Last floating reference reset date data element.	Num(11,10)	Positive and negative values expressed as decimal (e.g., 0.0257 instead of 2.57%)	N	Transaction - NR Collateral - NR Valuation - O
107	CFTC	Last floating reference reset date [Last floating reference reset date-Leg 1] [Last floating reference reset date-Leg 2]	Most recent date of the floating reference reset.	The date of the most recent sampling of the floating reference for the purposes of determining cash flow. Ties to Last floating reference value data element.	YYYY-MM-DD	Any valid date based on ISO 8601 Date and time format.	N	Transaction - NR Collateral - NR Valuation - O
108	CDE	Delta ⁶¹	Ratio of the change in the price of the derivative to the change in the price of the underlying interest of the derivative.	The ratio of the change in the price of an OTC derivative transaction to the change in the price of the underlier.	Num(25,5)	Any value	N	Transaction - NR Collateral - NR Valuation - C if UPI.[Instrument type] = 'Option', else {blank}

⁶¹ Delta must be reported daily regardless of whether there is a change in the value since the last reporting.

Data Elements Related to Packages

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
109	CFTC	Package indicator	Indicator of whether the derivative is a component of a package if (a) 2 or more derivatives that are reported separately by the reporting counterparty are entered into under a single agreement, or (b) 2 or more reports relate to the same derivative and the derivative cannot be reported using a single report as a result of the reporting requirements of one or more jurisdictions of Canada or one or more foreign jurisdictions.	Indicator of whether the swap transaction is part of a package transaction.	Boolean	<ul style="list-style-type: none"> • True • False 	Y	Transaction - M Collateral - NR Valuation - NR
110	CDE	Package identifier ⁶²	Identifier of the package referred to in Data Element Number 109.	Identifier (determined by the reporting counterparty) in order to connect <ul style="list-style-type: none"> • two or more transactions that are reported separately by the reporting counterparty, but that are negotiated together as the product of a single economic agreement. • two or more reports pertaining to the same transaction whenever jurisdictional reporting requirement does not allow the transaction to be reported with a single report to trade repositories. 	Varchar(100)	Up to 100 alphanumeric characters. ⁶⁴	N	Transaction - C if [Package indicator] = 'True', else {blank} Collateral - NR Valuation - NR

⁶² To report a collar, this field should be populated to link the cap and floor legs. To report a straddle, this field should be populated to link the payer swaption and receiver swaption legs.

⁶⁴ "UNKNOWN" is accepted when the value is not available.

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
				<p>A package⁶³ may include reportable and non-reportable transactions.</p> <p>This data element is not applicable</p> <ul style="list-style-type: none"> • if no package is involved, or • to allocations <p>Where the package identifier is not known when a new transaction is reported, the package identifier is updated as it becomes available.</p>				
111	CDE	Package transaction price	Price of the package referred to in Data Element Number 109.	<p>Traded price of the entire package in which the reported derivative transaction is a component. This data element is not applicable if</p> <ul style="list-style-type: none"> • no package is involved, or • package transaction spread is used <p>Prices and related data elements of the transactions (Price currency, Price notation, Price unit of measure) that represent individual components of the package are reported when available.</p> <p>The Package transaction price may not be known when a new transaction is reported but may be updated later</p>	<ul style="list-style-type: none"> • Num(18,13), if Package transaction price notation = 1 • Num(11,10), if Package transaction price notation = 3 	<ul style="list-style-type: none"> • Any value, if Package transaction price notation = 1 • Any value expressed as decimal (e.g., 0.0257 instead of 2.57%), if Package transaction price notation = 3⁶⁵ 	N	<p>Transaction - C if [Package indicator] = 'True' and [Package transaction spread] is not populated, else {blank}</p> <p>Collateral - NR</p> <p>Valuation - NR</p>

⁶⁶ Default value with all 9's, for any of the allowable formats, is accepted when the value is unknown. When [Package transaction price notation] = '1' use "99999.999999999999" (18 numerical characters including 13 decimal places). When [Package transaction price notation] = '3' use "9.999999999" (11 numerical characters including 10 decimal places). When [Package transaction spread notation] = '4' use "99999" (5 numerical characters with no decimal places).

Data Elements Related to Product

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
117	CDE	Unique product identifier ⁶⁷	Identifier of a unique code assigned by the Derivatives Service Bureau for a type of derivative.	A unique set of characters that represents a particular OTC derivative.	Char(12)	A list of allowable values and their format will be published by the Derivatives Service Bureau (UPI issuer). Until the above UPI is available reporting counterparties will continue to report the product-related data elements unique to each TR.	Y	Transaction- M Collateral - NR Valuation - NR
118	CDE	CDS index attachment point	Point at which the level of losses in the underlying portfolio of a credit default swap reduces the notional of a tranche.	Defined lower point at which the level of losses in the underlying portfolio reduces the notional of a tranche. For example, the notional in a tranche with an attachment point of 3% will be reduced after 3% of losses in the portfolio have occurred. This data element is not applicable if the transaction is not a CDS tranche transaction (index or custom basket).	Num(11,10)	Any value between 0 and 1 (including 0 and 1), expressed as decimal (e.g., 0.05 instead of 5%).	N	Transaction - CR C if UPI. Underlier type = 'Index tranche', else {blank}; When populated, the value shall be less than the value in [CDS index detachment point]; Transaction – IR/FX/CO/EQ - NR Collateral - NR Valuation - NR
119	CDE	CDS index detachment point	Point beyond which losses in the underlying portfolio of a credit default swap no longer reduce the notional of a tranche.	Defined point beyond which losses in the underlying portfolio no longer reduce the notional of a tranche. For example, the notional in a tranche with an attachment point of 3% and a detachment point of 6% will be reduced after there have been 3% of losses in the portfolio. 6% losses in the portfolio deplete the notional of the tranche. This data element is not applicable if the transaction is not a CDS tranche transaction (index or custom basket).	Num(11,10)	Any value between 0 and 1 (including 0 and 1), expressed as decimal (e.g., 0.05 instead of 5%).	N	Transaction - CR C if UPI. Underlier type = 'Index tranche', else {blank}; When populated, the value shall be greater than the value in [CDS index attachment point] Transaction – IR/FX/CO/EQ - NR Collateral -NR Valuation -NR

⁶⁷ Refer to section 1.2.6 *Use of UPI Instrument Types* for explanation on Unique Product Identifiers

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
120	CFTC	Index factor	Factor of the index version, or the percentage, used to determine the notional amount of a credit default swap.	The index version factor or percent, expressed as a decimal value, that multiplied by the Notional amount yields the notional amount covered by the seller of protection for credit default swap.	Num(11,10)	Any value between 0 and 1 (including 0 and 1), expressed as decimal (e.g., 0.05 instead of 5%).	Y	Transaction - CR C if UPI.Underlier type= 'Index' or 'Index tranche'; else {blank} Transaction – IR/FX/CO/EQ - NR Collateral NR Valuation NR
121	CDE	Crypto asset underlying indicator [Crypto asset underlying indicator – Leg 1] [Crypto asset underlying indicator – Leg 2]	Indicator of whether the underlying interest of the derivative is a crypto asset.	Indicator of whether the underlying of the derivative is crypto asset. This element should be reported as 'true' if any of the underlyings is a crypto asset (immediate or ultimate underlying as well as where the derivative is based on a mix of crypto assets and other underlyings).	Boolean	<ul style="list-style-type: none"> • true, if underlying is a crypto asset • false, if underlying is not crypto asset 	N	Transaction – CO O Collateral – NR Valuation - NR
122	CDE	Custom basket code	Unique identifier for a custom basket of reference assets.	If the OTC derivative transaction is based on a custom basket, unique code assigned by the structurer of the custom basket to link its constituents. This data element is not applicable if no custom basket is involved or no unique code has been assigned to it.	Varchar(72)	ISO 17442 Legal Entity Identifier (LEI) code of the basket structurer ⁶⁸ followed by a unique identifier up to 52 alphanumeric characters.	N	Transaction – C if [Custom basket indicator] = 'True', else {blank} Collateral – NR Valuation – NR
123	CFTC	Custom basket indicator	Indicator of whether the derivative has a custom basket as its underlying interest.	Indicator of whether the swap transaction is based on a custom basket.	Boolean	<ul style="list-style-type: none"> • True • False 	Y	Transaction -M Collateral - NR Valuation - NR

⁶⁸The LEI code should represent the LEI of the entity assigning the basket code.

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
124	CDE	Basket constituent identifier	Identifier of a reference asset in the custom basket.	An identifier that represents a constituent of an underlying custom basket in line with the Underlier ID within the ISO 4914 UPI reference data elements, as maintained by the UPI Service Provider or in line with an identifier that would be reported as an Underlier ID (Other) where the UPI Underlier ID is 'OTHER'. This data element is not applicable if no custom basket is involved.	Varchar(350)	An identifier that can be used to determine an asset, index or benchmark included in a basket. ⁶⁹ Up to 350 alphanumeric characters.	N	Transaction – C if [Custom basket indicator] = 'True', else {blank} Collateral – NR Valuation - NR
125	CDE	Basket constituent identifier source	Source of the basket constituent identifier referred to in Data Element Number 124.	The origin, or publisher, of the associated Basket constituent identifier, in line with the Underlier ID source within the ISO 4914 UPI reference data elements as maintained by the UPI Service Provider or in line with the allowable value that would be reported as an Underlier ID (Other) source where the UPI Underlier ID is 'OTHER'. This data element is not applicable if no custom basket is involved.	Varchar(350)	The origin, or publisher ⁷⁰ , of the associated basket constituent identifier. Up to 350 alphanumeric characters.	N	Transaction – C if [Basket constituent identifier] is populated, else {blank} Collateral - NR Valuation - NR
126	CDE	Basket constituent number of units	Number of units of each reference asset in the custom basket.	The number of units of a particular constituent in a custom basket. This data element is not applicable if no custom basket is involved.	Num(18,13)	Any value greater than zero. ⁷¹	N	Transaction – C if [Basket constituent identifier] is populated, else {blank} The number of constituent number of units values must equal the number of constituent identifier, unit of measure, and identifier source values. Collateral – NR Valuation - NR

⁶⁹ In line with the Underlier ID within the UPI reference data elements, as maintained by the UPI service provider, or in accordance with section 5.2 of the CPMI-IOSCO Technical Guidance: Harmonization of the Unique Product Identifier.

⁷⁰ In line with the Underlier ID within the UPI reference data elements, as maintained by the UPI service provider, or in accordance with section 5.2 of the CPMI-IOSCO Technical Guidance: Harmonization of the Unique Product Identifier.

⁷¹ For commodities baskets where calculated formula of different % weights of indices are used, provide values without the %. For example, 10% should be reported as “10”.

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
127	CDE	Basket constituent unit of measure	Unit of measure in which the number of units referred to in Data Element Number 126 is expressed.	Unit of measure in which the number of units of a particular custom basket constituent is expressed. This data element is not applicable if no custom basket is involved.	Char(4)	ISO 20022 approved external UnitOfMeasureCode codeset	N	Transaction – C if [Basket constituent identifier] is populated, else {blank} The number of constituent unit of measure values must equal the number of constituent identifier, number of units, and identifier source values. Collateral – NR Valuation – NR
128	CDE	Underlier ID (Other) [Underlier ID (Other) – Leg 1] [Underlier ID (Other) – Leg 2]	Identifier of each underlying interest of the derivative.	The asset(s), index (indices) or benchmark underlying a contract or, in the case of a foreign exchange derivative, identification of index. ⁷² This data element is applicable when the value of Underlier ID is submitted as 'OTHER' to the UPI service provider. ⁷³	Varchar(350)	An identifier ⁷⁴ that can be used to determine the asset(s), index (indices) or benchmark underlying a contract. Up to 350 alphanumeric characters.	N	Transaction – C if UPI.[Underlier ID ⁷⁵] = 'Other', else {blank} Collateral – NR Valuation - NR
129	CDE	Underlier ID (Other) source [Underlier ID (Other) source – Leg 1] [Underlier ID (Other) source – Leg 2]	Source of the Underlier ID (Other) referred to in Data Element Number 128.	The origin, or publisher, of the associated Underlier ID (Other). This data element is applicable when the value of Underlier ID source is submitted as 'OTHER' to the UPI service provider.	Varchar(350)	The origin, or publisher ⁷⁶ , of the associated Underlier ID. Up to 350 alphanumeric characters.	N	Transaction – C if [Underlier ID (Other)] is populated, else {blank} Collateral – NR Valuation - NR

⁷² If more than one underlier exists, the derivative should be considered a basket and the corresponding basket fields should be used.

⁷³ When a particular underlier ID is not supported by the UPI service provider (Underlier ID is 'Other'), that underlier ID is reported in this field to the trade repository.

⁷⁴ In line with the Underlier ID within the UPI reference data elements, as maintained by the UPI service provider, or in accordance with section 5.2 of the CPMI-IOSCO Technical Guidance: Harmonization of the Unique Product Identifier.

⁷⁵ Depending on the product DSB may use attributes with names such as Reference Rate, Underlying Instrument Index, Underlying instrument ISIN, Underlying instrument LEI, or another name to denote the asset or index underlying the derivative.

⁷⁶ In line with the Underlier ID within the UPI reference data elements, as maintained by the UPI service provider, or in accordance with section 5.2 of the CPMI-IOSCO Technical Guidance: Harmonization of the Unique Product Identifier.

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
130	CDE	Underlying asset trading platform identifier [Underlying asset trading platform identifier – Leg 1] Underlying asset trading platform identifier – Leg 2]	Identifier of the platform on which the underlying interest referred to in Data Element Number 128 is traded.	For a platform (e.g. exchange) traded underlying asset, the platform on which the asset is traded. ⁷⁷ This data element is not applicable to OTC derivative transactions with custom basket constituents.	Char(4)	ISO 10383 Segment Market Identifier Code (MIC)	N	Transaction – EQ/CR O Collateral – NR Valuation - NR
131	CDE	Underlying asset price source [Underlying asset price source – Leg 1] [Underlying asset price source – Leg 2]	Source of the price used to determine the value or level of the underlying interest referred to in Data Element Number 128.	For an underlying asset or benchmark not traded on a platform, the source of the price used to determine the value or level of the asset or benchmark. This data element is not applicable to OTC derivative transactions with custom basket constituents.	Varchar(50)	Up to 50 alphanumeric characters.	N	Transaction – O Collateral – NR Valuation - NR
132	CFTC	Embedded option type	Type of optional provision in a derivative.	Type of option or optional provision embedded in a contract.	Char(4)	<ul style="list-style-type: none"> • MDET = Mandatory early termination • OPET = Optional early termination • CANC = Cancelable • EXTD = Extendible • OTHR = Other 	Y	Transaction - O Collateral - NR Valuation - NR

⁷⁷ The platform provided should be the platform from where the underlying asset gets its pricing information.

Data Elements Related to Payments and Settlement

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
133	CDE	Final contractual settlement date	Date in the agreement by which all obligations under the derivative are to be satisfied.	Unadjusted date as per the contract, by which all transfer of cash or assets should take place and the counterparties should no longer have any outstanding obligations to each other under that contract. For products that may not have a final contractual settlement date (e.g., American options), this data element reflects the date by which the transfer of cash or asset would take place if termination were to occur on the expiration date.	YYYY-MM-DD, based on UTC.	Any valid date.	N	Transaction -C if UPI.[ReturnorPayoutTrigger] is not 'Contract for Difference (CFD)', else {blank}. When populated, - the value shall be equal to or later than the value in [Expiration date] Collateral - NR Valuation - NR
134	CDE	Settlement location	Place of settlement of the derivative.	Place of settlement of the transaction as stipulated in the contract. This data element is only applicable for transactions that involve an offshore currency (i.e. a currency which is not included in the ISO 4217 currency list, for example CNH).	Char(2)	ISO 3166 Country codes (using two-letter code (alpha-2))	N	Transaction - O Collateral - NR Valuation - NR
135	CDE	Settlement currency [Settlement currency-Leg 1] [Settlement currency-Leg 2]	For each leg of the derivative, the currency in which the cash settlement is denominated.	Currency for the cash settlement of the transaction when applicable. For multi-currency products that do not net, the settlement currency of each leg. This data element is not applicable for physically settled products (e.g., physically settled swaptions).	Char(3)	Currencies included in ISO 4217 Currency codes.	Y	Transaction - C if UPI.[Delivery type] = 'Cash', else {blank} Collateral - NR Valuation - NR
136	CDE	Other payment amount ⁷⁸	Amount of each payment under the derivative except an option premium amount under Data Element Number 144.	Payment amounts with corresponding payment types to accommodate requirements of transaction descriptions from different asset classes.	Num(25,5)	Any value greater than or equal to zero.	Y	Transaction - C if [Other payment type] is populated, else {blank} Collateral - NR Valuation - NR

⁷⁸ The set of data elements related to other payments (Other payment type [#141], Other payment amount [#142], Other payment currency [#143], Other payment date [#144], Other payment payer [#139], Other payment receiver [#140]) can be reported multiple times in the case of multiple payments.

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
137	CDE	Other payment currency	Currency in which the other payment amount referred to in Data Element Number 136 is denominated.	Currency in which Other payment amount is denominated.	Char(3)	Currencies included in ISO 4217.	Y	Transaction - C if [Other payment amount] is populated, else {blank} Collateral - NR Valuation - NR
138	CDE	Other payment date	Date on which the other payment amount referred to in Data Element Number 136 is to be paid.	Unadjusted date on which the Other payment amount is paid.	YYYY-MM-DD, based on UTC.	Any valid date.	N	Transaction - C if [Other payment amount] is populated, else {blank} Collateral - NR Valuation - NR
139	CDE	Other payment payer	Identifier of the payer of the other payment amount referred to in Data Element Number 136.	Identifier of the payer of Other payment amount.	<ul style="list-style-type: none"> Char(20) for an LEI code or Varchar(72), for natural persons who are acting as private individuals and not eligible for an LEI per the ROC Statement - Individuals Acting in a Business Capacity or Varchar(72), Internal identifier code for a non-reporting counterparty subject to Blocking Law 	<p>ISO 17442 LEI code that is included in the LEI data as published by the Global LEI Foundation (GLEIF, www.gleif.org/).</p> <p>For natural persons who are acting as private individuals(not eligible for an LEI per the ROC Statement – Individuals Acting in a Business Capacity): LEI of the reporting counterparty followed by a unique identifier assigned and maintained consistently by the reporting counterparty for that natural person(s) for regulatory reporting purpose.</p> <p>An internal identifier code as non-reporting counterparty identifier if such counterparty or transaction is subject to Blocking Law and the reporting counterparty has exemptive relief from such derivatives data reporting requirements.</p>	N	Transaction - C if [Other payment amount] is populated, else {blank} Collateral - NR Valuation - NR
140	CDE	Other payment receiver	Identifier of the receiver of the other payment amount referred to in Data Element Number 136.	Identifier of the receiver of Other payment amount.	<ul style="list-style-type: none"> Char(20) for an LEI code or Varchar(72), for natural persons who are acting as private individuals and not eligible for an LEI per the ROC Statement - Individuals Acting in a Business Capacity or Varchar(72), Internal identifier code for a non- 	<p>ISO 17442 LEI code that is included in the LEI data as published by the Global LEI Foundation (GLEIF, www.gleif.org/).</p> <p>For natural persons who are acting as private individuals(not eligible for an LEI per the ROC Statement – Individuals Acting in a Business Capacity): LEI of the reporting counterparty followed by a unique identifier assigned and maintained consistently by the reporting</p>	N	Transaction - C if [Other payment amount] is populated, else {blank} Collateral - NR Valuation - NR

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
					reporting counterparty subject to Blocking Law	counterparty for that natural person(s) for regulatory reporting purpose. An internal identifier code as non-reporting counterparty identifier if such counterparty or transaction is subject to Blocking Law and the reporting counterparty has exemptive relief from such derivatives data reporting requirements.		
141	CDE	Other payment type	Reason for the payment referred to in Data Element Number 136.	Type of Other payment amount. Option premium payment is not included as a payment type as premiums for option are reported using the option premium dedicated data element.	Char(4)	<ul style="list-style-type: none"> • UFRO = Upfront Payment, i.e., the initial payment made by one of the counterparties either to bring a transaction to fair value or for any other reason that may be the cause of an off-market transaction • UWIN = Unwind or Full termination, i.e., the final settlement payment made when a transaction is unwound prior to its end date; Payments that may result due to full termination of derivative transaction(s) • PEXH = Principal Exchange, i.e., Exchange of notional values for cross-currency swaps 	Y	Transaction - CR C, at least one is required: ([Fixed rate] or [Spread] or [Other payment type] = 'UFRO'). Allowable values UWIN' and PEXH' are optional and independent of the above condition Transaction – IR/FX/EQ/CO O Collateral - NR Valuation - NR
142	CDE	Payment frequency period ⁷⁹ [Fixed rate payment frequency period-Leg 1] [Fixed rate payment frequency period-Leg 2] [Floating rate payment frequency period-Leg 1] [Floating rate payment frequency period-Leg 2]	For each leg of a derivative, the unit of time of the frequency of payments.	For each leg of the transaction, where applicable: time unit associated with the frequency of payments, e.g., day, week, month, year or term of the stream.	Char(4)	<ul style="list-style-type: none"> • DAIL = Daily • WEEK = Weekly • MNTH = Monthly • YEAR = Yearly • ADHO = Ad hoc which applies when payments are irregular • EXPI⁸⁰ = Payment at term 	Y	Transaction – CR/IR/EQ/CO O when populated with 'EXPI', [Payment frequency period multiplier] must be '1' Transaction – FX - NR Collateral - NR Valuation - NR

⁷⁹ To represent quarterly payment, report [Payment frequency period] = 'MNTH' and [Payment frequency period multiplier] = '3'. For semi-annual payment, report [Payment frequency period] = 'MNTH' and [Payment frequency period multiplier] = '6'.

⁸⁰ Throughout this Technical Manual, for the allowable value 'EXPI' in frequency period related data elements, two different descriptions 'Payment at term' and 'End of term' are being used which in essence has the same meaning and represents the frequency/rate of payment/quantity.

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
143	CDE	Payment frequency period multiplier [Fixed rate payment frequency period multiplier-Leg 1] [Fixed rate payment frequency period multiplier-Leg 2] [Floating rate payment frequency period multiplier-Leg 1] [Floating rate payment frequency period multiplier-Leg 2]	For each leg of a derivative, the number by which the payment frequency period is multiplied to determine the frequency of periodic payment dates.	For each leg of the transaction, where applicable: number of time units (as expressed by the Payment frequency period) that determines the frequency at which periodic payment dates occur. For example, a transaction with payments occurring every two months is represented with a Payment frequency period of "Mnth" (monthly) and a Payment frequency period multiplier of 2. This data element is not applicable if the Payment frequency period is "ADHO." If Payment frequency period is "EXPI", then the Payment frequency period multiplier is 1. If the Payment frequency is intraday, then the Payment frequency period is "DAIL" and the Payment frequency multiplier is 0.	Num(3,0)	Any value greater than or equal to zero.	Y	Transaction – CR/IR/EQ/CO C if [Payment frequency period] ≠ 'ADHO', else {blank} Transaction – FX - NR Collateral - NR Valuation - NR
144	CDE	Option premium amount	Premium paid by a buyer of an option or swaption.	For options and swaptions of all asset classes, monetary amount paid by the option buyer. This data element is not applicable if the instrument is not an option or does not embed any optionality.	Num(25,5)	Any value greater than or equal to zero.	Y	Transaction C if UPI.[Instrument type] = 'Option', else {blank} Collateral - NR Valuation - NR
145	CDE	Option premium currency	Currency in which the premium referred to in Data Element Number 144 is denominated.	For options and swaptions of all asset classes, currency in which the option premium amount is denominated. This data element is not applicable if the instrument is not an option or does not embed any optionality.	Char(3)	Currencies included in ISO 4217.	Y	Transaction C if [Option premium amount] > 0, else {blank} Collateral - NR Valuation - NR
146	CDE	Option premium payment date	Date on which the premium referred to in Data Element Number 144 is paid.	Unadjusted date on which the option premium is paid.	YYYY-MM-DD, based on UTC.	Any valid date based on ISO 8601 Date and time format.	N	Transaction C if [Option premium amount] > 0, else {blank} Collateral - NR Valuation - NR

Data Element Number	Source	Data Element Name	Data Element Description <i>(from Appendix A to the TR Rules)</i>	Detailed Explanation of Data Element	Format	Values	Made Available to the Public	Validations
147	CDE	First exercise date	First date on which an option can be exercised.	<p>First unadjusted date during the exercise period in which an option can be exercised.</p> <p>For European-style options, this date is same as the Expiration date. For American-style options, the first possible exercise date is the unadjusted date included in the Execution timestamp.</p> <p>For knock-in options, where the first exercise date is not known when a new transaction is reported, the first exercise date is updated as it becomes available.</p> <p>This data element is not applicable if the instrument is not an option or does not embed any optionality.</p>	YYYY-MM-DD, based on UTC.	Any valid date based on ISO 8601 Date and time format.	Y	<p>Transaction C if UPL.[Instrument type] = 'Option', else {blank}</p> <p>Collateral - NR</p> <p>Valuation - NR</p>
148	CFTC	Fixing date [Fixing date-Leg 1] [Fixing date-Leg 2]	For each leg of a derivative, the date on which the reference rate is determined.	Describes the specific date when a non-deliverable forward as well as various types of FX OTC options such as cash-settled options will "fix" against a particular exchange rate, which will be used to compute the ultimate cash settlement.	YYYY-MM-DD	Any valid date based on ISO 8601 Date and time format.	N	<p>Transaction – CR/IR/EQ/CO O Transaction - FX C if (UPL.[Instrument type] = 'Forward' or 'Option') and UPL.[Delivery type] = 'Cash', else {blank}</p> <p>Collateral - NR</p> <p>Valuation - NR</p>

2.1 Position reporting guidelines

Data Element Name	Detailed Explanation of Data Element	Position Reporting
Buyer identifier	<p>Identifier of the counterparty that is the buyer, as determined at the time of the transaction.</p> <p>A non-exhaustive list of examples of instruments for which this data element could apply are:</p> <ul style="list-style-type: none"> • most forwards and forward-like contracts (except for foreign exchange forwards and foreign exchange non-deliverable forwards) • most options and option-like contracts including swaptions, caps and floors • credit default swaps (buyer/seller of protection) • variance, volatility and correlation swaps • contracts for difference and spreadbets 	Where Buyer Identifier is applicable, the buyer/seller determination is made on the net of all position components.

	This data element is not applicable to instrument types covered by data elements Payer identifier and Receiver identifier.	
Seller identifier	<p>Identifier of the counterparty that is the seller as determined at the time of the transaction.</p> <p>A non-exhaustive list of examples of instruments for which this data element could apply are:</p> <ul style="list-style-type: none"> • most forwards and forward-like contracts (except for foreign exchange forwards and foreign exchange non-deliverable forwards) • most options and option-like contracts including swaptions, caps and floors • credit default swaps (buyer/seller of protection) • variance, volatility and correlation swaps • contracts for difference and spreadbets <p>This data element is not applicable to instrument types covered by data elements Payer identifier and Receiver identifier.</p>	Where Seller Identifier is applicable, the buyer/seller determination is made on the net of all position components.
Payer identifier [Payer identifier–Leg 1] [Payer identifier–Leg 2]	<p>Identifier of the counterparty of the payer leg as determined at the time of the transaction.</p> <p>A non-exhaustive list of examples of instruments for which this</p> <ul style="list-style-type: none"> • most swaps and swap-like contracts including interest rate swaps, credit total return swaps, and equity swaps (except for credit default swaps, variance, volatility, and correlation swaps) • foreign exchange swaps, forwards, non-deliverable forwards <p>This data element is not applicable to instrument types covered by data elements Buyer identifier and Seller identifier.</p>	Where Payer Identifier is applicable, the payer/receiver determination is made on the net of all position components.
Receiver identifier [Receiver identifier–Leg 1] [Receiver identifier–Leg 2]	<p>Identifier of the counterparty of the receiver leg as determined at the time of the transaction.</p> <p>A non-exhaustive list of examples of instruments for which this data element could apply are:</p> <ul style="list-style-type: none"> • most swaps and swap-like contracts including interest rate swaps, credit total return swaps, and equity swaps (except for credit default swaps, variance, volatility, and correlation swaps) • foreign exchange swaps, forwards, non-deliverable forwards <p>This data element is not applicable to instrument types covered by data elements Buyer identifier and Seller identifier.</p>	Where Receiver Identifier is applicable, the payer/receiver determination is made on the net of all position components.
Effective date	Unadjusted date at which obligations under the OTC derivative transaction come into effect, as included in the confirmation.	Effective date initially reported when position was entered into.
Unique transaction identifier (UTI)	A unique identifier assigned to all derivatives reported at the transaction or position level which identifies it uniquely throughout its lifecycle and used for all recordkeeping.	New UTI created for position.
Notional amount [Notional amount–Leg 1] [Notional amount–Leg 2]	<p>For each leg of the transaction, where applicable:</p> <ul style="list-style-type: none"> • for OTC derivative transactions negotiated in monetary amounts, the amount specified in the contract. • for OTC derivative transactions negotiated in non-monetary amounts, refer to Appendix 3.1 for converting notional amounts for non-monetary amounts. <p>In addition:</p> <ul style="list-style-type: none"> • For OTC derivative transactions with a notional amount schedule, the initial notional amount, agreed by the counterparties at the inception of the transaction, is reported in this data element. • For OTC foreign exchange options, in addition to this data element, the amounts are reported using the data elements Call amount and Put amount. • For amendments or lifecycle events, the resulting outstanding notional amount is reported; (steps in notional amount schedules are not considered to be amendments or lifecycle events); • Where the notional amount is not known when a new transaction is reported, the notional amount is updated as it becomes available. 	The notional amount is calculated as the net of buyer/seller or payer/receiver position components.
Call amount [Call amount–Leg 1] [Call amount–Leg 2]	For foreign exchange options, the monetary amount that the option gives the right to buy.	The call amount is calculated as the sum of all call amounts included in the position.
Put amount	For foreign exchange options, the monetary amount that the option gives the right to sell.	The put amount is calculated as the sum of all put amounts included in the position.

[Put amount-Leg 1]		
[Put amount-Leg 2]		
Notional quantity [Notional quantity-Leg 1] [Notional quantity-Leg 2]	For each leg of the transaction, where applicable, for derivative transactions negotiated in non-monetary amounts with fixed notional quantity for each schedule period (e.g., 50 barrels per month). The frequency is reported in Quantity frequency and the unit of measure is reported in Quantity unit of measure.	The notional quantity is calculated as the net of buyer/seller position components' notional quantity.
Total notional quantity [Total notional quantity-Leg 1] [Total notional quantity-Leg 2]	For each leg of the transaction, where applicable: aggregate Notional quantity of the underlying asset for the term of the transaction. Where the Total notional quantity is not known when a new transaction is reported, the Total notional quantity is updated as it becomes available.	The total notional quantity is calculated as the net of buyer/seller position components' total notional quantity.
Price	Price specified in the OTC derivative transaction. It does not include fees, taxes or commissions. For commodity fixed/float swaps and similar products with periodic payments, this data element refers to the fixed price of the fixed leg(s). For commodity and equity forwards and similar products, this data element refers to the forward price of the underlying or reference asset. For equity swaps, portfolios swaps, and similar products, this data element refers to the initial price of the underlying or reference asset. For contracts for difference and similar products, this data element refers to the initial price of the underlier. This data element is not applicable to: <ul style="list-style-type: none"> • Interest rate swaps and forward rate agreements, as it is understood that the information included in the data elements Fixed rate and Spread may be interpreted as the price of the transaction. • Interest rate options and interest rate swaptions as it is understood that the information included in the data elements Strike price and Option premium may be interpreted as the price of the transaction. • Commodity basis swaps and the floating leg of commodity fixed/float swaps as it is understood that the information included in the data element Spread may be interpreted as the price of the transaction. • Foreign exchange swaps, forwards and options, as it is understood that the information included in the data elements Exchange rate, Strike price, and Option premium may be interpreted as the price of the transaction. • Equity options as it is understood that the information included in the data elements Strike price and Option premium may be interpreted as the price of the transaction. • Credit default swaps and credit total return swaps, as it is understood that the information included in the data elements Fixed rate, Spread and Upfront payment (Other payment type: Upfront payment) may be interpreted as the price of the transaction. • Commodity options, as it is understood that the information included in the data elements Strike price and Option premium may be interpreted as the price of the transaction. Where the price is not known when a new transaction is reported, the price is updated as it becomes available. For transactions that are part of a package, this data element contains the price of the component transaction where applicable.	Volume Weighted Average Price.
Spread [Spread-Leg 1] [Spread-Leg 2]	For each leg of the transaction, where applicable: for OTC derivative transactions with periodic payments (e.g. interest rate fixed/float swaps, interest rate basis swaps, commodity swaps), <ul style="list-style-type: none"> • spread on the individual floating leg(s) index reference price, in the case where there is a spread on a floating leg(s). For example, USD-LIBOR-BBA plus .03 or WTI minus USD 14.65; or • difference between the reference prices of the two floating leg indexes. For example, the 9.00 USD "Spread" for a WCS vs. WTI basis swap where WCS is priced at 43 USD and WTI is priced at 52 USD. 	Volume Weighted Average Spread.
Initial margin posted by the reporting counterparty (post-haircut)	Monetary value of initial margin that has been posted by the reporting counterparty, including any margin that is in transit and pending settlement unless inclusion of such margin is not allowed under the jurisdictional requirements. If the collateralisation is performed at portfolio level, the initial margin posted relates to the whole portfolio; if the collateralisation is performed for single transactions, the initial margin posted relates to such single transaction.	Sum of initial margin posted for all derivatives in the same position.

	<p>This refers to the total current value of the initial margin after application of the haircut (if applicable), rather than to its daily change. The data element refers both to uncleared and centrally cleared transactions. For centrally cleared transactions, the data element does not include default fund contributions, nor collateral posted against liquidity provisions to the clearing agency, i.e., committed credit lines.</p> <p>If the initial margin posted is denominated in more than one currency, those amounts are converted into a single currency chosen by the reporting counterparty and reported as one total value.</p>	
Initial margin posted by the reporting counterparty (pre-haircut)	<p>Monetary value of initial margin that has been posted by the reporting counterparty, including any margin that is in transit and pending settlement unless inclusion of such margin is not allowed under the jurisdictional requirements.</p> <p>If the collateralisation is performed at portfolio level, the initial margin posted relates to the whole portfolio; if the collateralisation is performed for single transactions, the initial margin posted relates to such single transaction. This refers to the total current value of the initial margin, rather than to its daily change.</p> <p>The data element refers both to uncleared and centrally cleared transactions. For centrally cleared transactions, the data element does not include default fund contributions, nor collateral posted against liquidity provisions to the clearing agency, i.e., committed credit lines.</p> <p>If the initial margin posted is denominated in more than one currency, those amounts are converted into a single currency chosen by the reporting counterparty and reported as one total value.</p>	Sum of initial margin posted for all derivatives in the same position.
Initial margin collected by the reporting counterparty (post-haircut)	<p>Monetary value of initial margin that has been collected by the reporting counterparty, including any margin that is in transit and pending settlement unless inclusion of such margin is not allowed under the jurisdictional requirements.</p> <p>If the collateralisation is performed at portfolio level, the initial margin collected relates to the whole portfolio; if the collateralisation is performed for single transactions, the initial margin collected relates to such single transaction. This refers to the total current value of the initial margin after application of the haircut (if applicable), rather than to its daily change.</p> <p>The data element refers both to uncleared and centrally cleared transactions. For centrally cleared transactions, the data element does not include collateral collected by the clearing agency as part of its investment activity.</p> <p>If the initial margin collected is denominated in more than one currency, those amounts are converted into a single currency chosen by the reporting counterparty and reported as one total value.</p>	Sum of initial margin collected for all derivatives in the same position.
Initial margin collected by the reporting counterparty (pre-haircut)	<p>Monetary value of initial margin that has been collected by the reporting counterparty, including any margin that is in transit and pending settlement unless inclusion of such margin is not allowed under the jurisdictional requirements.</p> <p>If the collateralisation is performed at portfolio level, the initial margin collected relates to the whole portfolio; if the collateralisation is performed for single transactions, the initial margin collected relates to such single transaction. This refers to the total current value of the initial margin, rather than to its daily change.</p> <p>The data element refers both to uncleared and centrally cleared transactions. For centrally cleared transactions, the data element does not include collateral collected by the clearing agency as part of its investment activity.</p> <p>If the initial margin collected is denominated in more than one currency, those amounts are converted into a single currency chosen by the reporting counterparty and reported as one total value.</p>	Sum of initial margin collected for all derivatives in the same position.
Variation margin posted by the reporting counterparty (post-haircut)	<p>Monetary value of the variation margin posted by the counterparty 1 (including the cash-settled one) and including any margin that is in transit and pending settlement. Contingent variation margin is not included.</p> <p>If the collateralisation is performed at portfolio level, the variation margin posted relates to the whole portfolio; if the collateralisation is performed for single transactions, the variation margin posted relates to such single transaction.</p> <p>This data element refers to the total current value of the variation margin after application of the haircut (if applicable), cumulated since the first reporting of posted variation margins for the portfolio /transaction.</p>	Sum of variation margin posted for all derivatives in the same position.

	<p>If the variation margin posted is denominated in more than one currency, those amounts are converted into a single currency chosen by the counterparty 1 and reported as one total value.</p>	
Variation margin posted by the reporting counterparty (pre-haircut)	<p>Monetary value of the variation margin posted by the reporting counterparty (including the cash-settled one) and including any margin that is in transit and pending settlement unless inclusion of such margin is not allowed under the jurisdictional requirements. Contingent variation margin is not included.</p> <p>If the collateralisation is performed at portfolio level, the variation margin posted relates to the whole portfolio; if the collateralisation is performed for single transactions, the variation margin posted relates to such single transaction.</p> <p>This data element refers to the total current value of the variation margin, cumulated since the first reporting of variation margins posted for the portfolio/transaction</p> <p>If the variation margin posted is denominated in more than one currency, those amounts are converted into a single currency chosen by the reporting counterparty and reported as one total value.</p>	Sum of variation margin posted for all derivatives in the same position.
Variation margin collected by the reporting counterparty (post-haircut)	<p>Monetary value of the variation margin collected by the counterparty 1 (including the cash-settled one) and including any margin that is in transit and pending settlement. Contingent variation margin is not included. If the collateralisation is performed at portfolio level, the variation margin collected relates to the whole portfolio; if the collateralisation is performed for single transactions, the variation margin collected relates to such single transaction.</p> <p>This refers to the total current value of the variation margin collected after application of the haircut (if applicable), cumulated since the first reporting of collected variation margins for the portfolio /transaction.</p> <p>If the variation margin collected is denominated in more than one currency, those amounts are converted into a single currency chosen by the counterparty 1 and reported as one total value.</p>	Sum of variation margin collected for all derivatives in the same position.
Variation margin collected by the reporting counterparty (pre-haircut)	<p>Monetary value of the variation margin collected by the reporting counterparty (including the cash-settled one) and including any margin that is in transit and pending settlement unless inclusion of such margin is not allowed under the jurisdictional requirements. Contingent variation margin is not included.</p> <p>If the collateralisation is performed at portfolio level, the variation margin collected relates to the whole portfolio; if the collateralisation is performed for single transactions, the variation margin collected relates to such single transaction.</p> <p>This refers to the total current value of the variation margin, cumulated since the first reporting of collected variation margins for the portfolio/ transaction.</p> <p>If the variation margin collected is denominated in more than one currency, those amounts are converted into a single currency chosen by the reporting counterparty and reported as one total value.</p>	Sum of variation margin collected for all derivatives in the same position.
Valuation amount	<p>Current value of the outstanding contract.</p> <p>Valuation amount is expressed as the exit cost of the contract or components of the contract, i.e., the price that would be received to sell the contract (in the market in an orderly transaction at the valuation date).</p>	Sum of valuation amounts for all derivatives in the position or valuation of the position itself if it is evaluated as a single element.
Final contractual settlement date	<p>Unadjusted date as per the contract, by which all transfer of cash or assets should take place and the counterparties should no longer have any outstanding obligations to each other under that contract.</p> <p>For products that may not have a final contractual settlement date (e.g., American options), this data element reflects the date by which the transfer of cash or asset would take place if termination were to occur on the expiration date.</p>	Maximum of all final contractual settlement dates of all derivatives in the position.

3 Appendix

From Revised CDE Technical Guidance – version 3: Harmonisation of critical OTC derivatives data elements (other than UTI and UPI)⁸¹

3.1 Notional amount

Product	Converted Amount
Equity options and similar products	Product of the strike price and the number of shares or index units
Equity forwards and similar products	Product of the forward price and the number of shares or index units
Equity dividend swaps and similar products	Product of the period fixed strike and the number of shares or index units
Equity swaps, portfolio swaps, and similar products	Product of the initial price and the number of shares or index units
Equity variance swaps and similar products	Variance amount
Equity volatility swaps and similar products	Vega notional amount
Equity CFDs and similar products	Product of the initial price and the number of shares or index units
Commodity options and similar products	Product of the strike price, and the total notional quantity
Commodity forwards and similar products	Product of the forward price and the total notional quantity
Commodity fixed/float swaps and similar products	Product of the fixed price and the total notional quantity
Commodity basis swaps and similar products	Product of the last available spot price at the time of the transaction of the underlying asset of the leg with no spread and the total notional quantity of the leg with no spread
Commodity swaptions and similar products	Notional amount of the underlying contract
Commodity CFDs and similar products	Product of the initial price and the total notional quantity

Notes to the conversion table for derivatives negotiated in non-monetary amounts:

Note 1: for derivatives where the quantity unit of measure differs from the price unit of measure, the price or total quantity is converted to a unified unit of measure.

Note 2: if applicable to the derivative, the notional amount reflects any multipliers and option entitlements.

Note 3: for basket-type contracts, the notional amount of the derivative is the sum of the notional amounts [of each constituent of the basket](#).

Allowable value	ISO 20022 name	ISO 20022 definition ⁸²	FIX/FIXML ⁸³ code value	FIX/FIXML code value description	FIX/FIXML definition	FpML ⁸⁴ code	FpML definition
A002	IC30365	Method whereby interest is calculated based on a 30-day month in a way similar to the 30/360 (basic rule) and a 365-day year. Accrued interest to a value date on the last day of a month shall be the same as to the 30th calendar day of the same month, except for February. This means that a 31st					
A003	IC30Actual	Method whereby interest is calculated based on a 30-day month in a way similar to the 30/360 (basic rule) and the assumed number of days in a year in a way similar to the Actual/Actual (ICMA). Accrued interest to a value date on the last day of a month shall be the same as to the 30th calendar day of the same month, except for February. This means that the 31st is assumed to be the 30th and 28 Feb (or 29 Feb for a leap year) is assumed to be the 28th (or 29th). The assumed number of days in a year is					
A004	Actual360	Method whereby interest is calculated based on the actual number of accrued days in the interest period and a 360-day year.	6	Act/360	The actual number of days between Date1 and Date2, divided by 360. See also 2006 ISDA Definitions, Section 4.16. Day Count Fraction, paragraph (e). [Symbolic name: ActThreeSixty]	ACT/360	Per 2006 ISDA Definitions, Section 4.16. Day Count Fraction, paragraph (e) or Annex to the 2000 ISDA Definitions (June 2000 Version), Section 4.16. Day Count Fraction, paragraph (d). The actual number of days in the Calculation Period or Compounding Period in respect of which payment is being made divided by 360.

Allowable value	ISO 20022 name	ISO 20022 definition ⁸²	FIX/FIXML ⁸³ code value	FIX/FIXML code value description	FIX/FIXML definition	FpML ⁸⁴ code	FpML definition
A005	Actual365Fixed	Method whereby interest is calculated based on the actual number of accrued days in the interest period and a 365-day year.	7	Act/365 (FIXED)	The actual number of days between Date1 and Date2, divided by 365. See also 2006 ISDA Definitions, Section 4.16. Day Count Fraction, paragraph (d). [Symbolic name: ActThreeSixtyFiveFixed]	ACT/365.FIXED	Per 2006 ISDA Definitions, Section 4.16. Day Count Fraction, paragraph (d) or Annex to the 2000 ISDA Definitions (June 2000 Version), Section 4.16. Day Count Fraction, paragraph (c). The actual number of days in the Calculation Period or Compounding Period in respect of which payment is being made divided by 365.
A006	ActualActualICMA	Method whereby interest is calculated based on the actual number of accrued days and the assumed number of days in a year, i.e., the actual number of days in the coupon period multiplied by the number of interest payments in the year. If the coupon period is irregular (first or last coupon), it is extended or split into quasi-interest periods that have the length of a regular coupon period and the computation is operated separately on each quasi-interest period and the intermediate results are summed up.	9	Act/Act (ICMA)	The denominator is the actual number of days in the coupon period multiplied by the number of coupon periods in the year. Assumes that regular coupons always fall on the same day of the month where possible. See also 2006 ISDA Definitions, Section 4.16. Day Count Fraction, paragraph (c). [Symbolic name: ActActICMA]	ACT/ACT.ICMA	Per 2006 ISDA Definitions, Section 4.16. Day Count Fraction, paragraph (c). This day count fraction code is applicable for transactions booked under the 2006 ISDA Definitions. Transactions under the 2000 ISDA Definitions should use the ACT/ACT.ISMA code instead. A fraction equal to "number of days accrued/number of days in year", as such terms are used in Rule 251 of the statutes, by-laws, rules and recommendations of the International Capital Markets Association (the "ICMA Rule Book"), calculated in accordance with Rule 251 of the ICMA Rule Book as applied to non-US dollar-denominated straight and convertible bonds issued after 31 December 1998, as though the interest coupon on a bond were being calculated for a coupon period corresponding to the Calculation Period or Compounding Period in respect of which payment is being made.

Allowable value	ISO 20022 name	ISO 20022 definition ⁸²	FIX/FIXML ⁸³ code value	FIX/FIXML code value description	FIX/FIXML definition	FpML ⁸⁴ code	FpML definition
A007	IC30E360orEuroBondBasismodel1	<p>Method whereby interest is calculated based on a 30-day month and a 360-day year. Accrued interest to a value date on the last day of a month shall be the same as to the 30th calendar day of the same month. This means that the 31st is assumed to be the 30th and the 28 Feb (or 29 Feb for a leap year) is assumed to be equivalent to 30 Feb. However, if the last day of the maturity coupon period is the last day of February, it will not be assumed to be the 30th. It is a variation of the 30/360 (ICMA) method commonly used for eurobonds. The usage of this variation is only relevant when the coupon periods are scheduled to end on the last day of the month.</p>	5	30E/360 (ISDA)	<p>Date adjustment rules are: (1) if Date1 is the last day of the month, then change Date1 to 30; (2) if D2 is the last day of the month (unless Date2 is the maturity date and Date2 is in February), then change Date2 to 30. See also 2006 ISDA Definitions, Section 4.16. Day Count Fraction, paragraph (h). [Symbolic name: ThirtyEThreeSixtyISDA]</p>	30E/360.ISDA	<p>Per 2006 ISDA Definitions, Section 4.16. Day Count Fraction, paragraph (h). Note the algorithm for this day count fraction under the 2006 ISDA Definitions is designed to yield the same results in practice as the version of the 30E/360 day count fraction defined in the 2000 ISDA Definitions. See Introduction to the 2006 ISDA Definitions for further information relating to this change. The number of days in the Calculation Period or Compounding Period in respect of which payment is being made divided by 360, calculated on a formula basis as follows: Day Count Fraction = $[360*(Y2-Y1) + 30*(M2-M1) + (D2-D1)]/360$. "D1" is the first calendar day, expressed as a number, of the Calculation Period or Compounding Period, unless such number would be 31, in which case D1, will be 30; "D2" is the calendar day, expressed as a number, immediately following the last day included in the Calculation Period or Compounding Period, unless such number would be 31, in which case D2 will be 30.</p>

A009	Actual365LorActuActubasisRule	Method whereby interest is calculated based on the actual number of accrued days and a 365-day year (if the coupon payment date is NOT in a leap year) or a 366-day year (if the coupon payment date is in a leap year).	14	Act/365L	The number of days in a period equal to the actual number of days .The number of days in a year is 365, or if the period ends in a leap year 366. Used for sterling floating rate notes. May also be referred to as ISMA Year. See also 2006 ISDA Definitions, Section 4.16. Day Count Fraction, paragraph (i). [Symbolic name: ActThreeSixtyFiveL]	ACT/365L	Per 2006 ISDA Definitions, Section 4.16. Day Count Fraction, paragraph (i). The actual number of days in the Calculation Period or Compounding Period in respect of which payment is being made divided by 365 (or, if the later Period End Date of the Calculation Period or Compounding Period falls in a leap year, divided by 366).

Allowable value	ISO 20022 name	ISO 20022 definition ⁸²	FIX/FIXML ⁸³ code value	FIX/FIXML code value description	FIX/FIXML definition	FpML ⁸⁴ code	FpML definition
A010	ActualActualAFB	<p>Method whereby interest is calculated based on the actual number of accrued days and a 366-day year (if 29 Feb falls in the coupon period) or a 365-day year (if 29 Feb does not fall in the coupon period). If a coupon period is longer than one year, it is split by repetitively separating full year subperiods counting backwards from the end of the coupon period (a year backwards from 28 Feb being 29 Feb, if it exists). The first of the subperiods starts on the start date of the accrued interest period and thus is possibly shorter than a year. Then the interest computation is operated separately on each subperiod and the intermediate results are summed up.</p>	8	Act/Act (AFB)	<p>The actual number of days between Date1 and Date2, the denominator is either 365 (if the calculation period does not contain 29 February) or 366 (if the calculation period includes 29 February). See also AFB Master Agreement for Financial Transactions - Interest Rate Transactions (2004) in Section 4. Calculation of Fixed Amounts and Floating Amounts, paragraph 7 Day Count Fraction, subparagraph (i). [Symbolic name: ActActAFB]</p>	ACT/ACT.AFB	<p>The Fixed/Floating Amount will be calculated in accordance with the "BASE EXACT/EXACT" day count fraction, as defined in the "Définitions Communes plusieurs Additifs Techniques" published by the Association Française des Banques in September 1994. The denominator is either 365 (if the calculation period does not contain 29 February) or 366 (if the calculation period includes 29 February) – where a period of longer than one year is involved, two or more calculations are made: interest is calculated for each full year, counting backwards from the end of the calculation period, and the remaining initial stub period is treated in accordance with the usual rule. When counting backwards for this purpose, if the last day of the relevant period is 28 February, the full year should be counted back to the previous 28 February unless 29 February exists, in which case, 29 February should be used.</p>

3.3 Valuation method

Classification of valuation inputs

Bucket	Input used	Valuation method ⁸⁶
1	Quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date [IFRS 13:76/ASC 820-10-35-40]. A quoted market price in an active market provides the most reliable evidence of fair value and is used without adjustment to measure fair value whenever available, with limited exceptions. [IFRS 13:77/ASC 820-10-35-41] An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. [IFRS 13: Appendix A/ASC 820-10-20].	Mark-to-market
2	Quoted prices for similar assets or liabilities in active markets [IFRS 13:81/ASC 820-10-35-47] (other than quoted market prices included within bucket 1 that are observable for the asset or liability, either directly or indirectly)	Mark-to-market
3	Quoted prices for identical or similar assets or liabilities in markets that are not active [IFRS 13:81/ASC 820-10-35-48(b)] (other than quoted market prices included within bucket 1 that are observable for the asset or liability, either directly or indirectly).	Mark-to-model – historic prices from inactive markets should not be directly used
4	Inputs other than quoted prices that are observable for the asset or liability, for example interest rates and yield curves observable at commonly quoted intervals, implied volatilities, credit spreads [IFRS 13:81/ASC 820-10-35-48(c)] (other than quoted market prices included within bucket 1 that are observable for the asset or liability, either directly or indirectly)	Mark-to-market
5	Inputs that are derived principally from or corroborated by observable market data by correlation or other means (“market-corroborated inputs”) [IFRS 13:81/ASC 820-10-35-48(d)] (other than quoted market prices included within bucket 1 that are observable for the asset or liability, either directly or indirectly).	Mark-to-model – the inputs can be derived “principally” from observable market data, meaning that unobservable inputs can be used

⁸⁶ The classification provided in this column is independent from IFRS 13/ASC 820 and is for the sole purpose of reporting critical data elements of OTC derivative transactions.

6	<p>Unobservable inputs for the asset or liability. [IFRS 13:86/ASC 820-10-35-52] Unobservable inputs are used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. An entity develops unobservable inputs using the best information available in the circumstances, which might include the entity's own data, taking into account all information about market participant assumptions that is reasonably available. [IFRS 13:87-89/ASC 820-10-35-53 - 35-54A]</p>	Mark-to-model – unobservable inputs are used
---	---	--

3.4 Collateralisation category

Value	Name	Definition
UNCL	Uncollateralised	There is no collateral agreement between the counterparties or the collateral agreement(s) between the counterparties stipulates that no collateral (neither initial margin nor variation margin) has to be posted with respect to the derivative transaction.
PRC1	Partially collateralised: Counterparty 1 only	The collateral agreement(s) between the counterparties stipulates that the reporting counterparty regularly posts only variation margin and that the other counterparty does not post any margin with respect to the derivative transaction.
PRC2	Partially collateralised: Counterparty 2 only	The collateral agreement(s) between the counterparties stipulates that the other counterparty regularly posts only variation margin and that the reporting counterparty does not post any margin with respect to the derivative transaction.
PRCL	Partially collateralised	The collateral agreement(s) between the counterparties stipulates that both counterparties regularly post only variation margin with respect to the derivative transaction.
OWC1	One-way collateralised: Counterparty 1 only	The collateral agreement(s) between the counterparties stipulates that the reporting counterparty posts the initial margin and regularly posts variation margin and that the other counterparty does not post any margin with respect to the derivative transaction.
OWC2	One-way collateralised: Counterparty 2 only	The collateral agreement(s) between the counterparties stipulates that the other counterparty posts the initial margin and regularly posts variation margin and that the reporting counterparty does not post any margin with respect to the derivative transaction.
OWP1	One-way/partially collateralised: Counterparty 1	The collateral agreement(s) between the counterparties stipulates that the reporting counterparty posts the initial margin and regularly posts variation margin and that the other counterparty regularly posts only variation margin.
OWP2	One-way/partially collateralised: Counterparty 2	The collateral agreement(s) between the counterparties stipulates that the other counterparty posts the initial margin and regularly posts variation margin and that the reporting counterparty regularly posts only variation margin.
FLCL	Fully collateralised	The collateral agreement(s) between the counterparties stipulates that both counterparties post initial margin and regularly post variation margin with respect to the derivative transaction.

3.5 Action and event reporting

The below table specifies the allowable combinations of [Action type] and [Event type]. It also sets out whether they apply at transaction level, position level or both. The last column of the table indicates when a given [Action type] can be reported without [Event type].

Action Type

Event Type

Action type & Event type combinations	Trade (TRAD)	Novation (NOVA)	Compression or Risk Reduction Exercise (COMP)	Early Termination (ETRM)	Clearing (CLRG)	Exercise (EXER)	Allocation (ALOC)	Clearing & Allocation (CLAL)	Credit Event (CREV)	Transfer (PTNG)	Corporate Event (CORP)	Upgrade (UPDT)	Inclusion In Position (INCP)	No Event Type Required
New (NEWT)	T	T,P	T		T	T	T	T		T,P	T,P	T ⁸⁷	P	
Modify (MODI)	T,P	T,P	T	T,P		T	T		T		T,P	T,P	P	
Correct (CORR)														T,P
Terminate (TERM)		T,P	T	T,P	T	T	T	T	T		T,P		T,P ⁸⁸	
Error (EROR)														T,P
Revive (REVI)														T,P
Transfer out (PRTO) ⁸⁹										T,P				
Valuation (VALU)														T,P
Collateral (MARU)														T,P
Position component (POSC)														T

⁸⁷ NEWT-UPDT is used for upgrading existing ‘exotic’, ‘complex’, or ‘non-standard’ swaps to accurately report and comply with the Technical Manual

⁸⁸ If a derivative is traded and immediately added to a position, it must be reported using the action type ‘POSC’. However, if a derivative is reported as a new transaction (‘NEWT’) but then later added into a position, it should be reported using the action type ‘TERM’ and event type ‘INCP’.

⁸⁹ Any live or dead (terminated or expired) transactions can be transferred out except for the transactions that are previously reported as an error. Once a transaction is reported as ‘transfer out’ to a trade repository no further submission is allowed to the same trade repository for that transaction unless the transaction is transferred back in to the same trade repository. Combination ‘NEWT-PTNG’ should be used in this case.

3.6 Allowable Action Type Sequences

Reporting is facilitated by combinations of action type and event type. The action type sequence is designed to avoid illogical submissions by reporting counterparties. A submission with an action type that is not possible based on the previous action type should not satisfy the trade repository’s validation procedure.

- Notes: The status of the derivative after revival; depends on the maturity date:
- * with Expiration Date >= today
 - ** with Expiration Date < today
 - *** PRTO is also accepted (but not expected) for termination or expired
 - ****With Early Termination Date reported and < today

3.7 Definitions for Event Type Allowable Values

Event type	Allowable value	Definition
Trade	TRAD	Creation or modification of a transaction.
Novation/Step-in	NOVA	A novation or step-in legally moves part or all of the financial risks of a transaction from a transferor to a transferee and has the effect of terminating/modifying the original transaction so that it is either terminated or its notional is modified.
Post trade risk reduction exercise	COMP	Compressions and other post trade risk reduction exercises generally have the effect either of terminating or modifying (i.e., reducing the notional value) a set of existing transactions and/or of creating a set of new transaction(s). These processes result in largely the same exposure of market risk that existed prior to the event for the counterparty.
Early termination	ETRM	Termination of an existing transaction prior to expiration date.
Clearing	CLRG	Central clearing is a process where a central counterparty (CCP) interposes itself between counterparties to transactions, becoming the buyer to every seller and the seller to every buyer and thereby ensuring the performance of open transactions. It has the effect of terminating an existing transaction between the buyer and the seller.
Exercise	EXER	The full or partial exercise of an option or swaption by one counterparty of the transaction.
Allocation	ALOC	The process by which portions of a single transaction (or multiple transactions) are allocated to one or multiple different counterparties and reported as new transactions. ⁹⁰
Clearing & Allocation	CLAL	A simultaneous clearing and allocation event in a central counterparty (CCP).
Credit event	CREV	An event that results in a modification or a termination of a previously submitted credit transaction. Applies only to credit derivatives.
Transfer	PTNG	The process by which a transaction is transferred to another trade repository that has the effect of the closing of the transaction at one trade repository and opening of the same transaction using the same UTI in a different trade repository (new).
Inclusion in position	INCP	Inclusion of a CCP-cleared transaction or other fungible transactions into a position, where an existing transaction is terminated and either a new position is created or the notional of an existing position is modified.
Corporate event	CORP	The process by which a corporate action is taken on equity underlying that impacts the transactions on that equity.

⁹⁰ Where a derivative is entered into by an agent of a counterparty and the transaction is executed before the derivative is allocated among the counterparties on whose behalf the agent is acting, we would prefer for the reporting counterparty not to report derivatives data in respect of the pre-allocation transaction and instead, once it receives and processes the allocation from the agent, to report only the allocated derivatives within the time periods set out in section 31 of the TR Rules. However, we would accommodate reporting in respect of the pre-allocation transaction as set out in this Technical Manual, and for that reason we have provided ALOC as an allowable value. Please also see Example 4.4.

Event type	Allowable value	Definition
Update	UPDT	Update of an outstanding transaction performed in order to ensure its conformity with the amended reporting requirements.

3.8 Definitions for Action Type Allowable Values

Action type	Allowable value	Definition
New	NEWT	The creation of the first transaction resulting in the generation of a new UTI.
Modify	MODI	A modification of the terms of a previously reported transaction due to a newly negotiated modification (amendment) or a filling in of not available missing information (e.g., post price transaction). It does not include correction of a previously reported transaction.
Correct	CORR	A correction of erroneous data of a previously reported transaction.
Terminate	TERM	A termination of a previously reported transaction.
Error	EROR	A cancellation of a wrongly submitted entire transaction in case it never came into existence or was not subject to the reporting requirements under the applicable law of a given jurisdiction, or a cancellation of a duplicate report.
Revive	REVI	An action that reinstates a reported transaction that was reported with action type "Error" or terminated by mistake or expired due to an incorrectly reported Expiration date.
Valuation	VALU	An update of a valuation of a transaction. There will be no corresponding Event type.
Collateral/Margin update	MARU	An update to collateral margin data. There will be no corresponding Event type.
Position component	POSC	A report of a new transaction that is included in a separate position report on the same day.
Transfer out	PRTO	A transfer of a transaction from one trade repository to another trade repository (change of trade repository).

4 Examples

4.1 SEF Transactions – Anonymous and cleared

This example illustrates the reporting of anonymous transactions that are subsequently cleared.

Row	Action type	Event type	Event timestamp	Unique transaction identifier (UTI)	Prior UTI	Notional amount	Execution timestamp	Clearing receipt timestamp	Submitter identifier	Central counterparty	Counterparty 1 (reporting counterparty)	Counterparty 2	Cleared	Platform identifier
1	NEWT	TRAD	2023-04-01T14:15:36Z	LEI1RPT0001ALPHA		10000	2023-04-01T14:15:36Z	NULL	LEI1SEF0001	NULL	LEI1RPT0001	LEI2CP0002	I	ABCD
2	TERM	CLRG	2023-04-01T14:40:36Z	LEI1RPT0001ALPHA		10000	2023-04-01T14:15:36Z	2023-04-01T14:40:36Z	LEI1SEF0001	NULL	LEI1RPT0001	LEI2CP0002	I	ABCD

4.2 Package- Price/Spread

This example illustrates how to report package transactions based on either the price or spread.

Row 1 – Submission of a new package transaction but the package transaction price is not known yet.

Row 2 – Modifying the package transaction to update the package transaction price.

Row 3 – Submission of a new package transaction with a package transaction spread.

Row	Action type	Event type	Event timestamp	Unique transaction identifier (UTI)	Package Indicator	Package identifier	Package transaction price	Package transaction price currency	Package transaction price notation	Package transaction on spread	Package transaction on spread currency	Package transaction on spread notation	Price	Price currency	Notional amount	Execution timestamp	Counterparty 1 (reporting counterparty)	Counterparty 2
1	NEWT	TRAD	2023-04-01T14:15:36Z	LEI1RPT0001EEE	True	ABCD12	99999.9999999999	NULL	1	NULL	NULL	NULL	10.23	EUR	10000	2023-04-01T14:15:36Z	LEI1RPT0001	LEI2CP0002

3	NEWT	TRAD	2023-04-01T14:15:36Z	LEI1RPT0001FFF	True	ABCD34	NULL	NULL	NULL	200	NULL	4	20.23	EUR	10000	2023-04-01T14:15:36Z	LEI1RPT0001	LEI2CP0002

4.3 Partial Termination/Amendment, Correction

This example illustrates how different Action – Event type combinations are used to report changes to a previously submitted transaction.

Row	Action type	Event type	Amendment indicator	Event timestamp	Expiration date	Unique transaction identifier (UTI)	Prior UTI (for one-to-one and one-to-many relations between transactions)	Embedded option type	Notional amount	Execution timestamp	Counterparty 1 (reporting counterparty)	Counterparty 2
1	NEWT	TRAD		2023-04-01T14:15:36Z	2024-01-01	LEI1RPT0001AAAA			10000	2023-04-01T14:15:36Z	LEI1RPT0001	LEI2CP0002
2	MODI	TRAD	True	2023-04-02T10:22:10Z	2024-01-01	LEI1RPT0001AAAA			9000	2023-04-01T14:15:36Z	LEI1RPT0001	LEI2CP0002
3	MODI	TRAD	FALSE	2023-04-03T10:22:10Z	2024-01-01	LEI1RPT0001AAAA		OPET	9000	2023-04-01T14:15:36Z	LEI1RPT0001	LEI2CP0002
4	CORR			2023-04-04T10:22:10Z	2024-01-01	LEI1RPT0001AAAA		EXTD	9000	2023-04-01T14:15:36Z	LEI1RPT0001	LEI2CP0002

4.4 Allocation

This example illustrates how pre- and post- “Allocation” transactions are reported.

Row	Action type	Event type	Amendment indicator	Event timestamp	Unique transaction identifier (UTI)	Prior UTI (for one-to-one and one-to-many relations between transactions)	Notional amount	Execution timestamp	Counterparty 1 (reporting counterparty)	Counterparty 2
1	NEWT	TRAD		2023-04-01T14:15:36Z	LEI1RPT0001PREAA		10000	2023-04-01T14:15:36Z	LEI1RPT0001	LEIFUNDMGR
2	TERM	ALOC		2023-04-02T10:22:10Z	LEI1RPT0001PREAA		10000	2023-04-01T14:15:36Z	LEI1RPT0001	LEIFUNDMGR
3	NEWT	ALOC		2023-04-02T10:22:10Z	LEI1RPT0001POST1	LEI1RPT0001PREAA	4000	2023-04-02T10:22:10Z	LEI1RPT0001	LEI2CP00A1
4	NEWT	ALOC		2023-04-02T10:22:10Z	LEI1RPT0001POST2	LEI1RPT0001PREAA	6000	2023-04-02T10:22:10Z	LEI1RPT0001	LEI2CP00A2

4.5 Position

This example illustrates how a derivative is reported when it is included in a position.

- Row 1,2- Submitting new derivative that is the start of a new position on the same day.
- Row 3 - Submitting end of day valuation messages at position level.
- Row 4,5 – Submitting new derivative that is included in a position on the same day.
- Row 6,7,8 – Submitting new derivative that is included in a position on the next day.
- Row 9,10 – Submitting early termination at position level due to sell activity.
- Row 11 – Maintaining the position open and reporting a zero contract value on a daily basis.
- Row 12 – Termination of the position.

Row	Action type	Event type	Event timestamp	Event Identifier	UTI	Subsequent position UTI	Notional amount	Execution timestamp	Counterparty 1	Counterparty 2	Level	Valuation Amount
1	POSC		2023-01-05T14:01:34Z		LEIRPT0001TRAD1	LEIRPT0001POSC1		2023-01-05T08:01:34Z	LEIRPT0001	LEICP0002	TCTN

4.6 Error and Revive

This example illustrates a derivative that was booked in error and subsequently cancelled, but needs to be revived as it was cancelled by mistake.

Row	Action type	Event type	Amendment Indicator	Event timestamp	Unique transaction identifier (UTI)	Prior UTI (for one-to-one and one-to-many relations between transactions)	Notional amount	Execution timestamp	Counterparty 1 (reporting counterparty)	Counterparty 2
1	NEWT	TRAD		2023-04-01T14:15:36Z	LEI1RPT0001GGG		10000	2023-04-01T14:15:36Z	LEI1RPT0001	LEI2CP0002
2	EROR			2023-04-04T14:21:36Z	LEI1RPT0001GGG		10000	2023-04-01T14:21:36Z	LEI1RPT0001	LEI2CP0002
3	REVI			2023-04-05T14:21:36Z	LEI1RPT0001GGG		10000	2023-04-01T14:21:36Z	LEI1RPT0001	LEI2CP0002

4.7 Crypto

Row	Action type	Event type	Derivative based on cryptoassets	Event timestamp	Unique transaction identifier (UTI)	Unique product identifier	Notional amount	Execution timestamp	Counterparty 1 (reporting counterparty)	Counterparty 2
1	NEWT	TRAD	True	2023-04-01T14:15:36Z	LEI1RPT0001GGG	JESXCC	10000	2023-04-01T14:15:36Z	LEI1RPT0001	LEI2CP0002

4.8 Upgrade

This example illustrates how to report an upgrade event type in order to ensure its conformity with the amended reporting requirements.

Row 1: A new derivative executed on 2023-04-01.

Row 2: New reporting requirements were implemented, the existing derivative is reported as Modify-Upgrade (MODI-UPDT) in order to comply with the new requirements.⁹¹

Row	Action type	Event type	Event timestamp	Unique transaction identifier (UTI)	Notional amount	Valuation Method	Execution timestamp	Collateralisation category	Counterparty 1 (reporting counterparty)	Counterparty 2	Platform Identifier	Cleared
1	NEWT	TRAD	2023-04-01T14:15:36Z	LEI1RPT0001FFF	10000	MarkToMarket	2023-04-01T14:15:36Z	FULLY	LEI1RPT0001	LEI2CP0002	NULL	N
2	MODI	UPDT	2024-05-04T14:21:36Z	LEI1RPT0001FFF	10000	MTMA	2023-04-01T14:21:36Z	FLCL	LEI1RPT0001	LEI2CP0002	BILT	N

⁹¹ Please note that the example provided is not an exhaustive list of the fields affected by the amended reporting requirements. Therefore, it is recommended that you review the rule to identify all fields that may be impacted.
